A. July 11, 2017 PAB Meeting Minutes

3. OLD BUSINESS

4. NEW BUSINESS

A. Rezoning Requests

(1) Request from **Lidl US Operations, LLC** to rezone a 6.854± acres tract located on the east side of Dawsonville Highway, southeast of Beechwood Boulevard (a/k/a **0 and 1010 Dawsonville Highway**) from Office and Institutional (O-I) and General Business (G-B) to General Business (G-B).
Ward Number: One
Tax Parcel Number(s): 01-115-001-002 and 061
Request: Grocery store

(2) Request from **JH Homes, Inc.** to rezone a 21.87± acres tract located on the east side of South Enota Drive, having frontage on Smokey Mountain Springs Lane and Pearce Way (a/k/a **1024, 1030 and 1037 Pearce Way NE; 0 South Enota Drive NE**) from Office and Institutional (O-I) to Residential-II (R-II).
Ward Number: Two
Tax Parcel Number(s): 01-083-001-005, 151, 152 and 153
Request: 65 residential townhomes

GAINESVILLE PLANNING AND APPEALS BOARD
DRAFT MINUTES OF MEETING
JULY 11, 2017

CALL TO ORDER Chairman Carter at 5:30 p.m.

Members Present: Chairman Doug Carter, Vice-Chair Jane Fleming, and Board Members Eddie Martin, Sr., Ryan Thompson and Rich White

Members Absent: Board Members Connie Rucker and Carmen Delgado

Staff Present: Community Development Director Rusty Ligon, Planning Manager Matt Tate and Recording Secretary Judy Foster

Others Present: Council Members George Wangemann and Ruth Bruner

MINUTES OF JUNE 13, 2017

There was a motion to approve the minutes as presented.

Motion made by Board Member Thompson
Motion seconded by Board Member White
Vote – 5 favor, 2 absent (Rucker, Delgado)

NEW BUSINESS

A. Annexation Request

1) Request from **Keel Property Management, LLC** to annex a 6.32± acres tract located on the northeast side of the intersection of Jesse Jewell Parkway and White Sulphur Road (a/k/a **0 White Sulphur Road**), and to establish zoning as General Business (G-B).
   Ward Number: Two
   Tax Parcel Number(s): 09-123-000-008
   Request: Restaurant and retail uses

Staff Presentation: Planning Manager Matt Tate gave the following staff presentation:

The applicant is proposing to annex the subject 6.32± acres property into the city limits of Gainesville with a zoning of General Business (G-B). The property is currently zoned Agricultural Residential-III (AR-III) and Highway Business (H-B) within unincorporated Hall County and is adjacent to the city limits to the south and west. The surrounding uses include New Haven Church, New Holland Market and single-family homes. The property is undeveloped, heavily wooded and abuts railroad right-of-way to the east. In addition, the property is located within the Limestone Parkway Overlay Zone and the Hall County Gateway District. The applicant intends to utilize water and sewer services for future restaurant and retail purposes. The conceptual plan proposes a 3,500 square foot Fazoli's restaurant, a 4,800 square foot restaurant and a 7,000 square foot retail building. Access is proposed from White Sulphur Road, directly across from the rear entrance to the New Holland Market Place. Public water and sewer will be utilized which will require a sanitary sewer extension of approximately 1,300 feet from Jesse Jewell Parkway.

The proposed development appears to be compatible with the Future Development Map of the Comprehensive Plan as the subject property is located within the *Retail/Commercial* land use category and both within the *Limestone Medical Corridor* Character Area and the *Historic Mill Villages* Character Area. Land uses allowed in the Historic Mill Villages include medium-density residential, mixed-use, commercial, public / institutional, and parks / recreation / conservation.

The Planning Division staff is recommending **conditional approval** of this annexation request with G-B zoning, based on the Comprehensive Plan and the adjacent mixture of land uses with five conditions.

Applicant Presentation: Ed Myers, Myers & Company, 752 Chattahoochee Place, stated he represented the applicant and was the project engineer. He stated the request was to annex the subject property, be consistent with General Business zoning standards, and to get water and sewer services from the City. He stated the developer would be the owner of the Fazoli's franchise on the corner and develop the rest of the property to market to help cover the costs. Mr. Myers stated the property has been on the market for a month and they have a proposed car wash and asked the restriction of a car wash in the conditions be removed. He stated they did not ask for that use to be restricted and noted it is a permitted use within the General Business zoning district. He stated they would also like the option for mini-warehouse units on Lot 3, on the north side, noting they would be screened and the front facades constructed in compliance with overlay standards. He felt there was a need for both of these uses in the area because of new residential developments.

FAVOR: None

OPPOSE: None

Planning and Appeals Board Comments: None

There was a motion to recommend approval of the request to annex the subject property and establish zoning as General Business (G-B) with the following conditions as proposed by staff:

Conditions

1. **Prohibited commercial uses shall include motels or hotels with rooms accessed from the exterior of the building, adult novelty stores, adult entertainment centers, pawn shops, gas stations, tire stores, massage parlors except for practitioners licensed by the State of Georgia, vaping stores, auto body shops, automobile sale establishments, marine sales or repair stores, automated or non-automated car wash, coin-laundry facilities, truck stop, non-climate controlled mini-warehouses or storage facilities, tattoo parlors, psychics, fortune tellers, clairvoyants and the like.**
2. **The exterior of the buildings shall be constructed with brick, stone or masonry finish on all sides visible from a public street and will comply with the Limestone Parkway Overlay Zone standards and Architectural Design Guidelines stated within the Gainesville Unified Land Development Code.**
3. **The proposed development shall be limited to one free standing sign per lot. Each sign shall be limited to a maximum height of 10-feet, maximum sign face area of 50 square feet, maximum sign structure area of 96 square feet with internal or indirect lighting. No electronic changeable copy signs shall be permitted. The purpose of**

these sign standards is to provide for consistency with the adjacent New Holland Market development.

4. **Prior to a permit being issued, the developer shall provide a traffic study and coordinate with the Georgia Department of Transportation (GDOT) Traffic Division to determine the traffic development impacts on the intersection of SR 369 / Jesse Jewell Parkway and White Sulphur Road and to determine whether the existing turn lanes will accommodate the future traffic generated by the development.**
5. **All access point design for the subject property shall require approval by the Georgia Department of Transportation in conjunction with the Gainesville Public Works Director. All required access / traffic / sidewalk improvements associated with the proposed development shall be at the full expense of the developer / property owner.**

Motion made by Board Member Martin
Motion seconded by Vice-Chair Fleming
Vote – 5 favor, 2 absent (Rucker, Delgado)

B. Rezoning Request

1) Request from **Will & McCay Crumley** to rezone a 0.308± acre tract located on the north side of Park Street and northeast of the intersection of Park Street and Boulevard (a/k/a **523 Park Street**) from Residential-II (R-II) to Residential-I (R-I).
Ward Number: Two
Tax Parcel Number(s): 01-038-003-015
Request: Single-family home

Staff Presentation: Planning Manager Matt Tate gave the following staff presentation:

The applicant is proposing to rezone the subject 0.308± acre property from Residential-II (R-II) to Residential-I (R-I) for the existing single-family use. The subject property contains a one-story, single-family home and a detached building and has road frontage along Park Street. The surrounding uses include single-family homes, multi-family apartments, professional offices and Brenau University. The applicant intends to keep the property as single-family which is currently occupied by the applicant. The request would effectively downzone the property so that any future non-single-family uses would be required to provide a buffer adjacent to the subject property.

The Future Development Map for the City of Gainesville places the subject property within the *Low-Medium Residential* land use category and within the *Traditional Neighborhoods* Character Area specifically within the *Northern Neighborhoods subarea*. Land uses allowed include low-density and medium-density residential, and mixed-use / commercial.

The Planning Division staff is recommending **approval** of this rezoning request with R-I zoning, based on the Comprehensive Plan and the surrounding residential and non-residential land uses.

Applicant Presentation: Will Crumley, 523 Park Street, stated that down-zoning is an odd thing and not seen very often. However, he and his wife felt it was the best way to protect their property value in a neighborhood that is changing. He stated that several businesses were moving into the area and the rezoning would be best for their interest.

FAVOR: None

OPPOSE: None

Planning and Appeals Board Comments: None

There was a motion to recommend approval of the request to rezone the subject property from Residential-II (R-II) to Residential-I (R-I).

Motion made by Vice-Chair Fleming
Motion seconded by Board Member Martin
Vote – 5 favor, 2 absent (Rucker, Delgado)

ADJOURNMENT

There was a motion to adjourn the meeting at 5:46 p.m.

Motion made by Board Member Martin
Motion seconded by Board Member Thompson
Vote – 5 favor, 2 absent (Rucker, Delgado)

Respectfully submitted,

Doug Carter, Chairman

Judy Foster, Recording Secretary

CITY OF GAINESVILLE

AGENDAREQUEST

Date Submitted: 7/18/2017

Presenter: Matt Tate

Item of Business: Request from **Lidl US Operations, LLC** to rezone a 6.854± acres tract located on the east side of Dawsonville Highway, southeast of Beechwood Boulevard (a/k/a **0 and 1010 Dawsonville Highway**) from Office and Institutional (O-I) and General Business (G-B) to General Business (G-B).
Ward Number: One
Tax Parcel Number(s): 01-115-001-002 and 061
Request: Grocery store

Meeting Date: 8/8/2017

Purpose of Request:
The applicant is proposing to rezone the subject 6.854± acres property for a grocery store. The property contains two lots consisting of 4.594± acres and 2.26± acres. The larger tract is zoned Office and Institutional (O-I) and General Business (G-B) and contains a grassed lot that was previously developed for a nursing home. The smaller tract is already zoned General Business (G-B) and contains a detention pond. The proposed grocery store is 35,962± square feet in size and the store plans to have approximately 25 to 50 employees. The anticipated hours of operation are from 8:00 A.M. to 10:00 P.M. The applicant intends to utilize City water and sewer services and access is proposed from an existing driveway on Dawsonville Highway. The property is located within the Gateway Corridor Overlay Zone and the adjacent uses include the Northlake Square shopping center, Jackson EMC office, various retail strip uses and single-family residential to the rear within the Lakeshore Heights neighborhood.

GAINESVILLE PLANNING and APPEALS BOARD
STAFF RECOMMENDATION

Applicant ..... Lidl US Operations, LLC
Property Owner ..... Northeast Georgia Medical Center
Location ..... 0 and 1010 Dawsonville Highway
Request ..... Rezone from O-I and G-B to G-B
Total Acres ..... $6.854^{\pm}$ acres
Ward ..... One
Proposed Use ..... Grocery store
Planning Division Staff Recommendation ..... **Approval, with conditions**
Date ..... August 8, 2017

▪ ***Applicant's Proposal and Background Information***

The applicant is proposing to rezone the subject 6.854± acres property for a grocery store. The property contains two lots consisting of 4.594± acres and 2.26± acres which are located on the east side of Dawsonville Highway, southeast of Beechwood Boulevard. The larger tract is zoned Office and Institutional (O-I) and General Business (G-B) and contains a grassed lot that was previously developed for a nursing home. The smaller tract located to the rear is zoned General Business (G-B) and contains a detention pond.

The proposed grocery store is 35,962± square feet in size and exterior materials consist of a mixture of brick, EIFS (stucco), metal, PVC soft panel and glass windows. The store plans to have approximately 25 to 50 employees and the anticipated hours of operation are from 8:00 A.M. to 10:00 P.M. The applicant intends to utilize City water and sewer services and full access is proposed from an existing driveway on Dawsonville Highway. In addition, internal access currently exists from the existing driveway to the adjacent Jackson EMC employee parking lot which is gated.

▪ ***Adjacent Land Use and Zoning***

Location	Use	Zoning
North	Northlake Square shopping center	General Business (G-B)
South	Jackson EMC office; Undeveloped property	Light Industrial (L-I) Residential-I (R-I)
East	Lakeshore Heights Subdivision	Residential-I (R-I)
West	Trinity Baptist Church; McEver Corners shopping center; retail, and office	Residential-I (R-I) General Business (G-B)

- ***Other Departmental Comments***

According to the Georgia Department of Transportation (GDOT), any work within the right-of-way will require review and approval from GDOT.

