Motion seconded by Board Member White

**Vote – 6 favor, 1 absent (Delgado)**

**OLD BUSINESS**

**NEW BUSINESS**

**A. Annexation Requests**

- 1) Request from **Koch Foods of Gainesville, LLC** to annex a 0.572± acre tract located on the northwest side of the intersection of Industrial Boulevard and Mitchell Street (a/k/a **966 Industrial Boulevard**) and to establish zoning as Heavy Industrial (H-I).

Ward Number: Four

Tax Parcel Number(s): 00-050-001-007

Request: Poultry processing plant expansion

**Staff Presentation:** Deputy Director Matt Tate gave the following staff presentation:

The applicant is proposing to annex a 0.572± acre tract with a zoning of Heavy Industrial (H-I) and to rezone a 0.55± acre tract from Residential-II (R-II) to Heavy Industrial (H-I). The intent is to bring the subject property and the adjacent property owned by Koch Foods under on jurisdiction with a zoning of Heavy Industrial (H-I) in the city. The surrounding uses include mostly heavy industrial poultry processing uses and the Melrose Apartments (Public Housing) to the north. The adjacent Good News at Noon property was recently purchased by the applicant as part plant expansion. Good News at Noon has begun the process of building a new facility at the corner of Dorsey Street and Pearl Nix Parkway less than a half mile from the current site. The 0.572± acre subject property is zoned Heavy Industrial (I-II) in the County and is part of an existing unincorporated county island currently being used for truck parking for Koch Foods. The 0.55± acre subject property is zoned R-II and consists of three parcels and a small strip of right-of-way. Presently, the property contains part of a parking lot and a duplex rental home that will be demolished as part of the redevelopment. The applicant intends to redevelop the entire 10.0± acres campus owned by Koch Foods for a new poultry

processing plant which includes all of Mitchell Street. The existing facility is approximately 74,000 square feet in size and the new facility will range from approximately 170,000 to 183,000 square feet in size. The new facility includes space for poultry processing, freezer, office, employee and truck parking. Driveway access will be provided for delivery trucks off of Industrial Boulevard and Davis Street which is designed to better separate truck and employee parking off of Davis Street.

It is staff's opinion the proposal is consistent with the Comprehensive Plan. The subject property is located within the *Industrial* land use category and the Economic Development Gateways character area. This category includes areas containing or planned for a wide range of office, business, light industrial, manufacturing, transportation research and development uses.

The Planning Division staff is recommending **conditional approval** of the annexation and rezoning request based on the Comprehensive Plan and the adjacent industrial uses.

**Applicant Presentation:** William Fasulo, 4703 Hiawatha Drive, stated the goal is to build a state-of-the-art facility to do business, the current location is land-locked. Mr. Fasulo said the plan is to build the new facility and vacate the current one.

**FAVOR:** None

**OPPOSE:** None

**PLANNING AND APPEALS BOARD COMMENTS:** None

**There was a motion to recommend conditional approval of the annexation request with a zoning of Heavy Industrial (H-I).**

**Conditions**

1. All access point design for the subject property shall require review and approval by the Gainesville Public Works Department Director. All required access/traffic/sidewalk improvements associated with the proposal shall be at the full expense of the property owner.
2. The proposed redevelopment of the subject property shall meet the Gainesville Unified Land Development Code standards including but not limited to access, parking, stormwater, landscaping, fencing and signage.
3. An updated as-built survey/plat combining the subject property and adjacent properties owned by applicant shall be required.

Motion made by Board Member Thompson

Motion seconded by Board Member Martin

**Vote – 6 favor, 1 absent (Delgado)**

- 2) Request from the **Atlanta Botanical Garden, Inc.** to annex a total of 17.032± acres to include a 10.237± acres tract located on the northwest side of the intersections of Lake Hill Drive and Randall Street and Lake Hill Drive and Gary Street; and a 6.795± acres tract located on the west side of the cul-de-sac of Barrett Street, having road frontage on the north side of Riverbend Circle (a/k/a **115 Barrett Street, 102, 104 and 106 Gary Street;**

**213, 301, 303 and 305 Lake Hill Drive; 0, 100, 101, 102, 103, 104, 105, 106, 107, 109 and 111 Randall Street; 0 Riverbend Circle)** and to establish zoning as Planned Unit Development (P-U-D).