- ***Traffic Impact Study Summary***

A Traffic Impact Study was completed for the proposed development on June 28, 2017 by Wolverton & Associates, Inc. Initial evaluations were made to assess the current conditions within the vicinity of the development. Both A.M. and P.M. peak period turning movement counts were conducted on Thursday, May 25, 2017, at the following two intersections:

- SR 53/Dawsonville Highway and Site Driveway
- SR 53/Dawsonville Highway and SR 53/McEver Road

The traffic growth rate was obtained from the below nearby GDOT traffic counter locations, which provide historical count data in the area:

- SR 53/Dawsonville Highway and Shallowford Road
- SR 53/Dawsonville Highway and Marina Road
- SR 53/McEver Road and SR 53/Dawsonville Highway
- Shallowford Road and Pearl Nix Parkway
- Pearl Nix Parkway and Shallowford Road

Using traffic count data since the year 2010, a 2.0% growth rate was developed using linear regression. The traffic growth rate was applied to the existing year 2017 volumes to estimate the traffic that will exist at the build-out year 2018 of the site if the proposed development is not developed.

According to the study, the following movements and intersections are currently operating inadequately and are expected to continue to operate inadequately for Future Background Year 2018 conditions:

- The eastbound shared left + through movement at SR 53/Dawsonville Highway and the site driveway during both peak hours;
- The westbound movement at SR 53/Dawsonville Highway and the site driveway during both peak hours; and
- The overall intersection of SR 53/Dawsonville Highway and SR 53/McEver Road during the PM peak hour.

The amount of traffic generated by the proposed development was estimated by using trip rates observed at other similar developments. The widely recognized publication from the Institute of Transportation Engineers (ITE), *Trip Generation 9th Edition* (1), contains trip rates summarized by type of development. The ITE data provide trip rates that can be applied to the size of a development to derive trip generation projections. The ITE Code 850 – Supermarket was used for the proposed LIDL.

The proposed grocery store will generate a total of 2,431 new weekday trips, 122 A.M. new peak hour trips and 240 P.M. new peak hour trips generated by the proposed grocery store. Of

these new trips, approximately 55% are expected to originate north of the site on Dawsonville Highway, 27% from the south on Dawsonville Highway and 18% from McEver Road.

As shown on the applicant's site plan, a full access driveway is proposed from the site. A 300-foot long right turn lane will be added northbound on SR 53/Dawsonville Highway at the proposed Site Driveway. In addition, a 150-foot long left turn lane will be added westbound on the proposed Site Driveway. Due to the expected heavy delay for left turning movements from the Site Driveway, users are unlikely to attempt this during the peak hours. With the proposed lane configurations and traffic control, users likely would perform a right turn movement from the Site Driveway and make a U-turn at the next available median opening to the north. However, it may be possible to explore options concerning inter-parcel connectivity with surrounding establishments to assist with the westbound left turn movement. There do not seem to be any further feasible improvements at this intersection that would significantly mitigate this condition.

- ***Zoning History***

The following zoning actions have taken place in the immediate area during the last ten years:

2017 – A request by Oak Hall Companies, LLC to rezone a 157.98± acres tract located at 0, 1264 and 1817 Ahaluna Drive; 1876 Dawsonville Highway; 2208 Karen Lane; 0 and 2029 Strickland Drive; 0 and 1489 West Lake Drive from Residential-I-A (R-I-A), Residential-I (R-I), Planned Unit Development (P-U-D) and Regional Business (R-B) to Planned Unit Development (P-U-D) and General Business (G-B) zoning for a mixed-use, age restricted community was approved with conditions.

2017 – A request by Oak Hall Companies, LLC to annex a 50.81± acres tract with a zoning of Planned Unit Development (P-U-D) and General Business (G-B) located at 0 and 1758 Ahaluna Drive; 1508, 1550, 1740, 1746, 1758, 1760, 1934 and 1982 Dawsonville Highway; 300 and 301 Skyview Drive; 0, 2008 and 2016 Strickland Drive was conditionally approved for a mixed-use, age restricted community.

2017 – A request by Oak Hall Companies, LLC to annex a 26.16 ± acres tract with a zoning of Planned Unit Development (P-U-D) located at 0 and 2209 Karen Lane; 2106, 2234 and 2242 Sportsman Club Road; 2049 Strickland Drive was conditionally approved for an age restricted, active adult community.

2015 – A request by West Ahaluna, LLC to annex an 8.74± acres tract with a zoning of Residential-I-A (R-I-A) located at 0 and 1264 Ahaluna Drive was conditionally approved for no proposed use.

2014 – A request by West Ahaluna, LLC to annex a 70.23± acres tract with a zoning of Planned Unit Development (P-U-D) located at 0 and 1817 Ahaluna Drive; 1982 Dawsonville Highway; 2208 Karen Lane; 2008, 2016 and 2029 Strickland Drive was approved with conditions. In addition, the same applicant requested to rezone a 31.93± acres tract located at 0 Ahaluna Drive NW and 1489 West Lake Drive NW from Residential-I (R-I) to Planned Unit Development (P-U-D) was also approved with conditions for a 199-lot single-family subdivision.

2013 – A request by America's Home Place, Inc. to rezone a 25.11± acres tract located at 0 and 1198 Dawsonville Highway; 1232 Ahaluna Drive and 1162 Lakeshore Circle from Residential-I (R-I), Residential-II (R-II) and Office and Institutional (O-I) to General Business (G-B) zoning for a commercial shopping center was approved with conditions.

2012 – A request by America's Home Place, Inc. to rezone a 4.711± acres tract located at 0, 1122, 1138, 1162 and 1198 Dawsonville Highway from Residential-II (R-II), Office and Institutional (O-I) and General Business (G-B) to General Business (G-B) zoning for retail, restaurant and vehicle service uses was approved with conditions.

2011 – A request by Kauffman Tire Inc. for a special use within Regional Business (R-B) zoning on a 1.19± acres tract located at 801 & 805 Dawsonville Highway was approved with conditions for an automotive tire and service store.

2010 – A request by Bill Dupree to annex a 7.11± acres tract with General Business (G-B) zoning and rezone a 2.44± acres tract from Residential-II (R-II) to General Business (G-B) located at 0, 1293, 1297 and 1139 Dawsonville Highway was approved with conditions for a business center with retail, office and restaurant uses.

- ***Staff Analysis***

(1) Is the proposed use suitable in view of the zoning and development of adjacent and nearby property?

The proposed grocery store is consistent with commercial development located along Dawsonville Highway. The subject property is located adjacent to both residential and commercial uses with zonings of Residential-I (R-I), General Business (G-B) and Light Industrial (L-I). Much of the development within the immediate area has included commercial growth with some limited new housing.

(2) Will the proposed use adversely affect the existing use or usability of adjacent or nearby property?

The Dawsonville Highway corridor will continue to experience increased traffic volumes which are currently strained during the holiday period and certain peak times. The proposed grocery store will add to existing traffic, but in itself should not adversely affect the adjacent or nearby property as the subject property is currently zoned for office and commercial purposes.

The subject property is close to Lake Lanier which will need to be protected through proper erosion control measures and the utilization of existing storm water infrastructure.

(3) Is the proposed use compatible with the purpose and intent of the Comprehensive Plan?

The subject property is located within two land use categories based on the Future Development Map for the City of Gainesville. The front portion of the subject property within the *Public/Institutional/Transportation/Communication/Utilities* land use category which includes areas containing or planned for institutional uses including governmental, educational, and medical facilities, houses of worship, and similar institutional facilities; or major transportation, utilities or communication facilities. This was due to the fact that the property was previously a nursing home. The rear portion of the property is located within the *Retail/Commercial* land use category which includes commercial service activities such as grocery stores, banks, restaurants, theatres, hotels, and automotive related businesses. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

The subject property is also located within the *Suburban Commercial* Character Area. This area will continue to grow as a regional retail center for the City and Hall County, but should diversify over time to include multi-family housing and a higher-density mix of retail, office, services and high-quality employment. In addition, expanding premium retail could offer a variety of shopping options that are currently not available elsewhere in the City. As it grows, the area will become one of the most prominent commercial corridors and gateways into the City, and a thriving economic anchor for the northwest side. When development occurs, adequate buffers should be maintained around development to protect watersheds and sensitive environments. Land uses allowed within the *Suburban Commercial* area include commercial, public / institutional, multi-family residential and mixed use.

(4) Are there substantial reasons why the property cannot or should not be used as currently zoned?

The subject property is zoned Office and Institutional (O-I) and General Business (G-B). The Office and Institutional (O-I) portion of property is larger and could be developed for office, medical and institutional purposes. The General Business (G-B) portion could be developed as a commercial outparcel fronting along Dawsonville Highway (S.R.53). As well, the General Business (G-B) rear portion of property contains an existing detention pond that was originally constructed for commercial purposes. Given the adjacent uses and commercial zoning, it appears the proposed rezoning request is reasonable.

(5) Will the proposed use cause an excessive or burdensome use of public facilities or services, including but not limited to streets, schools, water or sewer utilities, and police or fire protection?

The subject property and surrounding development currently utilizes City water and sewer services and there is sufficient capacity to serve the development.

Existing public safety services respond to the adjacent and nearby properties. Gainesville Fire Station #1 is located approximately 2.4 miles from the property. According to the Gainesville Police Department, increased traffic accidents from the additional cars on the Dawsonville Highway corridor are a primary concern.

No impacts to the school system are expected as the development is for non-residential purposes.

Additional traffic generated by the proposal or any new development will add to the existing peak hour delays experienced along Dawsonville Highway and nearby intersections. The applicant's traffic study proposes a full access driveway to include that a 300-foot long right turn lane be added northbound on Dawsonville Highway at the proposed site driveway, and a 150-foot long left turn lane be added westbound on the proposed site driveway. GDOT controls the existing driveway and intersection, and will review the applicant's access plan to determine what will be permissible given planned improvements to the corridor. Staff believes that inter-parcel access is necessary to help disperse traffic and to gain connection to the closest signalized intersections located at Academy Sports and Home Depot. In fact, the applicants own traffic study acknowledges that inter-parcel access would be beneficial.

(6) Is the proposed use supported by new or changing conditions not anticipated by the Comprehensive Plan or reflected in the existing zoning on the property or surrounding properties?

The anticipated use for the subject property is for non-residential purposes which is consistent with the Comprehensive Plan and the proposed grocery store.

The property is located between Dawsonville Highway and Lake Lanier, and is within one of Gainesville's most active regional commercial corridors. This area has experienced tremendous growth over the past 15 to 20 years, some of which include the Northlake Square shopping center, Carrington Park retail center, Village Shoppes of Gainesville, Home Depot, Best Buy, McEver Corners shopping center, Texas Roadhouse, Olive Garden, Cheddar's, Buffalo Wild Wings, child day care facility and a 94-room Holiday Inn Express currently under construction. In addition, a proposed 235± acres mixed-use development located to the north between Ahaluna Drive and to Sportsman Club Road was recently approved for a total of 860 age-restricted residential units, 56,000 square feet of commercial space and 24,000 square feet of retail/office/restaurant space. This development is anticipated to be built over the next 6 to 7 years.

(7) Does the proposed use reflect a reasonable balance between the promotion of the public health, safety, morality, or general welfare and the right to unrestricted use of property?

Due to the subject property's proximity to existing residential and commercial land uses, the proposed grocery store, with the recommended zoning conditions appears to promote a reasonable balance between the interests of the City, the property owner, and neighboring residents and property owners.

- ***Staff Recommendation***

The Planning Division staff is recommending **conditional approval** of this rezoning request with **G-B zoning**, based on the Comprehensive Plan and the adjacent residential and non-residential land uses.

Conditions

1. **The proposed grocery store building shall be generally consistent with the standards depicted on the architectural elevation provided with this rezoning application including exterior materials, roof and wall signs.**
2. **Prohibited commercial uses shall include motels or hotels with rooms accessed from the exterior of the building, adult novelty stores, adult entertainment centers, pawn shops, gas stations, tire stores, massage parlors except for practitioners licensed by the State of Georgia, vaping stores, auto body shops, automobile sale establishments, marine sales or repair stores, automated or non-automated car wash, coin-laundry facilities, truck stop, non-climate controlled mini-warehouses or storage facilities, tattoo parlors, psychics, fortune tellers, clairvoyants and the like.**
3. **The existing vegetated buffer areas adjacent to the Lakeshore Heights Subdivision shall remain undisturbed. Additional evergreen buffer trees shall be planted between the proposed building/parking lot/service areas and the existing detention pond at the top of the slope where needed. The intent of the buffer is to supplement the existing vegetation with buffer trees to provide for an effective**

buffer. The location, spacing, size and type of trees planted shall be subject to Community Development Department Director approval.