Ward Number: Two

Tax Parcel Number(s): 00-093-001-003A, 005, 020, 021, 022, 023, 027, 028, 029, 030, 031, 032, 033, 034, 035, 036, 037, 038, 039, and 040

Request: Atlanta Botanical Garden expansion

**Staff Presentation:** Deputy Director Matt Tate gave the following staff presentation:

The Atlanta Botanical Garden is proposing to annex 17.032± acres and rezone 20.695± acres with a zoning of Planned Unit Development (P-U-D). The properties are located west of Cleveland Highway and the surrounding uses include property owned by the Atlanta Botanical Gardens, single-family homes, apartments and various office, retail and services off of Cleveland Highway. The parcels to be annexed are part of a larger unincorporated island zoned Residential-I (R-I) in Hall County which includes 18 parcels totaling 10.2± acres and all of Gary Street and part of Randall Street just west of Lake Hill Drive. The second tract to be annexed includes two parcels totaling 6.8± acres located at the end of Barrett Street and on the northside of Riverbend Circle. The properties to be rezoned consist of a 13.6± acres tract zoned General Business (G-B) located on the west side of Lake Hill Drive and a 7.0± acres tract zoned Residential-II (R-II) located at the end of Roper Hill Road. The intent is to combine all of the properties with the adjacent 167.99± acres ABG campus which was originally annexed in 2003. Presently, the existing Atlanta Botanical Gardens campus includes a 2,000 seat amphitheater, visitor center, greenhouse, numerous gardens, exhibits and parking. The proposal includes previously approved uses/facilities and additional parking, access and a 30,000 square foot future event center. As well, the long term plan includes providing access to Roper Hill Road.

It is staff's opinion the proposal is consistent with the Comprehensive Plan. The subject property is located both within the *Parks/Recreation/Conservation* land use category and the *Low- Medium Density Residential* land use category and within the *Limestone Medical Corridor* character area and the *Traditional Neighborhoods* character area which supports parks and recreation facilities, permanently designated open space, and conservation areas, including buffers also along waterways and other environmental features.

The Planning Division staff is recommending **conditional approval** of the annexation and rezoning request based on the Comprehensive Plan and the adjacent mixture of uses.

**Applicant Presentation:** **Bradley Dunckel**, Rochester & Associates, 425 Oak Street stated also present is Art Fix from Atlanta Botanical Garden and they will be glad to answer any questions.

**OPPOSE:** **Alex Mathes** 1532 Enota Avenue, stated he lives in the Cry Creek subdivision on the eastern portion of the 168 acres which backs up to the alternative access area. He said after researching online for information, read the applicant's narrative and believes it seemed to be recycled from phase one of the original Botanical Garden and offered no specific information as to the future plans of the alternative access, specifically the 7.07 acres to be rezoned. Mr. Mathes requested the applicant provide information regarding rezoning area which is on the back of his property, is very steep, rugged and are two perennial streams that flows directly into Cry Creek. He said that he hopes the applicant will be requesting stream variances from EPD for any type of construction over the streams. Mr. Mathes hopes the applicant will reduce the footprint and understands they are a membership driven

conservation organization and generate an enormous amount of money, and hopes they do their due diligence. Also, he hopes they work with adjacent land owners to minimize disturbance such as a gated road, install nighttime lights so there are no illuminating lights in his back yard, and hopes the gardens will be forthcoming and transparent about potential future uses. He stated it is a large tract close to the city of Gainesville, Lake Lanier and residential areas, needs a fence enclosure to keep out deer and large mammals. He stated concern for large mammals being pushed out into adjacent neighborhoods and possible a strike hazard onto Highway 129 causing risk to the public. He stated to recap he hopes the applicant to be more forthcoming of proposed actions.

**Alison Toller**, 1531 Enota Avenue, stated she lives on the cul-de-sac of the property to be rezoned and reason for purchasing her house was it is on a quiet and protected street, one street subdivision and near Enota Elementary School. She said the Botanical Gardens is behind her property and understood would likely always remain green space and more reason to buy the property. Mrs. Toller's concern was the rezoned property and creating a road, bringing a public area into their backyard, and the use of the road has not been disclosed. She said currently there is only deer and kids playing in the back yard. Mrs. Toller's request is to deny the rezoning request 7.07 acres or table until there are more specific plans such as traffic level, what it might look like and could have a realistic expectation as to the road and purpose of it, if it would be heavily traveled. She said it is not in keeping with the neighborhood and has concerns of devaluation of their property.

**PLANNING AND APPEALS BOARD COMMENTS:** Chairman Carter stated the property to be rezoned is currently zoned R-II which is multi-family zoning in the City of Gainesville and could allow for apartments to be placed on the property. Chairman Carter stated the concerns were Cry Creek, potential road/sidewalk, streams, EPD, stream variances, gates and lights were some of them.

**REBUTTAL: Mr. Dunckel** stated changing from a master plan to a land development permit plan some details will be addressed and worked out at that time. He stated there are aware of stream buffers which will be avoided and will put the road at a minimal 75-feet away from the property line that forms the back of Mr. Mathes property. He said there might be topography challenges and understands the road will only be used for event situations giving a back access for some of the traffic in the other direction. He stated there are no plans to further develop the green space, bulk of the property and the organization is conservation and education focused. Mr. Dunckel believes the purchase of the properties will allow the botanical garden to place the parking in an area that has been previously developed either partially or fully developed before. He said they are trying to avoid any large scale disturbance like a parking lot into the main area of the garden.

**Art Fix**, 1345 Piedmont Road, stated he is the Atlanta Botanical Garden Chief Operating Officer and the plan is incorporation into the city and have the same zoning classification. Mr. Fix said the vision short-term and long-term is to provide approximately 300 parking spaces in the first phase. He stated the second phase would include an additional 300 spaces on the northern section where houses are currently located and provide close to 700 parking spaces total. He said the amphitheater holds approximately 2,000 people so should allow sufficient quantity to allow access to the venue with egress using Lake Hill Road, parking will be closed off from Lake Hill Road at the entrance drive. He said the parking will be closed off from Lake Hill during normal hours but only used as egress during concert activity. Mr. Fix said the normal traffic flow will continue to be Sweetbay Drive, the main entrance. He stated at some point in time, they might consider an eatable garden/children's garden to teach about plants

which could be ten to fifteen years from now. He said Rochester & Associates did include some of those elements for the big picture and to think ahead but not in the short-term plan.

**There was a motion to recommend conditional approval of the annexation request with a zoning of Planned Unit Development (P-U-D).**

**Conditions**

1. The development plan and architectural plan for the proposed access, parking lot and event center must be reviewed and approved by the Community and Economic Development Director prior to the issuance of a permit.
2. A Uniform Sign Plan as identified within Section 9-18-7-4 of the Unified Land Development Code shall be required from the developer and is subject to approval by the Community and Economic Development Director. All signs shall be located outside of utility areas and shall not block visibility of vehicular traffic.
3. The proposed parking, event center and all other facilities within the subject property shall be sufficiently screened from the adjacent residential uses. The vegetated buffer areas shall be a minimum of 50-foot wide and the location, size and type of vegetation shall be approved by the Community and Economic Development Director.
4. All access point design for the subject property shall require review and approval by the Gainesville Public Works Department Director in conjunction with the Georgia Department of Transportation if required. All required access/traffic/sidewalk improvements associated with the proposal shall be at the full expense of the property owner/applicant. There shall be no vehicular access allowed from Barrett Street or Riverbend Circle.
5. An updated as-built survey/plat combining the subject property and adjacent properties owned by applicant shall be required.

Motion made by Board Member Martin

Motion seconded by Board Member White

**Vote – 6 favor, 1 absent (Delgado)**

- 3) Request from **Caballero Holdings, LLC** to annex a total of 140.77± acres to include a 44.91± acres tract located at the northeast side of the terminus of Floyd Road; a 80.8± acres tract located on the north side of Eberhart Cemetery Road; a 9.467± acres tract, 4.397± acres tract and a 1.996± acres tract located southwest of the intersection of Jesse Jewell Parkway and Old Cornelia Highway (a/k/a **0 Eberhart Cemetery Road; 2465 Floyd Road, SE; 2166, 2170 and 2210 Old Cornelia Highway**) and to establish zoning as Planned Unit Development (P-U-D).

Ward Number: Three

Request: Master planned mixed-use development

**Meeting Date:** 12/14/2021

---

**Purpose of Request:**

The applicant is proposing to annex a 140.77± acres tract with a zoning of Planned Unit Development (P-U-D) for a mixed-use community. The property includes 5 parcels which are zoned Agricultural Residential-IV (AR-IV), Agricultural Residential-III (AR-III) and Residential-II (R-II) within the County.

The proposed development known as "Gainesville Township" will include a total of 1,122 acres, 1,414 single-family detached homes, 311 townhomes, 640 multi-family units and up to 75,000 square feet of commercial space. The residential uses include single-family homes ranging from a minimum of 1,200 to 1,800 square feet; townhomes ranging from a minimum of 1,100 to 1,400 square feet; and multi-family. The development will contain a variety of different housing types and sizes and price points for all ages. A variety of community amenities are planned and 645± acres will remain as open space. Two points of access are proposed from Old Cornelia Highway. The primary access will be from the new road serving the future "The Coop" Athletic Complex. All streets that are not gated are intended to be maintained by the City. Solid waste pick-up will be provided by the City.