4. **Prior to a permit being issued, the developer/property owner shall exhaust all measures to provide for inter-parcel vehicular access with the adjacent properties located to the north and south. Documentation shall be provided to the City of Gainesville in this regard.**
5. **All access point design for the subject property shall require approval by the Georgia Department of Transportation in conjunction with the Gainesville Public Works Director. All required access/traffic/sidewalk improvements associated with the proposed development shall be at the full expense of the developer/property owner.**
6. **An updated as-built boundary survey/plat of the subject property, indicating all improvements required for the proposed use, shall be recorded prior to obtaining a Certificate of Occupancy.**

Gainesville Lidl – Project Narrative

The subject property was developed as a medical facility many years ago. The structures on the property have been demolished, and the property is currently vacant.

The property consists of 6.854 acres and is composed of two tax parcels, Tax Parcel 1115001002 being 4.594 acres, a portion of which is currently zoned O-I and a portion of which is currently zoned G-B, and Tax Parcel 1115001061 being 2.260 acres currently zoned G-B. The applicant requests the O-I zoned portion of Tax Parcel 1115001002 be rezoned to G-B which is compatible with its intended use as a Lidl Grocery Store. However, the rezoning request includes the entire 6.854 acres to consolidate the zoning classification of the entirety as G-B. The building is 35,926 square feet with 172 parking spaces and 2 loading spaces. Administrative variances will be needed to increase the allowable parking by 20% and to decrease the required number of loading spaces from 4 to 2. Public gravity sewer and water services are available at the site to serve the project. Stormwater detention and water quality treatment have already been provided within two existing detention ponds in the North Lake Square development to the north and east of the subject property.

The project driveway is an existing public stub street that intersects with Dawsonville Highway. It currently serves as the access point for Jackson EMC located to the south of the subject property. This driveway is full access non-signalized with an existing southbound left turn lane and a small north bound right turn lane. Preliminary discussions with Georgia Department of Transportation ("GDOT") have indicated that GDOT wants the existing right turn lane to be increased southwards to the next existing driveway.

The loading dock is located on the northeast end of the building. This dock area is recessed up to 4 feet below the finished grades. This site sits on top of a 40-foot high slope. The residential property behind the site is approximately 250 feet away. Evergreen vegetation will screen the truck well. If needed, a fence or screen wall may be used to further screen trucks.

Interparcel connectivity will exist with the Jackson EMC site to the south of the proposed Lidl site. However, Jackson EMC has its rear parking lot area gated and closed to the general public. Connectivity to the small outparcels in front of the site along Dawsonville Highway is not practical due to their site layout and the finished grade differences. Those parcels are approximately 10 feet higher that the proposed Lidl finished grades. Interparcel connectivity with the property to the north and west is also not practical due to the existing detention pond, large slopes, and retaining walls.

Lidl anticipates store hours will be from approximately 8:00 a.m. to 10:00 p.m. Lidl plans to employ approximately 25 to 50 employees for operation of the store.

A narrative about Lidl grocery stores from its website follows.

about us

High quality. Low prices. Hassle-free shopping that gets you in and out. A product assortment and store layout that's refreshingly simple, yet full of surprises to discover at every visit. Lidl is not your cookie-cutter grocery store. We're revolutionizing grocery shopping. We have a less complicated process that allows us to simply deliver low prices, high quality, and the best shopping experience for our customers. Here's how we do it:

- We're expert product curators. Instead of offering a myriad of brands in every category, our stores offer carefully curated selections that are top-quality and best-prices. So your precious time is not spent sifting through endless versions of products you don't want.
- You're busy. We get it. That's why we're masters of store efficiency. All our stores have the same intuitive layout, making it easier for you to find what you need quickly.
- We've partnered with local and regional farms and suppliers that meet our strict requirements. Every Lidl private label product you'll find in our stores is a result of a meticulous selection process, including quality testing. We're also continuing the Lidl tradition of offering new favorites from all over the world, keeping you looking forward to what you'll find next.
- You'll notice while shopping at Lidl that most of our assortment is our own private label - around 90% of our products, in fact. This means we've especially developed these products to match our high standards and allows us direct oversight of product integrity. Each product undergoes a rigorous testing regimen, which includes taste, quality and sensory testing.
- We're more than just food. We aim to surprise and delight our customers with a diversified product assortment that changes twice a week. You'll find anything from essentials for the home, such as small appliances or kitchen gadgets, to stylish gear for the whole family, to toys and power tools, to home décor and gardening supplies, and much more.
- We keep overhead to a minimum and eliminate any unnecessary costs. Take our "bring your own bag" policy. Not only does it mean we don't build the cost of bags into our prices, this policy also saves you time at the register and is a greener solution. Additionally, we display our products in custom boxes instead of replenishing and stocking item by item. Our associates simply replace the boxes as needed, saving hours every week on stocking shelves. These simple steps allow us to pass our savings on to you.

ours is a story eight decades in the making

Lidl is proud of our humble beginnings. In 1973, the first modern Lidl store opened in Ludwigshafen (25 miles south of Frankfurt). Employing 3 people and offering about 500 products, this small store was to become the foundation of Lidl's far-reaching expansion. During the 1990s we started branching outside of Germany and within a few years, we expanded all across Europe. Today, we operate over 10,000 stores in 27 countries. We have a history of cultivating relationships with local suppliers in each region to offer our customers high quality products at low prices. We've recently expanded to the United States and are striving to be a time-saving, life-enhancing grocery store where you love to shop. Here's a look at some of our milestones over the years:

1970s

Our first Lidl store opens in Germany 1973, employing three people and stocking around 500 product lines. By 1979 we open 6 more, taking our total to 30 stores.

1980s

We open 300 stores across Germany. On average each store employing seven people and stocking around 900 product lines.

1990s

We begin opening stores outside Germany, starting in France, and in 1994 we open our first UK store.

2000s

We firmly establish ourselves as a leading retailer in the UK.

2017

Lidl opens in the U.S.

principles and values

As an international company, we are aware of our size and public visibility. We respect the variety of cultures and recognize the diversity of their values and traditions. Our work is characterized by the following company principles:

- Customer satisfaction is our highest priority.
- Superior quality for the lowest price possible determines our position in the market.
- Our continued growth is determined by expansion and constant improvement in our stores.
- As an efficient company, we work according to defined processes and procedures.
- Our success is ensured by short decision paths and simple work processes.
- We grow through development and continuous improvement in our stores – we believe success is never final.
- In our daily activities we make sure to abide by the law and internal policies.
- We are an economically, socially and environmentally responsible company.
- Fairness to all in the company is imperative.
- We respect and encourage each other.
- Agreements are upheld in an atmosphere of trust.
- Recognition, acknowledgment and constructive feedback determine the operating environment in our daily work.
- We foster an environment for leadership growth to ensure continuous success.

SURVEY NOTES

1) PROPERTY SHOWN HEREON WAS SURVEYED JUNE 8, 2017.

2) THE FIELD DATA UPON WHICH THIS PLAT IS BASED HAS A CLOSURE OF 1' IN 53,695' WITH AN ANGULAR ERROR OF 03 SECONDS PER ANGLE POINT AND WAS ADJUSTED USING THE LEAST SQUARES METHOD.

3) AO TPCON GTP–3005 LW TOTAL STATION, SR GPS RECEIVER, AND CARLSON SURVEYOR+ DATA COLLECTOR WERE USED FOR FIELD SURVEY MEASUREMENTS.

4) THIS PLAT HAS A MAP CLOSURE OF 1' IN 1,564,910'.

5) SAID DESCRIBED PROPERTY IS LOCATED WITHIN AN AREA HAVING A ZONE DESIGNATION X ON FLOOD INSURANCE RATE MAP NO. 13139C0186F, WITH A DATE OF IDENTIFICATION OF SEPTEMBER 29, 2006 FOR COMMUNITY NUMBER 130263, IN CITY OF GAINESVILLE, STATE OF GEORGIA, WHICH IS THE CURRENT FLOOD INSURANCE RATE MAP FOR THE COMMUNITY IN WHICH SAID PROPERTY IS SITUATED.

6) CONTROL AND BEARING BASIS FOR THIS SURVEY WERE ESTABLISHED USING A TOPCON HIPER SR GPS RECEIVER UTILIZING NETWORK RTK CORRECTIONS PROVIDED BY THE REAL TIME NETWORK OPERATED BY EARL DUDLEY. THE RELATIVE POSITIONAL ACCURACY, AS CALCULATED ACCORDING TO THE FEDERAL GEOGRAPHIC DATA COMMITTEE PART 3: NATIONAL STANDARD FOR SPATIAL DATA ACCURACY, IS .05 FEET HORIZONTAL AND .07 FEET VERTICAL AT THE 95% CONFIDENCE LEVEL.

7) UTILITIES SHOWN PER MARKINGS PLACED BY UTILITY–MARKING, L.L.C.. UTILITIES OTHER THAN THOSE SHOWN HEREON MAY EXIST. LOWERY & ASSOCIATES MAKES NO GUARANTEE AS TO THE EXISTENCE OR NON–EXISTENCE OF SAID UTILITIES.

8) NO OBSERVED EVIDENCE OF CEMETERIES, GRAVESITES, AND/OR BURIAL GROUNDS AT TIME OF SURVEY.

9) PROPERTY SHOWN HEREON LIES WITHIN THE RECORD DESCRIPTION AS STATED IN GENERAL WARRANTY DEED RECORDED IN DEED BOOK 4446, PAGE 128 AND DEED BOOK 7685, PAGE 367, HALL COUNTY RECORDS.

10) THIS DESCRIBES THE SAME PROPERTY AS DESCRIBED IN FIRST AMERICAN TITLE INSURANCE COMPANY COMMITMENT NO:P001188/HB303.015, DATED APRIL 15, 2017.

11) NO ENCROACHMENTS OTHER THAN THOSE SHOWN HEREON WERE OBSERVABLE AT TIME OF SURVEY.

12) AT THE TIME OF THE SURVEY, THERE WAS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, BUILDING CONSTRUCTION OR BUILDING ADDITIONS.

13) AT THE TIME OF THE SURVEY THERE WERE NO PROPOSED CHANGES IN STREET RIGHT OF WAY LINES OR OBSERVABLE EVIDENCE OF STREET OR SIDEWALK REPAIRS.

14) AT THE TIME OF THE SURVEY, THERE WAS NO OBSERVABLE EVIDENCE OF THE SITE BEING USED AS A SOLID WASTE DUMP, SUMP OR SANITARY LANDFILL.

List of Tables

1. INTRODUCTION

1.1. Study Area

This traffic study was conducted to evaluate the traffic impacts of a proposed development for a grocery store located in Gainesville, Georgia. The proposed site is located to the east of SR 53/Dawsonville Highway, just north of the intersection of SR 53/Dawsonville Highway and SR 53/McEver Road. The proposed lot for the site is currently undeveloped, but the proposed site driveway is existing and currently serves light traffic from Jackson Electric Membership Corporation (Jackson EMC). Figure 1 illustrates the location of the site and identifies the roadway network in the vicinity.

1.2. Proposed Development

The proposed development will consist of a 35.962 square foot grocery store. Figure 2 illustrates the proposed site plan. The grocery store is expected to be built out in 2018. The site will have one access point: a full access driveway onto SR 53/Dawsonville Highway just north of the intersection of SR 53/Dawsonville Highway and SR 53/McEver Road.

1.3. Methodology

Initial evaluations were made to assess the current conditions within the vicinity of the development. AM and PM peak period turning movement counts (TMC) were conducted on Thursday, May 25, 2017, at the following two intersections:

1. SR 53/Dawsonville Highway and Site Driveway
2. SR 53/Dawsonville Highway and SR 53/McEver Road

The traffic counts are contained in Appendix A.

The traffic growth rate was obtained from the following six nearby GDOT traffic counters, which provide historical count data in the area:

- 1390258, SR 53/Dawsonville Highway and Shallowford Road
- 1390269, SR 53/Dawsonville Highway and Marina Road
- 1390274, SR 53/McEver Road and SR 53/Dawsonville Highway
- 1390647, Shallowford Road and Pearl Nix Parkway
- 1390707, Pearl Nix Parkway and Shallowford Road

Using traffic count data since the year 2010, a growth rate was developed using linear regression. The traffic growth rate was applied to the existing volumes to estimate the traffic that will exist at the build-out year of the site if the proposed development is not developed.