The property is located within the North Oconee Water Supply Watershed Protection Overlay Zone. The surrounding uses include undeveloped land, the future Melvin Cooper "The Coop" Athletic Complex, single-family homes, church, gas station, package store, Rabbit Town Café, Avita Behavioral Health Facility and White Sulphur Elementary School.

**History/Background:**

This request was tabled at the November 9, 2021 PAB meeting at the request of the applicant.

**Facts & Issues for Consideration:**

**Department Recommendation:**

Planning staff recommended approval with twenty-one conditions. See the Staff Recommendation report for details.

**GAINESVILLE PLANNING and APPEALS BOARD  
STAFF RECOMMENDATION**

**Applicant** ..... Caballero Holdings, LLC  
**Property Owners** ..... Gainesville Vision, LLC  
**Location** ..... 0 Eberhart Cemetery Road; 2465 Floyd Road, SE; 2166, 2170 and 2210 Old Cornelia Highway; 0, 2490 and 2544 Floyd Road, SE; 0 Lenox Drive, SE; 0 Old Cornelia Highway, SE  
**Request** ..... Annex with P-U-D zoning  
 Amend existing P-U-D zoning  
**Total Acres** ..... Annexation: 140.77± acres  
 P-U-D Zoning Amendment: 981.661± acres  
**Ward** ..... Three  
**Proposed Use** ..... Master planned mixed-use community  
**Planning Division Staff Recommendation** ..... **Approval, with conditions**  
**Date** ..... December 14, 2021

---

▪ **Applicant's Proposal and Background Information**

The applicant is proposing a master planned mixed-use community consisting of 1,122.43± acres known as “Gainesville Township”. The proposal includes annexing 140.77± acres with a zoning of Planned Unit Development (P-U-D). These properties consist of five parcels which are zoned Agricultural Residential-IV (AR-IV), Agricultural Residential-III (AR-III) and Residential-II (R-II) within the County.

The proposal includes amending an existing 981.661± acres tract zoned Planned Unit Development (P-U-D) consisting of six parcels. This property was originally annexed in 1998 and was known as “Shawshank” which included a golf course community. In 2001 additional acreage was annexed for what is known as “Sussex” that removed the golf course and increased the overall number of residential units. Below is a snapshot comparison of the current and proposed plan.

|                         | Current Plan | Proposed Plan | Difference | Proposed Rental          |
|-------------------------|--------------|---------------|------------|--------------------------|
| Acreage                 | 981.6        | 1,122         | +141       |                          |
| Single-Family Homes     | 977          | 1,414         | +437       | 300 (21% of Sf)          |
| Townhomes               | 197          | 311           | +114       | 233 (75% of Th)          |
| Apartments              | 1,096        | 640           | -456       | 640 (100% of Apts.)      |
| Total Residential Units | 2,270        | 2,365         | +95        | 1,173 Total rental units |
| Overall Density         | 2.35 du/acre | 2.11 du/acre  | - 0.24     |                          |
| Open Space              | 548.5 acres  | 645.3 acres   | +96.8      |                          |
| Commercial              | 24,000 sf    | 75,000 sf     | +51,000 sf |                          |

The development standard for each proposed use are listed below:

| <b>Single-family Detached Homes</b>                                             |           |          |          |          |
|---------------------------------------------------------------------------------|-----------|----------|----------|----------|
| Number of Units                                                                 | 1,414     |          |          |          |
| Number of Rental Units                                                          | 300 (21%) |          |          |          |
| Lot Width                                                                       | 40'       | 50'      | 60'      | 95'      |
| Minimum Lot Size                                                                | 4,000 SF  | 5,000 SF | 6,000 SF | 9,000 SF |

| Gross Square footage | 75,000 sf                                                                                                                                                                                                                                                                            |
| Uses                 | Includes those uses allowed within the Neighborhood Business (N-B) zoning district, in addition to drive-thru restaurants, climate controlled storage facility, institutional residential living and care facilities serving more than 18 persons at no more than 22 units per acre. |
| Maximum Stories      | 3                                                                                                                                                                                                                                                                                    |
| Parking Ratio        | Per the Unified Land Development Code                                                                                                                                                                                                                                                |

### Access

A total of two points of access are proposed from Old Cornelia Highway. The primary access Driveway #1 will extend off the new road planned for the future "The Coop" Athletic Complex. A future Driveway #2 is proposed off of the older segment of Old Cornelia Highway next to the proposed commercial property. In addition, a driveway restricted for emergency purposes may be considered to the south off of Floyd Road. All streets are planned to be public and maintained by the City. Internal drives/streets that are gated for the townhomes or multi-family apartments will be private. Solid waste pick-up will be provided by the City as well except for the apartments and commercial uses.

### Amenities & Signage

A Central Amenity Center is proposed off of the main entrance road to the community which will include a clubhouse, swim center with lap pool with children's play area, tennis center with lighted courts, pickle ball courts, great lawn with pavilion for outdoor functions, mail kiosk and dog park, various pocket parks, disc golf, extensive trail, sidewalk and multi-use path system. Other satellite amenities may include boat/RV storage, bicycle racks, small open space cabana's with neighborhood size pools.

The project gateway entrance will include landscape, hardscape feature, signage, monumentation and lighting establishing a sense of place and arrival point. Signage will contain additional identification of "The Coop" sports complex. Smaller scale signage and monumentation elements may be placed throughout the development similar in style to the major project identification. These may be placed at the secondary access points on Old Cornelia Highway or in interior streets within the development. A maximum of two billboards, which may include electronic billboards on the property, are proposed along I-985 frontage. These billboards shall not exceed 440 square feet and 45 feet in height. All billboards are limited to project related content and must be removed within seven years of erection or 95% of project build-out, whichever occurs last.

▪ **Adjacent Land Use and Zoning**

| Location | Use                                                                                                                 | Zoning                                                                                                                                                                   |

|          | Lenox Park                                                                                                          | Planned Unit Development (P-U-D) -City                                                                                                                                   |

The property is located within the North Oconee Water Supply Watershed Protection Overlay Zone and other surrounding uses include Rabbit Town Salvage, Rabbit Town Café and the Avita Behavioral Health Facility.

▪ **Traffic Summary**

A Traffic Impact Study was conducted for the proposed development on April 13, 2021. A brief summary of the findings is provided below. The entire study is provided as part of the supporting documents.

Studied intersections:

1. Old Cornelia Highway and Dana Drive (unsignalized)
2. Old Cornelia Highway and White Sulphur Elementary (unsignalized)
3. Old Cornelia Highway and Oconee Circle (unsignalized)
4. Driveway #1 at Old Cornelia Highway
5. Driveway #2 at Old Cornelia Highway
6. Driveway #3 at Floyd Road

A background traffic growth rate of 1.5% was established for each year based on the population estimated growth rate. TIS anticipated three phases completed by the year 2035 which includes the proposed project and the adjacent planned “The Coop” Athletic Complex. The estimated trips through the year 2035 include 18,535 daily trips, 349 AM Peak Hour trips entering and 1,032 trips exiting, 1,138 PM Peak Hour trips entering and 683 trips exiting.

Based on the findings in this study, any improvements implemented at Driveway #1 on Old Cornelia Highway could not be implemented without adversely affecting the adjacent intersections. Therefore, three alternatives were evaluated that would also address the operation of White Sulphur Elementary School and Dana Drive. It is recommended that the roadway of Old Cornelia Highway be widened to four lanes to accommodate for these Alternatives. A long range project is currently planned for widening, but the background growth of the roadway coupled with the development volume exacerbate the need for the project. The developer should work with

GDOT for widening project, while the developer will be solely responsible for the selected Alternative. The intersection of Old Cornelia Road and Oconee Circle is currently experiencing unacceptable LOS before adding the project volumes, and improvements should be implemented by local officials. Alternative improvements were identified which accounted for the current Old Cornelia Highway conditions and a future proposed 4-lane widening.

- 1) The first alternative evaluated at the site driveway #1 (located between White Sulphur Elementary School and Dana Drive) is a minor street stop control with added dedicated left and right turn lanes into and out of the development. In both scenarios the northbound left exiting turn lane did not operate an acceptable capacity level.
- 2) The second alternative at site driveway #1 includes a traffic signal with the additional turn lanes. The existing two-lanes with a traffic signal did not perform at acceptable capacity levels during the PM peak hours for the west bound and north bound lanes. The multi-lane traffic signal showed the east, west and north bound turning movements operating at acceptable capacity levels.
- 3) The third alternative at site driveway #1 includes a single lane and a multi-lane roundabout. The multi-lane roundabout showed the east, west and north bound turning movements operating at acceptable capacity levels.
- 4) Other acceptable alternatives include allowing Dana Drive and White Sulphur Elementary School to access a signalized development Driveway #1 at a 4-lane Old Cornelia Highway. A dumbbell shaped roundabout consisting of two roundabouts close together at the development Driveway #1 and the White Sulphur Elementary School entrances with a consolidated driveway of Dana Drive and Driveway #1. An elliptical (elongated) roundabout expanding to each intersection with White Sulphur Elementary Driveway, Driveway #1 and Dana Drive.