Estimates were made of the traffic that will be generated by the proposed development. The generated trips were reduced to account for pass-by traffic. The adjusted new trips were then distributed and assigned to the road network.

The distribution of these new trips was based on the existing traffic patterns. The pass-by traffic was distributed and assigned to the site driveway based on the peak hour traffic patterns. After the generated traffic for the development was distributed and assigned, it was then superimposed with the future background traffic to provide an estimate of projected traffic that would be present during the year when the development is complete.

Capacity analysis was used to evaluate the Existing Year 2017, Future Background Year 2018, and Future with Project Year 2018 conditions for the intersections being studied.

1.4. Planned Transportation Improvements

As part of the proposed development, as shown on the site plan, a 300-foot long right turn lane will be added northbound on SR 53/Dawsonville Highway at the proposed Site Driveway. In addition to the 300-foot long right turn lane on SR 53/Dawsonville Highway, a 150-foot long left turn lane will be added westbound on the proposed Site Driveway.

The site plan along with the planned transportation improvements are shown in Figure 2.

PROJECT SITE	6.852	298,453	27,729

PRELIMINARY SITE PLAN NOTES:
- THIS SITE PLAN, BEING PRELIMINARY IN NATURE DOES NOT GUARANTEE THAT ALL REQUIREMENTS FOR ZONING ISSUES, NOR STORM DRAINAGE, GRADING, UTILITY EASEMENTS, AND THE LIKE ARE PROPERLY ADDRESSED AT THIS TIME. THE ABOVE REQUIREMENTS CAN AFFECT THE LAYOUT OF THE SITE.
- THIS SITE PLAN IS BASED ON GIS DATA.
- PARKING FIELDS AND RATIOS ARE PRELIMINARY.
- ALL REQUIREMENTS ASSUMED WITH THIS LAYOUT ARE TENTATIVE AND SUBJECT TO CHANGE AS MAY BE DIRECTED BY THE ARCHITECT, LANDLORD, OR ANY OF THE GOVERNMENTAL AGENCIES. FURTHER REVIEW OF THE SITE AS PART OF THE DUE DILIGENCE EVALUATION WILL BE NECESSARY AND MAY IMPACT THE LAYOUT. ACQUISITION OF AN ALTA AND TOPOGRAPHIC SURVEY ARE RECOMMENDED PRIOR TO MOVING FORWARD.
- SITE ACCESS SHOWN IS PRELIMINARY, FURTHER INVESTIGATION IS REQUIRED.
- ZONING CODE HAS NOT BEEN EVALUATED FOR ALL SITE RESTRICTIONS.

2. EXISTING CONDITIONS

2.1. Roadways

SR 53/Dawsonville Highway is a four-lane median divided highway that runs primarily north-south and serves heavy commercial development within the vicinity of the site. SR 53/Dawsonville Highway is classified as an Urban Principal Arterial and has a posted speed limit of 45 mph within the vicinity of the site. At the intersection of Dawsonville Highway and McEver Road, SR 53 turns southwest from Dawsonville Highway onto McEver Road. On Dawsonville Highway south of McEver Road, the highway is signed as SR 53 Connector.

SR 53/McEver Road is a four-lane median divided highway that runs primarily east-west and serves industrial and heavy commercial development within the vicinity of the site. McEver Road is classified as an Urban Principal Arterial and has a posted speed limit of 45 mph. McEver Road originates as Peachtree Industrial Boulevard in Gwinnett County at the intersection with Holcomb Bridge Road, and becomes McEver Road at the Hall County line.

SR 53 originates at the Alabama state line and travels primarily east through Georgia's rural and mountainous regions in the northwest and northern portions of the state. SR 53 intersects US 19/SR 400 in Dawsonville and continues east through Forsyth County, before finally entering Hall County via the Chestatee River and making the southwest turn onto McEver Road. SR 53 then proceeds in a southerly and southeasterly direction toward the Athens area, where it terminates at its intersection with SR 15 in downtown Watkinsville.

SR 53 Connector runs east from McEver Road into downtown Gainesville, running in common with SR 60 beginning at its intersection with Jesse Jewell Parkway. SR 53 Connector terminates at its interchange with Interstate 985.

2.2. Intersections

The following two intersections were identified to be studied:

1. SR 53/Dawsonville Highway and Site Driveway (unsignalized)
2. SR 53/Dawsonville Highway and SR 53/McEver Road (signalized)

Existing geometry and traffic operation control of the existing intersections were inventoried. Traffic signal timing data for the intersection of SR 53/Dawsonville Highway and SR 53/McEver Road are contained in Appendix B. Figure 3 illustrates the associated geometry and operation control of the study intersections. The proposed lanes at the site driveway represent exclusive lanes, and not disallowed movements in the existing condition.

2.3. Existing Traffic Flow Patterns

Existing TMC data were collected on Thursday, May 25, 2017, for the study intersections. Figure 4 illustrates the collected turning movement volumes for the AM and PM peak hours.