#### ▪ **Georgia Mountains Regional Commission Summary**

The Georgia Mountains Regional Commission (GMRC) provided a regional review of DRI Project #3471 and has determined the proposed action does **NOT** present any potential adverse inter-jurisdictional impacts. However, the GMRC advises that a 3<sup>rd</sup> access point be made mandatory, and that a 4<sup>th</sup> should be explored if possible due to the size of the development. In addition, best environmental practices are encouraged regarding stormwater management given the property is located within the North Oconee Watershed Protection Zone.

#### ▪ **Other Departmental Comments**

The Georgia Department of Transportation states the I-985 (Exit 24) interchange has dual turn lanes for both the on and off ramps. Signal timing will need to be monitored on the SR 369 corridor as the area develops. No further coordination is required.

Coordination with the Gainesville Public Works Department will be required for the proposed development access plan. Solid waste will be provided for the single-family lots and possibly the townhomes depending on street access and the ability for trucks to turn around. Solid waste for the multi-family apartments, amenity areas and retail businesses will be handled privately.

The Gainesville City School System submitted an official letter in response to the request which is included with the documents. In summary, the School Board views the development as too massive, too dense and too populated for the school systems extended, planned growth plans. In addition, consideration should be given for the following:

- Confirming the location of a suitable 20+ acres school site;

- Developer-paid traffic signals at each proposed entrance for the safety of vehicles and/or buses transporting students;
- Bus pull-off aprons in each interior pod artery;
- Prohibited weekday parking in cul-de-sacs to ensure safe and smooth bus flow;
- Honoring, in a separate certified communique to the school system, the 20-acres site proposed for an elementary school; and
- Community information sessions in the Sherwood Heights, New Holland/Fair Street and Morningside Heights neighborhoods.

#### ▪ **Zoning History**

*The following zoning actions have taken place in the immediate area during the last ten years:*

**2020** - A request by the City of Gainesville to annex 4.4± acres and rezone 1,320± acres located at 0 and 2221 Smallwood Road; 2306 and 2312 Athens Highway; 1701 Fulenwider Road, SW with a zoning of Planned Unit Development (P-U-D) for a business park was approved with conditions.

**2019** - A request by Integrity Development Group, LLC to annex a 219.65± acres tract located at 2242 Gaines Mill Road; 2579 and 2581 Gillsville Highway with a zoning of Planned Unit Development (P-U-D) zoning for a 375 lot subdivision was approved with conditions.

**2018** - A request by Geosam Capital US (Atlanta), LP to amend an 85.45± acres portion of a 220± acres tract located at 0 Gaines Mill Road zoned Planned Unit Development (P-U-D) for 100-single-family homes was approved with conditions.

**2017** – A request by Keel Property Management, LLC to annex a 6.32± acres tract with a zoning of General Business (G-B) located at 0 White Sulphur Road was conditionally approved for restaurant, retail and a carwash.

**2017** – A request by the City of Gainesville to rezone 53.177± acres located at 1514, 1515, 1545, 1560 and 1581 Community Way from Residential-II (R-II) to Office and Institutional (O-I) zoning was approved for existing uses and for future professional office purposes.

**2016** – A request by Timothy Bullard to annex a 20.417± acres tract located at 1582 and 1586 Pine Valley Road was denied for a 240-unit apartment complex with Residential-II (R-II) zoning.

**2014** - A request by Alcovy-20, Inc. to amend a 26.10± acre tract located at 0, 2108 and 2125 Wilson Drive zoned Planned Unit Development (P-U-D) for a 55-lot single-family subdivision was approved with conditions.

**2012** - A request by Gainesville Truck Center to annex a 14.03± acres tract located at 2145 Athens Highway with a zoning of Light Industrial (L-I) for sewer for an existing truck center was approved.

**2012** – A request by Pacolet Milliken Enterprises, Inc. to annex a 68.223± acres tract located at 601 White Sulphur Road was approved with conditional Planned Unit Development (P-U-D) zoning for a mixed-use development.

#### ▪ **Staff Analysis**

**(1) Is the proposed use suitable in view of the zoning and development of adjacent and nearby property?**

Due to the size of the property, there are numerous adjacent uses and parcels that border the subject property. The surrounding land use is primarily agricultural and low density housing but

has never taken on an established land use pattern. The adjacent properties consist of a mixture of agriculture, residential, and office/commercial both in the city and county. Limited commercial and office uses are located along Old Cornelia Highway which has experienced very slow growth over the years. These properties are zoned Planned Unit Development (P-U-D), Agricultural Residential-III (AR-III), Agricultural Residential-IV (AR-IV), Residential-I-A (R-I-A), Residential-I (R-I) and Highway Business (H-B).