Figure 3 – Existing and Proposed Lane Configurations and Traffic Control

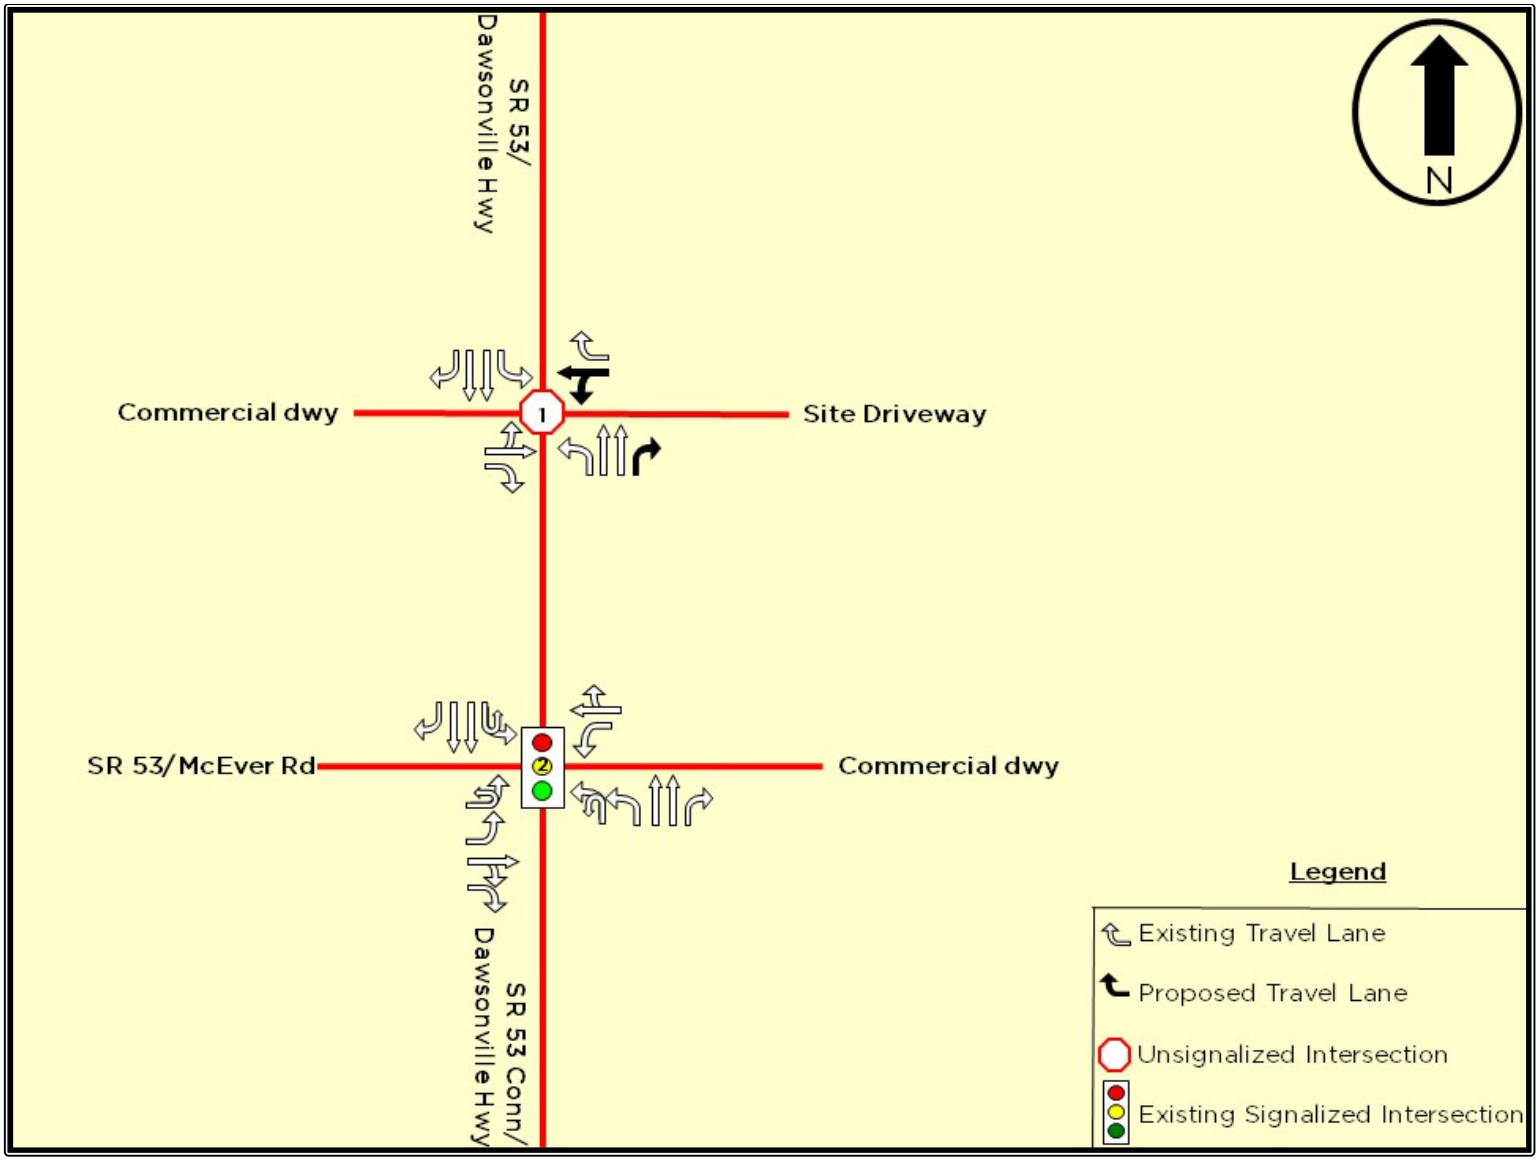

Figure 4 – Existing Peak Hour Volumes

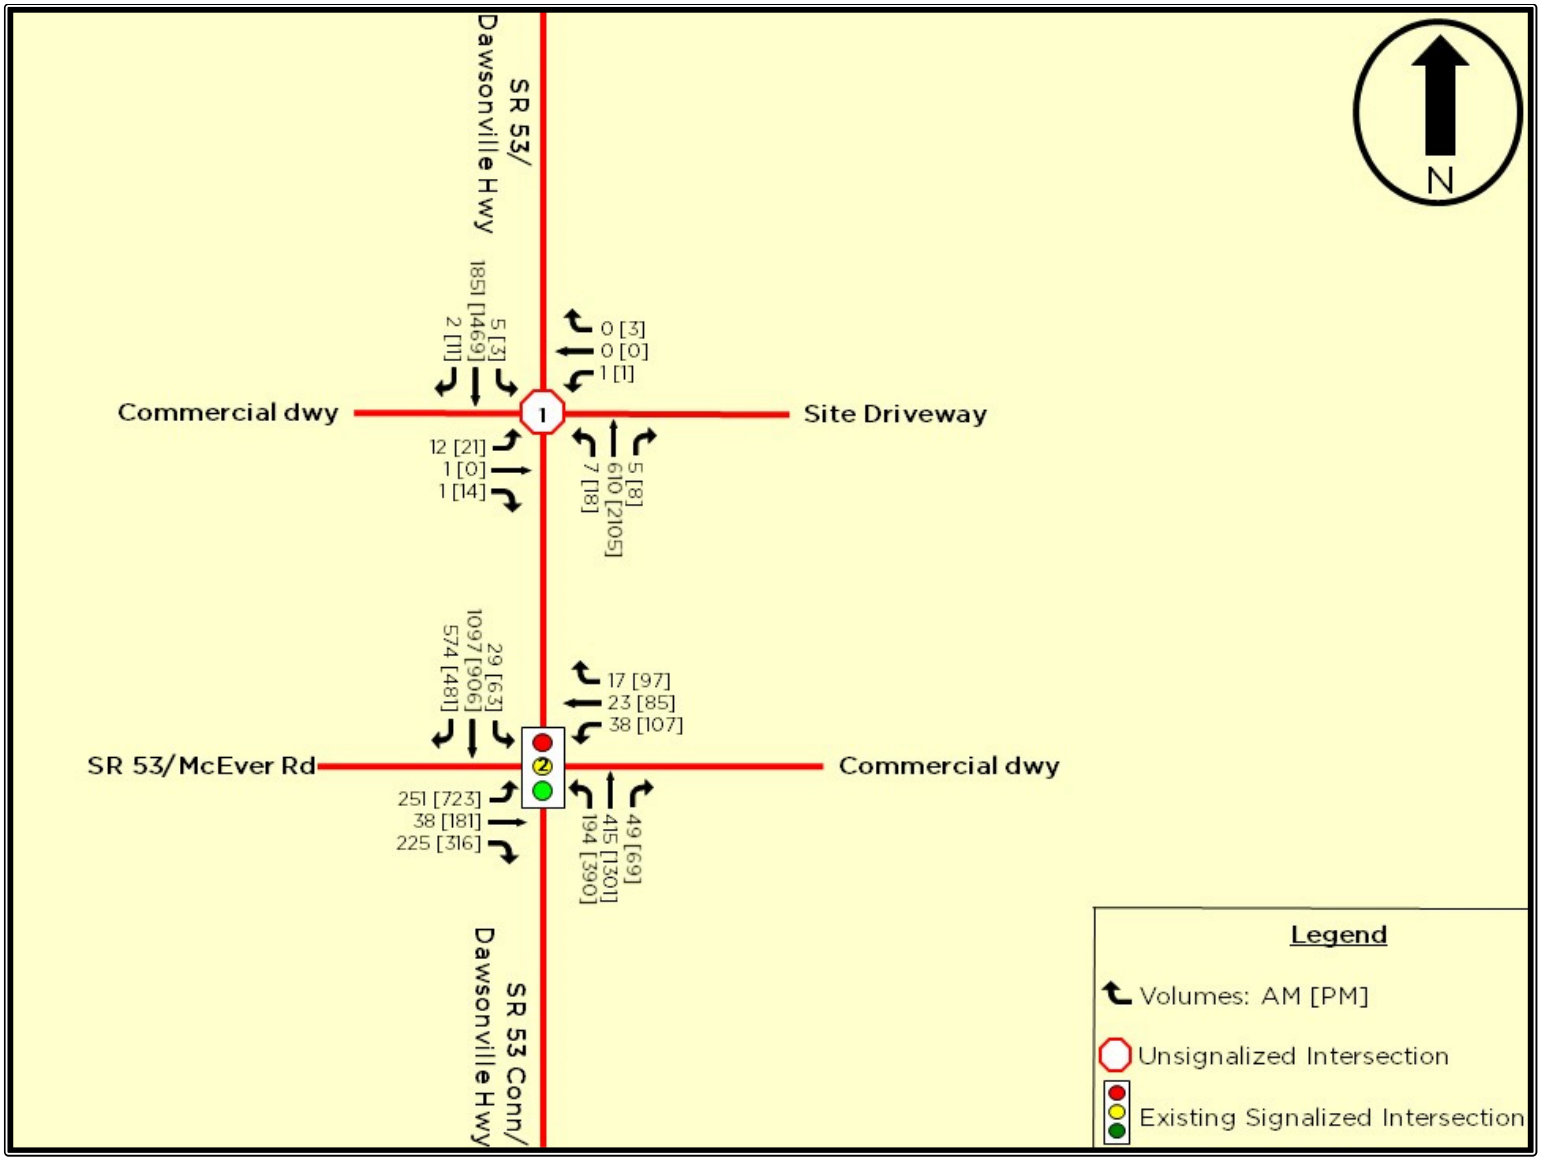

3. TRAFFIC PROJECTIONS

3.1. Future Background Traffic

The grocery store anticipates opening in 2018. Using traffic count data since the year 2010, a growth rate of 2.0% was developed using linear regression. This traffic growth rate was applied to the Existing Year 2017 volumes to estimate the traffic that will exist at the build-out year 2018 of the site if the proposed development is not developed. Figure 5 shows the Future Background Year 2018 peak hour volumes.

3.2. Trip Generation

The amount of traffic to be generated by the proposed development was estimated by using trip rates observed at other similar developments. The widely recognized publication from the Institute of Transportation Engineers (ITE), *Trip Generation 9th Edition* (1), contains trip rates summarized by type of development. The ITE data provide trip rates that can be applied to the size of a development to derive trip generation projections. The ITE Code 850 – Supermarket was used for the proposed LIDL.

3.3. Trip Adjustment Strategies

Not all trips entering and exiting the development result in new traffic being added to the road system. A portion of the trips will be attracted into the site from the traffic streams that were already passing by on the adjacent streets. Pass-by trips can represent a significant portion of the trips entering and exiting a commercial site. There are data that can be used to quantify the magnitude of pass-by trips provided in ITE's *Trip Generation*.

The *Trip Generation* shows a weekday PM peak period pass-by rate for ITE Code 850 – Supermarket of 36%. The pass-by rates were checked to assure that the pass-by trips did not exceed 15% of the adjacent street volume. Pass-by trips are always included in the site driveway movements. Pass-by trips are subtracted from the through volumes passing a given site driveway.

Table 1 shows application of the trip generation and the trip adjustment strategies for Future with Project Year 2018. The resulting trip projections are provided in terms of both daily traffic and each of the peak hours.

*Table 1 – **Trip Generation***

ITE Category	ITE Code	Size	Unit	Daily			AM Peak Hour			PM Peak Hour		
				Total	In	Out	Total	In	Out	Total	In	Out
Supermarket	850	35.962	ksf	3,799	1,900	1,899	122	76	46	365	186	179
Pass-by Trips	36% PM			1,368	684	684				132	67	65
New Trips				2,431	1,216	1,215	122	76	46	233	119	114

3.4. Trip Distribution for New Trips

After the magnitude of generated trips has been established, it is then necessary to determine the routing of the new trips. The trip distribution for the new trips was based on the existing traffic patterns from the AM and PM peak period counts. There is substantial commercial development on SR 53/Dawsonville Highway and SR 53/McEver Road within the vicinity of the site; therefore, using the existing traffic patterns is appropriate. Table 2 summarizes the distribution percentages.

*Table 2 – **Summary of New Trip Distribution Percentages***

ROADWAY	PERCENT OF TOTAL NEW TRIPS
SR 53/Dawsonville Highway from the north	55%
SR 53 Connector/Dawsonville Highway from the south	27%
SR 53/McEver Road from the west	18%
TOTAL	100%

This distribution was then used for the assignment of new trips for the grocery store.

3.5. Assignment of Generated Traffic Volumes

The number of new and pass-by trips at the study intersections were determined using the trip generation and distribution already discussed.

The total volume adjustments at the study intersections from the new trips and the pass-by trips for Future with Project Year 2018 conditions are shown in Figure 6.

The total volume adjustments were superimposed with the Future Background Year 2018 volumes from Figure 5 to represent the projected Future with Project Year 2018 volumes after the development is complete. Figure 7 shows expected final volumes for Future with Project Year 2018 conditions.