**(2) Will the proposed use adversely affect the existing use or usability of adjacent or nearby property?**

The proposed use will change the living conditions of the surrounding residential uses with an increase of traffic and demand on public services. Currently, the property is approved for 2,270 residential units, 24,000 square feet of commercial space and 548.5± acres of green space. The revised proposal includes the annexation of an additional 141.0± acres for 2,365 residential units, 75,000 square feet of commercial space and 645.3± acres of green space. The proposal anticipates the development will be built-out over a period of 10 years which will help integrate the residential growth.

**(3) Is the proposed use compatible with the purpose and intent of the Comprehensive Plan?**

The Future Development Map for the City of Gainesville places the property within the *Low-Medium Density Residential* land use category, which includes areas containing or planned for single-family detached or semi-detached housing at densities ranging from two to four dwelling units per acre. The proposal has a density of 2.11 dwelling units per acre for the 1,122 acres. The currently approved mixed-use use for the property has a density of 2.35 dwelling units per acre.

According to the Character Area map for the City of Gainesville, the subject property is located within the *Suburban Residential* Character Area which includes low-density residential, medium-density residential, multi-family residential, public / institutional, commercial, and parks / recreation / conservation and mixed-use. The goal of this character area is to preserve older, stable residential subdivisions and encourage newer projects with smaller lot sizes, pedestrian infrastructure, and buildings patterned after traditional local housing, possibly containing a small neighborhood-serving "village center". Mixed-use neighborhood design is desired but not required. In areas where natural features or sensitive environments are important, cluster housing or conservation subdivision design may be appropriate.

**(4) Are there substantial reasons why the property cannot or should not be used as currently zoned?**

The majority of the property is zoned Planned Unit Development (P-U-D). The applicant is proposing to amend the existing P-U-D and to annex an additional 141± acres with a zoning of P-U-D. The proposal includes a mixture of housing types and development standards which are currently not approved within the current P-U-D zoning or within the unincorporated county zoned portion of property. Therefore, the applicant is proposing to annex to utilize City water and sewer services.

The proposed zoning of Planned Unit Development (P-U-D) is considered a site-specific zoning intended to provide for some flexibility of land uses that should include unique and innovative development of the land through a unified site design in order to meet the objectives of the comprehensive plan.

**(5) Will the proposed use cause an excessive or burdensome use of public facilities or services, including but not limited to streets, schools, water or sewer utilities, and police or fire protection?**

Since the land is undeveloped, the proposal will increase the amount of traffic and turning movements generated from the site at the two proposed driveway locations. The estimated trips through the year 2035 include 18,535 daily trips, 349 AM Peak Hour trips entering and 1,032 trips exiting, 1,138 PM Peak Hour trips entering and 683 trips exiting. According to the traffic impact study, the widening of Old Cornelia Highway with dedicated turn lanes and a traffic signal or roundabout is necessary to keep traffic flow at an acceptable level for the project build out.

The applicant will be required to coordinate with Gainesville, Hall County and GDOT regarding any access and driveway improvements. According to the "9<sup>th</sup> Edition Trip Generation Manual" as published by the Institute of Transportation Engineers, the estimated trips for a proposed retail center are 266± two-way trips per weekday and 41 A.M. / 30 P.M. two-way peak hour trips.

Water and sewer capacity are available to serve the development. Existing public safety services currently respond to the adjacent and nearby properties. Gainesville Fire Station #2 located off of Cleveland Highway is located approximately 3.5 miles from the property. As well, Hall County Fire Station #7 off of East Crescent Drive is located approximately 1.5 miles away. The current approved use and the amended proposal reserves two acres within the development for a future public safety facility.

The proposal includes a total of 2,365 residential units which will impact the enrollment of the City School system. It is undetermined how many new school aged children will live within the development given the mixture of housing types. According to the School System, the development is too massive, too dense and too populated for the school systems extended, planned growth plans. The development will be phased over a period of 10 years which should help give school system additional time to plan for additional enrollment. In addition, the applicant proposes to donate twenty acres anywhere within the development except for phase 1 for a future school site, or the School Board may elect to receive an amount equal to the Developer's per acre purchase price for 20 acres paid in two installments.

**(6) Is the proposed use supported by new or changing conditions not anticipated by the Comprehensive Plan or reflected in the existing zoning on the property or surrounding properties?**

The subject property is supported by new and changing conditions in the surrounding area. While significant development has occurred west of Exit 24/ I-985 within the New Holland area, the growth patterns east of the interchange have changed slowly from rural to suburban which was anticipated by the Comprehensive Plan.