Figure 5 – Future Background Year 2018 Peak Hour Volumes

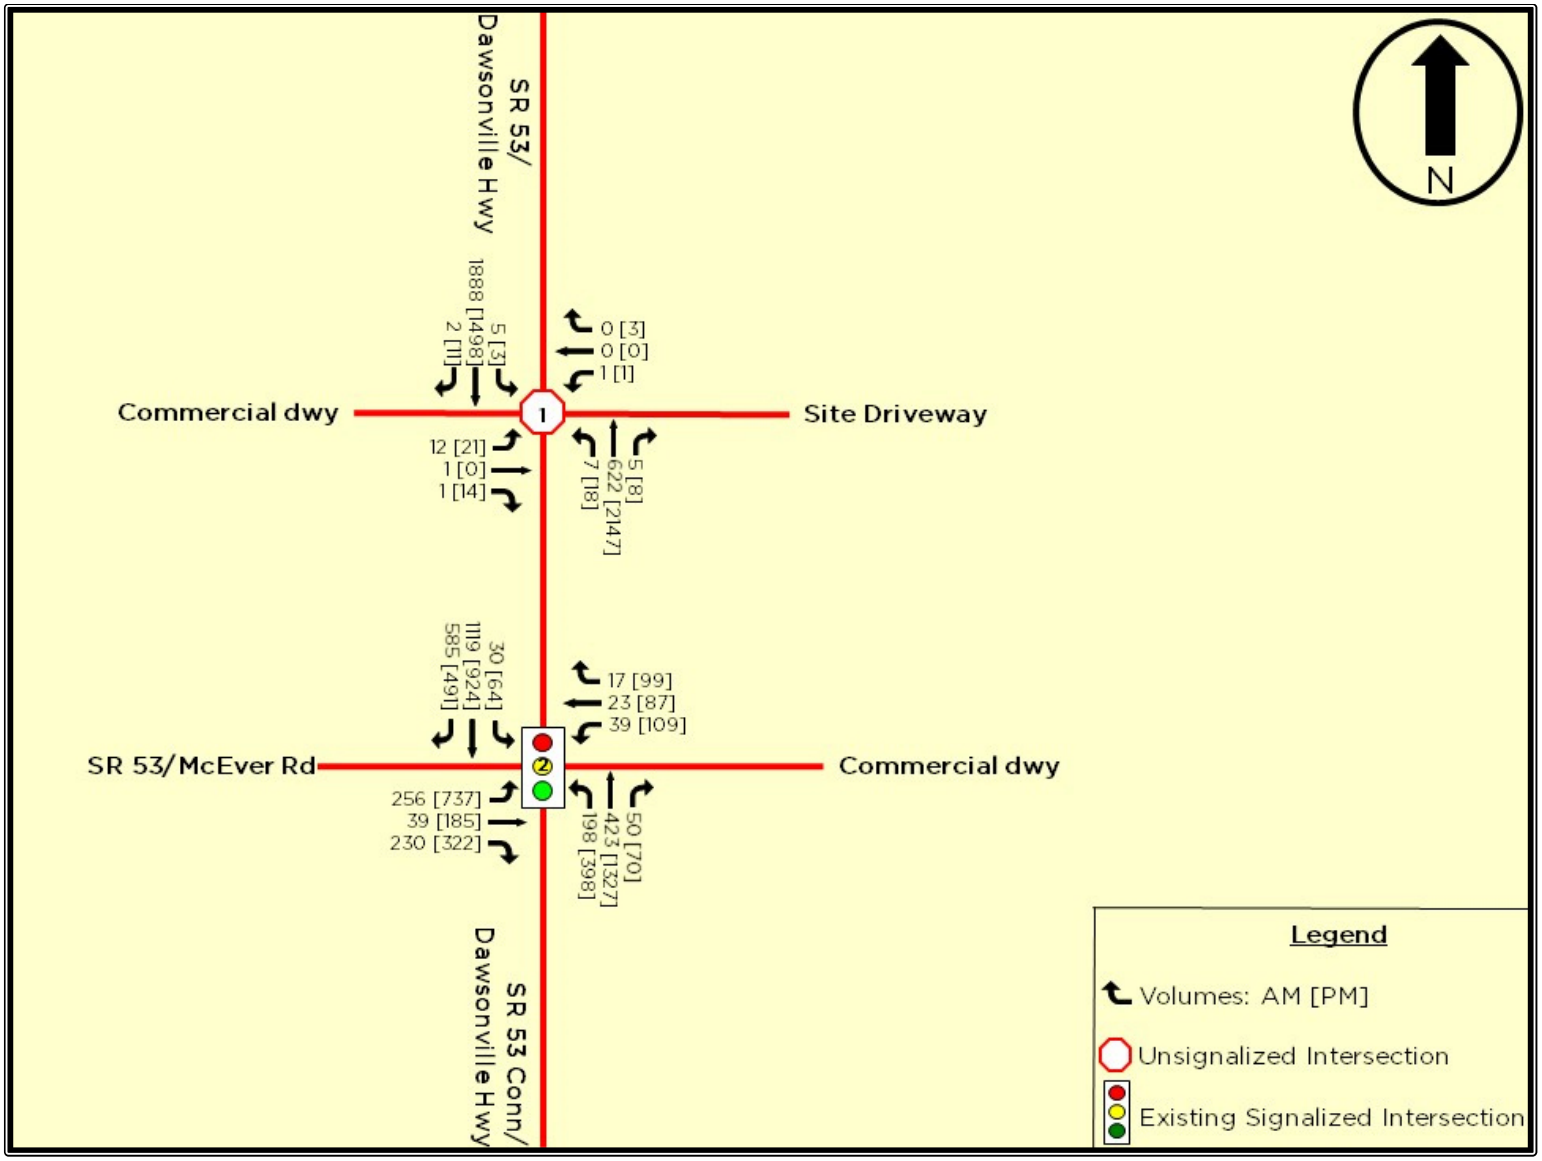

Figure 6 – Total Peak Hour Volume Adjustment for Future with Project Year 2018

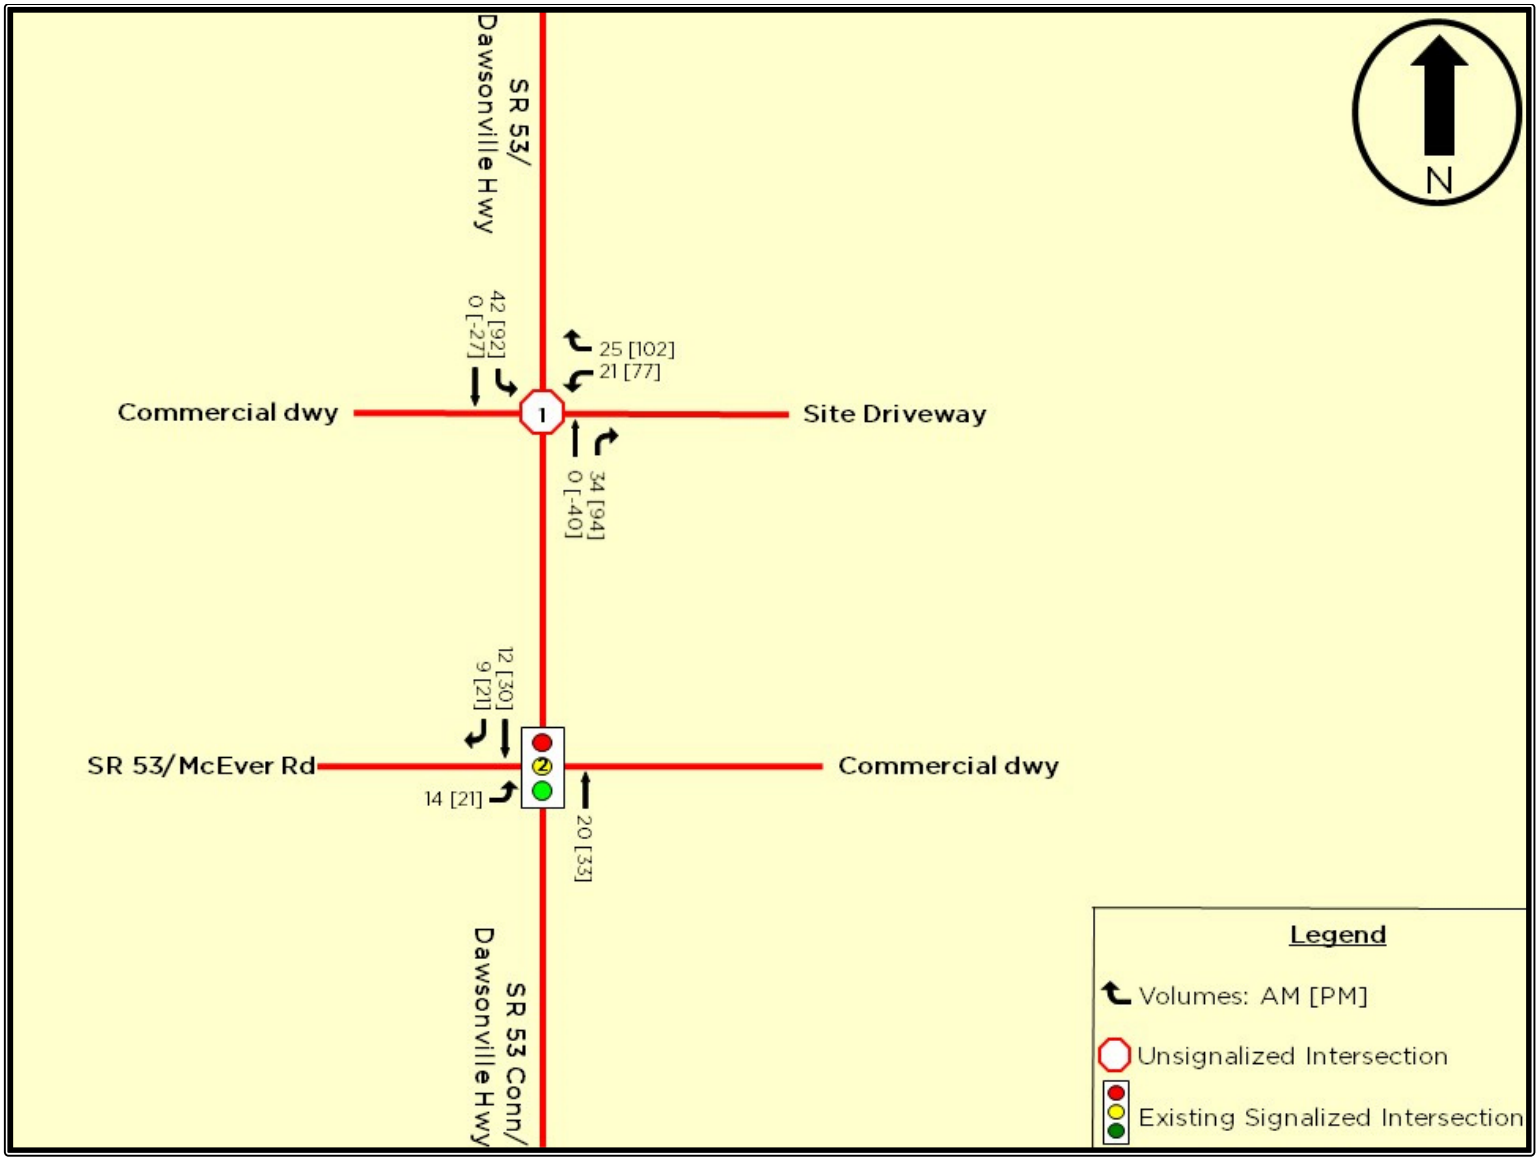

Figure 7 – Future with Project Year 2018 Peak Hour Volumes

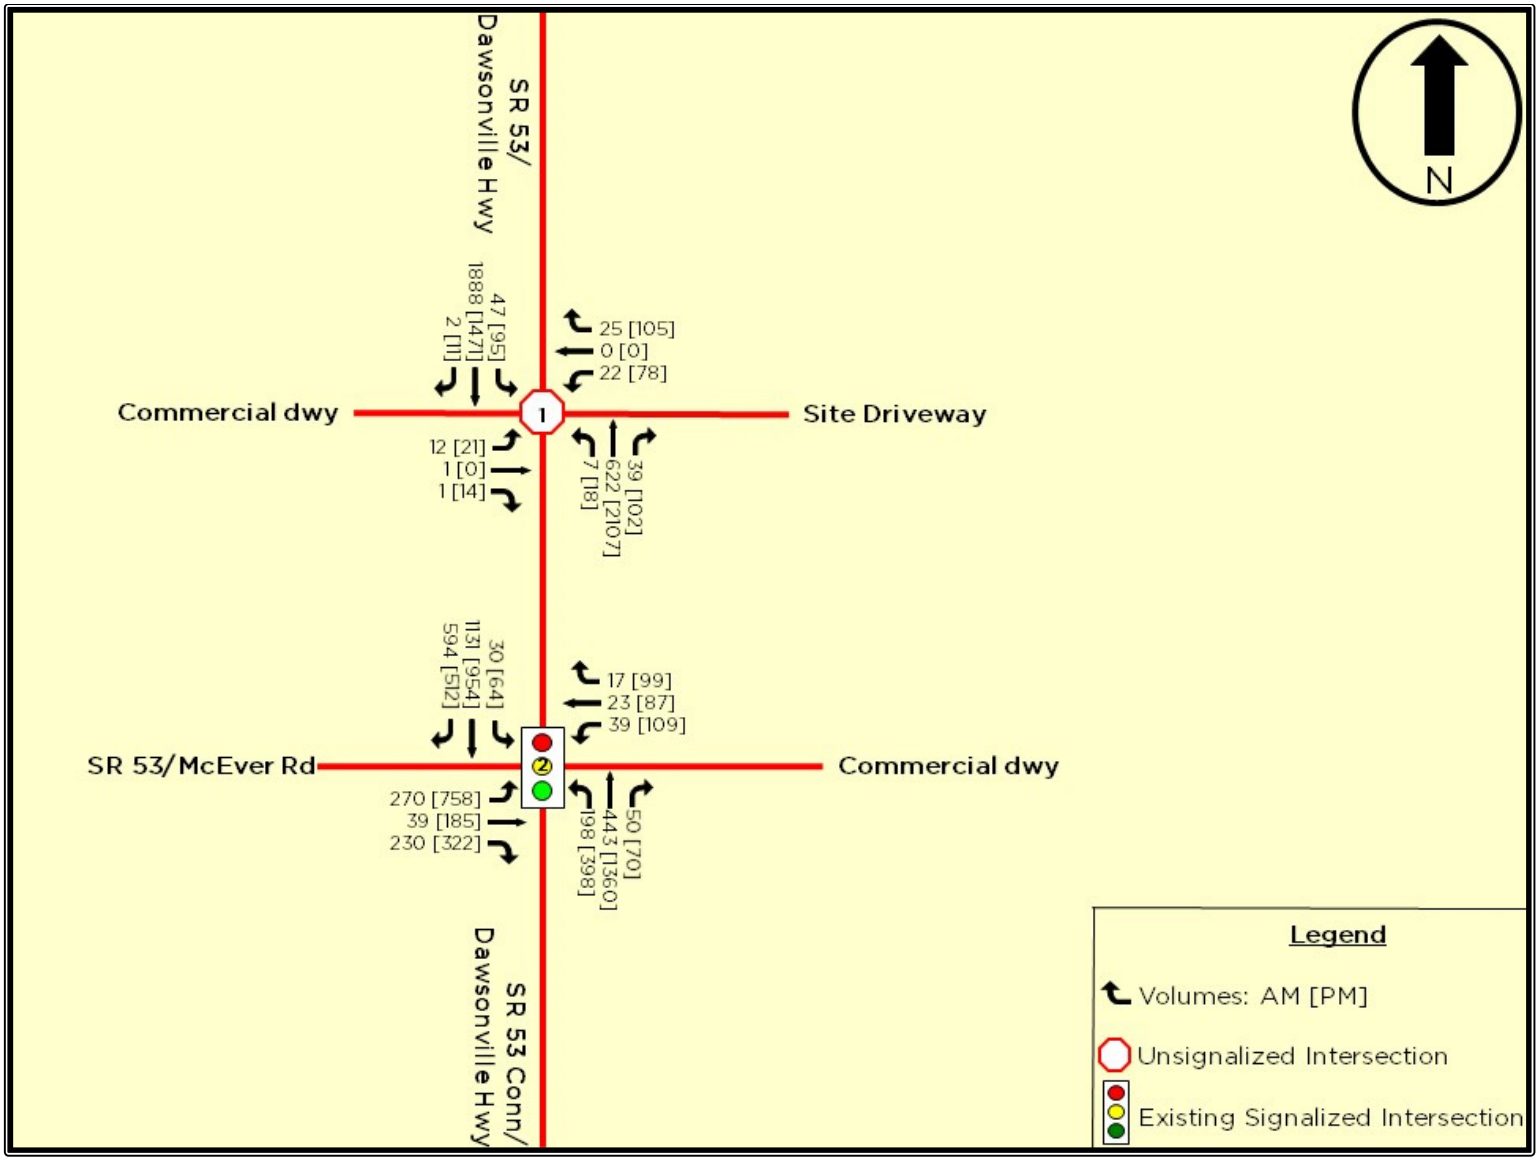

4. DATA ANALYSIS

4.1. Level of Service Criteria

In order to quantify the impacts of the additional traffic and to determine any needed roadway and/or operational improvements, the existing and projected conditions were evaluated with traffic capacity analysis techniques. *Synchro* (1) was used to conduct capacity analysis. *Synchro* implements the capacity methods of the *Highway Capacity Manual* (HCM) (2) for performing the industry standard evaluation of intersection performance. Delays used in the reports follow the procedure as recommended by the HCM. The HCM defines Level of Service (LOS) in terms of the amount of control delay, including initial deceleration delay, queue move-up time, stopped delay, and final acceleration delay.

The LOS definitions for both stop sign controlled intersections and traffic signal controlled intersections are provided in Table 1.

Table 3 – Level of Service Criteria

LEVEL OF SERVICE	CONTROL DELAY PER VEHICLE (SEC)	
	WITH STOP SIGN	WITH TRAFFIC SIGNAL
A	≤ 10	≤ 10
B	> 10 and ≤ 15	> 10 and ≤ 20
C	> 15 and ≤ 25	> 20 and ≤ 35
D	> 25 and ≤ 35	> 35 and ≤ 55
E	> 35 and ≤ 50	> 55 and ≤ 80
F	> 50	> 80

Source: *Highway Capacity Manual*

GDOT has ranges of adequate LOS based on area classification. Rural, sparsely developed areas have a minimum LOS requirement of C. This is due to the expectancy of rural residents for relatively uncongested conditions and design flexibility related to lower right of way costs. The minimum LOS for urban areas is D. This reflects the greater acceptance of delay and congestion by urban residents. Additionally, the increased density of developments makes right of way costs much higher in urban areas. The Dawsonville Highway project corridor is in the Atlanta metro area and, therefore, has a minimum LOS requirement of D.

Capacity analysis was used to evaluate the Existing Year 2017, Future Background Year 2018, and Future with Project Year 2018 conditions for the intersections being studied. For Existing Year 2017 and Future Background Year 2018, the existing lane configurations and traffic control were used. For Future with Project Year 2018, the lane configurations shown on the site plan were used. Table 4 shows the resulting analysis during the AM and PM peak hours. *Synchro* printouts are contained in Appendix C.

*Table 4 – **Results of Capacity Analysis***

4.2. Intersection Capacity Analysis Results

The following movements and intersections are currently operating inadequately and are expected to continue to operate inadequately for Future Background Year 2018 conditions:

- The eastbound shared left+through movement at SR 53/Dawsonville Highway and the Site Driveway during both peak hours,
- The westbound movement at SR 53/Dawsonville Highway and the Site Driveway during both peak hours, and
- The overall intersection of SR 53/Dawsonville Highway and SR 53/McEver Road during the PM peak hour.

For Future with Project 2018 conditions, both the eastbound shared left+through movement and the proposed westbound shared left+through movement at the intersection of SR 53/Dawsonville Highway and the Site Driveway are expected to operate inadequately during both peak hours. However, conditions at both approaches are currently operating inadequately, before the project traffic is taken into consideration. The proposed westbound right turn movement is expected to operate inadequately during the PM peak hour; however, it is merely LOS E instead of LOS F. A traffic signal could potentially mitigate this condition at this intersection, but based upon the data collected, a traffic signal installation at this location appears unlikely based upon the forecasted peak hour westbound left turn volumes from the Site Driveway and GDOT regulations concerning traffic signal spacing. Due to the expected heavy delay for the westbound left turn movement from the Site Driveway, users are unlikely to attempt this movement during the peak hours. With the proposed lane configurations and traffic control, users desiring to head south on SR 53/Dawsonville Highway likely would perform a westbound right turn movement from the Site Driveway and make a U-turn at the next available median opening to the north. However, it may be possible to explore options concerning inter-parcel connectivity with surrounding establishments to treat the westbound left turn movement and provide mitigated access to SR 53/Dawsonville Highway southbound.

For Future with Project 2018 conditions, the overall intersection of SR 53/Dawsonville Highway and SR 53/McEver Road is expected to operate inadequately during the PM peak hour. However, conditions at this intersection are currently inadequate, before the project traffic is taken into consideration. There do not seem to be any further feasible improvements at this intersection that would significantly mitigate this condition.

The 95th percentile queue lengths (the queue would be expected to be this length or shorter 95% of the time) for each intersection during both peak hours can be seen in Table 5. *Synchro* was used to obtain the queue lengths. At the Site Driveway, during the PM peak hour, the 95th percentile queue length of the westbound shared left+through movement is longer than the proposed westbound left turn lane length of 150 feet shown on the site plan. It does not seem feasible for this left turn to be lengthened any farther.

All turn bays must exceed the queue lengths or meet minimum deceleration criteria as stipulated by GDOT, whichever is longer, unless geometrically infeasible. See GDOT standards and details for bay taper and deceleration lengths.

Table 5 – Queue Lengths

5. CONCLUSIONS

This traffic study was conducted to evaluate the traffic impacts of a proposed development for a grocery store located in Gainesville, Georgia. The proposed site is located to the east of SR 53/Dawsonville Highway, just north of the intersection of SR 53/Dawsonville Highway and SR 53/McEver Road. The proposed lot for the site is currently undeveloped, but the proposed site driveway is existing and currently serves light traffic from Jackson Electric Membership Corporation (Jackson EMC). The grocery store is expected to be built out in 2018. The site will have one access point: a full access driveway onto SR 53/Dawsonville Highway just north of the intersection of SR 53/Dawsonville Highway and SR 53/McEver Road.

As part of the proposed development, as shown on the site plan, a 300-foot long right turn lane will be added northbound on SR 53/Dawsonville Highway at the proposed Site Driveway. In addition to the 300-foot long right turn lane on SR 53/Dawsonville Highway, a 150-foot long left turn lane will be added westbound on the proposed Site Driveway.

The following movements and intersections are currently operating inadequately and are expected to continue to operate inadequately for Future Background Year 2018 conditions:

- The eastbound shared left+through movement at SR 53/Dawsonville Highway and the Site Driveway during both peak hours,
- The westbound movement at SR 53/Dawsonville Highway and the Site Driveway during both peak hours, and
- The overall intersection of SR 53/Dawsonville Highway and SR 53/McEver Road during the PM peak hour.

For Future with Project 2018 conditions, both the eastbound shared left+through movement and the proposed westbound shared left+through movement at the intersection of SR 53/Dawsonville Highway and the Site Driveway are expected to operate inadequately during both peak hours. However, conditions at both approaches are currently operating inadequately, before the project traffic is taken into consideration. The proposed westbound right turn movement is expected to operate inadequately during the PM peak hour; however, it is merely LOS E instead of LOS F. A traffic signal could potentially mitigate this condition at this intersection, but based upon the data collected, a traffic signal installation at this location appears unlikely based upon the forecasted peak hour westbound left turn volumes from the Site Driveway and GDOT regulations concerning traffic signal spacing. Due to the expected heavy delay for the westbound left turn movement from the Site Driveway, users are unlikely to attempt this movement during the peak hours. With the proposed lane configurations and traffic control, users desiring to head south on SR 53/Dawsonville Highway likely would perform a westbound right turn movement from the Site Driveway and make a U-turn at the next available median opening to the north. However, it may be possible to explore options concerning inter-parcel connectivity with surrounding establishments to treat the westbound left turn movement and provide mitigated access to SR 53/Dawsonville Highway southbound.

For Future with Project 2018 conditions, the overall intersection of SR 53/Dawsonville Highway and SR 53/McEver Road is expected to operate inadequately during the PM peak hour. However, conditions at this intersection are currently inadequate, before the project traffic is taken into consideration. There do not seem to be any further feasible improvements at this intersection that would significantly mitigate this condition.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

CITY OF GAINESVILLE

AGENDAREQUEST

Date Submitted: 7/18/2017

Presenter: Matt Tate

Item of Business: Request from **JH Homes, Inc.** to rezone a 21.87± acres tract located on the east side of South Enota Drive, having frontage on Smokey Mountain Springs Lane and Pearce Way (a/k/a **1024, 1030 and 1037 Pearce Way NE; 0 South Enota Drive NE**) from Office and Institutional (O-I) to Residential-II (R-II).
Ward Number: Two
Tax Parcel Number(s): 01-083-001-005, 151, 152 and 153
Request: 65 residential townhomes

Meeting Date: 8/8/2017

Purpose of Request:
The applicant is proposing to rezone the subject property for 65 residential townhomes. The property was previously rezoned in 2003 for medical and professional offices. The proposed townhomes will contain two car garages and the exterior materials of the units will consist of brick, cement siding board and batten shake. The conceptual design of the townhome community provides access from Pearce Way and Smokey Mountain Springs Lane and includes as many as 14 buildings containing three to six townhome units per building. The property contains no structures but includes all of Pearce Way and a portion of Smokey Mountain Springs Lane which are intended to be dedicated to the City of Gainesville. The property is located within the Limestone Parkway Overlay Zone and the surrounding uses include medical offices, Smokey Springs Retirement apartment homes, CVS Pharmacy, First Presbyterian Church and single-family homes.

GAINESVILLE PLANNING and APPEALS BOARD
STAFF RECOMMENDATION

Applicant ..... JH Homes, Inc.

Property Owner..... Pearce Associates, LTD

Location..... 1024, 1030 and 1037 Pearce Way NE;
0 South Enota Drive NE

Request..... Rezone from O-I to R-II

Size ..... 21.87± acres

Ward..... Two

Proposed Use..... Residential townhomes

Planning Division Staff Recommendation ..... **Approval, with conditions**

Date..... August 8, 2017

- ***Applicant's Proposal and Background Information***

The applicant is proposing to rezone the subject property from Office and Institutional (O-I) to Residential-II (R-II) for 65 residential townhomes. In 2003, the subject tract was rezoned for medical and professional offices and has remained in its current condition since 2010. The property consists of four undeveloped parcels, all of Pearce Way and a portion of Smokey Mountain Springs Way, which are intended to be dedicated to the City of Gainesville.

The conceptual design of the townhome community includes as many as 14 buildings containing three to six townhome units per building. Each townhome will be a minimum of 24-feet wide with two car garages. The exterior materials of the townhomes will consist of brick fronts with the remaining portion to be made up of cement siding board and batten shake to meet the requirements of the Limestone Parkway Overlay Zone standards. According to the applicant, the anticipated price for each unit will start in the low $200K range. Access is proposed from Pearce Way and Smokey Mountain Springs Lane to South Enota Drive. The rear portion of the property is partially located within a flood plain area and within a Georgia Power easement which will remain as a natural buffer area adjacent to The Woodlands on Lake Brenau Subdivision.

- ***Adjacent Land Use and Zoning***

Location	Use	Zoning
North	CVS Pharmacy; Future O'Reilly Auto Parts; Georgia Power substation	Office and Institutional (O-I) Neighborhood Business (N-B) Residential-I (R-I)
South	Smokey Springs Retirement Community; First Presbyterian Church	Planned Unit Development (P-U-D) Residential-I (R-I)
East	The Woodlands on Lake Brenau Sub.; Single-family homes	Planned Unit Development (P-U-D)
West	Single-family homes; Dermatology Associates; Northeast Georgia Physicians Group; Arthritis Center of North Georgia	Residential-I (R-I) Office and Institutional (O-I)

- ***Other Departmental Comments***

According to the Public Works Department, solid waste pick up will be provided by the City of Gainesville.

- ***Zoning History***

The following zoning actions have taken place in the immediate area during the last ten years:

2017 – A request by Hanh My Thi Doan for a special use within Office and Institutional (O-I) on a $0.52^{\pm}$ acre tract located at 502 South Enota Drive for a nail salon was denied.

2016 – A request by O'Reilly Automotive Stores, Inc. to rezone a $1.29^{\pm}$ acre tract located at 1446 Park Hill Drive from Office and Institutional (O-I) to Neighborhood Business (N-B) for an auto parts store was approved with conditions.

2016 – A request by Andrew Hothem to rezone a $0.48^{\pm}$ acre tract located at 1490 Park Hill Drive from Residential-I (R-I) to Residential-II (R-II) for a two-family residence was approved with conditions.

2014 – A request by Beehive Homes of Gainesville to rezone a $2.0^{\pm}$ acre tract located at 1351 Park Hill Drive from Residential-I (R-I) to Residential-II (R-II) for an assisted living facility was approved with conditions.

2013 – A request by Ketan / Gopalji Patel to rezone a $1.26^{\pm}$ acre tract located at 1572, 1582 and 1586 Park Hill Drive from Residential-II (R-II) and Office and Institutional (O-I) to General Business (G-B) for a professional office and commercial use was approved with conditions.

2012 – A request by The Atlanta Botanical Garden, Inc. to amend existing Planned Unit Development (P-U-D) zoning located at 351 Lake Hill Drive for a Woodland / Botanical Garden was approved with conditions.

- ***Staff Analysis***

(1) Is the proposed use suitable in view of the zoning and development of adjacent and nearby property?

The subject property is surrounded by a mixture of residential, institutional, office and commercial uses which are zoned Residential-I (R-I), Planned Unit Development (P-U-D), Office and Institutional (O-I) and Neighborhood Business (N-B). The proposed townhome community would serve as a transitional use between the adjacent office and residential uses and will provide for a type of housing that is not currently available within the surrounding area.

(2) Will the proposed use adversely affect the existing use or usability of adjacent or nearby property?

The property is undeveloped except for existing road and utility infrastructure. There is a significant natural buffer area that will remain adjacent to The Woodlands on Lake Brenau subdivision. There should be limited adverse impacts created by the development; however, the adjacent medical office uses and senior retirement apartment community located off of Smokey Mountain Springs Way / Pearce Way would be impacted most by the proposal. The proposed townhomes will produce additional traffic and parking needs. The adjacent medical offices currently utilize Pearce Way during normal business hours for employee parking needs.

(3) Is the proposed use compatible with the purpose and intent of the Comprehensive Plan?

The proposal appears to be consistent with the Comprehensive Plan. The development is within density range (2.97 dwelling units per acre), and is conducive given its proximity to a mixture of residential and non-residential uses.

The Gainesville 2030 Future Development Map for the City of Gainesville places the subject property within the *Mixed Use General* land use category. This category includes areas containing or planned for a mixture of land uses including office, neighborhood retail, and residential. As well, the rear portion of the property that is shown to remain undeveloped is located within the *Parks / Recreation / Conservation* land use category. This category includes areas containing or planned for parks and recreation facilities, permanently designated open space, and conservation areas, including buffers along water ways and other environmental features.

According to the Character Area map for the City of Gainesville, the subject property is located within the Traditional Neighborhoods Character Area specifically within the Northern Neighborhoods subarea. The vision for this area anticipates minimal change, and primary issues within this subarea include incompatible infill development and the threat of encroaching urban sprawl. The traditional neighborhoods should have a range of housing that meets the needs of different household types, sizes and incomes. Land uses allowed in the Northern Neighborhoods subarea include low-density and medium-density residential, and mixed-use / commercial.

(4) Are there substantial reasons why the property cannot or should not be used as currently zoned?

The subject property is zoned for professional office purposes and has remained in its current state for over 7 years. The subject property is zoned Office and Institutional (O-I) which is primarily intended for a variety of professional offices, institutions, and public offices not involving the sale, wholesale, storage, or processing of merchandise. Multi-family residences or townhome uses require special use approval. The applicant is proposing to downzone the property to a zoning of Residential-II (R-II) for the proposed use.

(5) Will the proposed use cause an excessive or burdensome use of public facilities or services, including but not limited to streets, schools, water or sewer utilities, and police or fire protection?

The proposal should have minimal impacts to the existing public facilities. City water and public safety services are currently provided to the property. Gainesville Fire Station #2 is located off of Holly Drive and is approximately 1.6± miles from the subject property.

The 65-unit townhome community is not proposed as an age restricted community and therefore will have some minimal impacts to the school system depending on the final number of two and three bedroom units proposed.

As stated previously, the proposal will increase traffic along Smokey Mountain Springs Way / Pearce Way at its intersection with South Enota Drive. According to the “Trip Generation Manual” as published by the Institute of Transportation Engineers, the proposed use on average would generate 380± new trips per day, 29± A.M. peak hour trips and 35± P.M. peak hour trips.

(6) Is the proposed use supported by new or changing conditions not anticipated by the Comprehensive Plan or reflected in the existing zoning on the property or surrounding properties?

Property near the intersection of Park Hill Drive and South Enota Drive has experienced steady professional office, medical office and neighborhood retail growth within the last 20 years. The proposal would provide for in-town, housing that could serve nearby employment centers including Northeast Georgia Medical Center. While the adjacent property has functioned as small mixed use development, the subject property has remained stagnant for many years.

(7) Does the proposed use reflect a reasonable balance between the promotion of the public health, safety, morality, or general welfare and the right to unrestricted use of property?

Due to the Comprehensive Land Use Plan and the mixture of surrounding uses, the proposed rezoning request appears to reflect a reasonable balance between the promotion of the public health, safety, morality, or general welfare and the right to unrestricted use of property.

- ***Staff Recommendation***

The Planning Division staff is recommending **conditional approval** of this rezoning request based on the Comprehensive Plan and the mixture of residential and non-residential uses.

Conditions

1. **The use of the property shall be limited to a maximum of 65 residential townhome or condominium units. Apartments are not an approved use for the property.**
2. **The proposed residential townhomes shall be generally consistent with the standards depicted on the architectural elevation provided with this rezoning application including exterior materials, pitched roofs and two car garages.**
3. **No direct access shall be allowed from South Enota Drive or Woodland Way.**
4. **All access point design and sidewalk installation along Pearce Way and Smokey Mountain Springs Way must be reviewed and approved by the Gainesville Public Works Director. All required access/traffic/sidewalk improvements associated with the proposed development shall be at the full expense of the developer / property owner.**
5. **In addition to the driveway and garage parking provided for each townhome unit, a minimum of 10 guest parking spaces shall be provided within the proposed development. The final location of the guest parking spaces shall be determined by the Gainesville Public Works Director.**
6. **The property frontage along South Enota Drive shall be landscaped and maintained according to the requirement of Article 9-16 of the Gainesville Unified Land Development Code.**
7. **The existing vegetated buffer areas adjacent to Smokey Springs Retirement Community, The Woodlands on Lake Brenau, CVS and the Georgia Power substation shall be retained where possible. Additional evergreen buffer trees shall be planted within the perimeter buffer areas and adjacent to detention pond areas where**

needed. The intent of the buffer is to supplement the existing vegetation with buffer trees to provide for an effective buffer. The number, location, spacing, size and type of trees planted shall be subject to Community Development Department Director approval.

8. **An updated as-built boundary survey/plat of the subject property, indicating all improvements required for the proposed use, shall be recorded prior to obtaining a Certificate of Occupancy.**

NARRATIVE

The subject Property is currently zoned O&I. The purpose of this application is to rezone the reference property to Town Homes. This site consists of 21.87 +/-, which will be subdivided into 65 Town home lots

Site:

The site is located on South Enota Drive and South of State Route 129 within one mile of the Northeast Georgia Medical Center. This 21.87 acre site falls inside the Limestone Corridors and will be planned to follow all applicable requirements. The site adjoins Select Commercial (SC) and Georgia Power Company on the north, Office Professional (OP) lots and Gainesville Retirement Resources LLC (PRD) to the west, the old Brenau Lake and Residential (R1) to the South and the Woodland on Lake Brenau (PRD) to the East.

Buildings:

Townhomes to be constructed primarily of brick fronts with remaining portion to be made up of cement siding, board and batten and shake. 2 car garage with a minimum width of 24 ft.

Signage:

Proposed signed to be installed at the intersection of Pearce Way and Smoky Mountain Springs Ln. Sing to be constructed of Brick.

Lighting:

Proposed lighting to be city standards.

Water & Sewer:

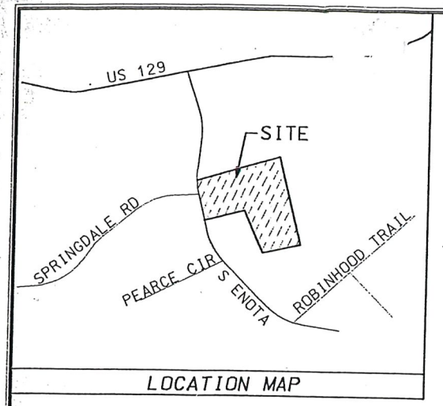
The City of Gainesville to service water and sewer.

Buffers and Landscaping:

The site consist of existing natural buffer to exist on the North, East and South property. Proposed buffer of 974 to be similar to 961.

Streets:

All proposed streets to be constructed to City of Gainesville standards.



LOCATION MAP

LEGAL DESCRIPTION

All that tract or parcel of land lying in or being in Land Lots 132 & 138, 9th District Hall County, Georgia being more particulary described as follows:
Beginning at a ¾" C.T.P.F. (Crimp Top Pin Found) on the Northerly R/W (Right-of-Way) of South Enota Drive being an 80' R/W said point being 322.91 feet plus or minus from R/W Monument of US Highway 129.
THENCE North 44 degrees 28 minutes 14 seconds East for a distance of 45.63 feet leaving the R/W of South Enota Drive along the Property line of now or formerly CVS GA, LLC
THENCE North 44 degrees 12 minutes 59 seconds East for a distance of 152.48 feet to a ½" R.B.F. (Rebar Found)
THENCE North 64 degrees 04 minutes 01 seconds East for a distance of 280.82 feet to a ½" R.B.F. (Rebar Found)
THENCE North 57 degrees 32 minutes 45 seconds East for a distance of 72.89 feet to a 2" C.T.P.F.
THENCE North 60 degrees 00 minutes 00 seconds East for a distance of 519.59 feet along the Property line of now or formerly Georgia Power Company to a ½" R.B.F.
THENCE South 40 degrees 23 minutes 53 seconds East for a distance of 918.43 feet along the Property line of now or formerly The Woodlands on Lake Brenau to a ½" R.B.F.
THENCE North 49 degrees 36 minutes 06 seconds East for a distance of 46.60 feet to a ½" R.B.F. (Rebar Found) at 50 R/W of Woodland Way.
THENCE 10.40 feet along an Arc having a Chord Bearing of South 06 degrees 25 minutes 38 seconds West with a Radius of 15 feet to a point at 50 R/W of Woodland Way.
THENCE 77.49 feet along an Arc having a Chord Bearing of South 18 degrees 06 minutes 59 seconds West with a Radius of 50 feet to a point at 50 R/W of Woodland Way.
THENCE South 11 degrees 40 minutes 26 seconds East for a distance of 157.95 feet along the Property line of now or formerly The Woodlands on Lake Brenau to a ½" R.B.F.
THENCE South 45 degrees 58 minutes 10 seconds East for a distance of 144.71 feet to a ½" R.B.F. (Rebar Found)

The Redbud Project A Model for Green Space Conservation

July 27, 2017

Department of Community Development

Planning and Appeal Board

Subject: Proposed 22 acre townhouse project on South Enota

How will rainfall be managed on the 22 acre South Enota development site? The first priority must be to keep most rainfall on site using various green infrastructure techniques. Can the site accommodate 65 housing units?

In the past, standard practice has been to install storm sewer systems to carry rainfall off site. Now the preferred alternative is to keep rainfall on site where it falls, using green infrastructure (natural drainage paths, rain gardens and permeable paving). You are no doubt working with JH Homes on ways to keep rainfall on site. For example,

1) Locate most of the 14 buildings along the narrow swath of forest around the site perimeter, with rooftop runoff oriented toward the forest;
2) Build rain gardens along driveways and parking areas. Rain gardens may be marginally more costly than other landscaping; that cost is offset by lower maintenance over time and greater visual appeal to home buyers. Permeable paving is another option.

Complying with tightening state environmental regulations, cleaning runoff into Lake Lanier, easing the burden of maintaining our aging storm sewer system, maintaining expected quality of life for a growing population, and ensuring that long run economic growth is sustainable all require that keeping rainfall on development sites is a first priority.

Thomas H. Rasmussen