**(7) Does the proposed use reflect a reasonable balance between the promotion of the public health, safety, morality, or general welfare and the right to unrestricted use of property?**

The proposed annexation and P-U-D amendment request is an extension of the previously approved zoning plan which proposes a net increase of 141.0± acres of land, 96.8± acres of green space, 95 additional residential units and 51,000 square feet of commercial space. The proposal, with the recommended conditions, appears to promote a reasonable balance between the interests of the city, the property owner, and neighboring residents and property owners.

▪ **Staff Recommendation**

The Planning Division staff is recommending **conditional approval** of this annexation and P-U-D amendment request based on the Comprehensive Plan, the existing approved use for the property and the adjacent mixture of uses.

**Conditions**

1. The development standards within the applicant's narrative, site plans, and architectural renderings shall be made part of the zoning ordinance, and shall be subject to the Community and Economic Development Director approval. Any zoning conditions adopted as part of this zoning ordinance that conflict with the applicant's narrative, concept plan and architectural renderings shall take precedence over the applicant's development standards.
2. The maximum number of single-family detached homes/lots shall be 1,414. The maximum number of single-family attached homes shall be 311. The maximum number of multi-family units shall be 640. The total number of residential units shall not exceed 2,365 units.
3. No more than 300 single-family units (detached and/or attached) and 640 multi-family units shall be rental units for a total of 940 rental units. The multi-family units may be any combination of traditional garden-style apartments, townhomes, manor houses, cottages, and/or carriage houses built within the confines of the multi-family areas.
4. Prior to permits being issued for the residential uses, each contractor/developer shall provide architectural renderings of the proposed single-family detached homes, attached townhomes and multi-family apartments for the review and approval of the Community and Economic Development Department Director.
5. The minimum heated floor space for single-family detached homes shall be as presented in the below table associated with zoning condition number 8. The minimum heated floor space for the attached townhomes shall be 1,100 square feet and 640 square feet for the multi-family units. The single-family detached homes and attached townhomes shall not exceed 3 stories in height. The multi-family apartment buildings shall not exceed 3 stories, although 3 / 4 splits shall be allowed.
6. All exterior wall front, sides, and rear of the single-family detached homes, townhomes, and multi-family units shall consist of a variety of building materials consistent with architectural themes and styles determined by the applicant. Foundation water tables of matching brick or stone material, that also covers all exposed foundation walls, will be used where architecturally compatible. Vinyl siding shall only be permitted on soffit areas.

Other architectural requirements will include:

- Carriage style garage doors with decorative hardware or other embellishments shall be used on all single-family detached homes and townhomes;
- The roofing material used on all single-family detached homes and townhomes shall be 3-tab architectural/dimensional style asphalt shingles or metal as appropriate to the architectural style of each home as determined by the builder.
- All overhangs including gables and side gables will have a minimum of a 12-inch overhang on all sides;
- The developer shall use a variety of techniques to avoid the monotonous appearance of identical single-family detached homes. Such techniques may

employ among others the use of differing front elevations, architectural styles, building exteriors, and other similar techniques so that no single-family detached house is the same as any house directly in front of a single-family detached home or on either adjacent side of a single-family detached home;

- All roofs and gables shall be of a pitch no less than 8/12. This condition shall not apply to dormers, porches, bay windows, and third floor retreats;
- The exterior materials for all homes shall consist of brick, stone, fiber cement siding, cedar shake or wood siding;
- All roof vents, pipes, and other roof equipment (except chimneys) shall be located on the rear elevations and shall be painted to match the color of the roof;
- No above-ground swimming pools shall be permitted;
- No window air conditioning unit may be installed;
- No exterior blank, windowless walls will be constructed;
- If dormers are included, they will not be taller than the main roof;
- All single-family detached house plans will have front or side loaded garages;
- All townhomes will have front or rear entry garages;
- Street lighting will be provided throughout the development;
- All front porches of single-family detached homes shall have a minimum depth of 5';
- Windows are restricted to single hung or double hung windows.

These requirements shall be included in the Covenants to be recorded against the property.

7. Each detached single-family home and townhome shall have, at a minimum, an attached two car garage.
8. Specific development standards for the single-family detached homes shall include the following:

| Lot Width                           | *40'     | 50'      | 60'      | 75'      | 95'      |
|-------------------------------------|----------|----------|----------|----------|----------|
| Minimum Lot Size                    | 4,000 SF | 5,000 SF | 6,000 SF | 7,500 SF | 9,000 SF |
| Minimum Front Yard Setback          | 25'      | 25'      | 25'      | 25'      | 25'      |
| Minimum Side Yard Setback           | 5'       | 5'       | 5'       | 5'       | 5'       |
| Minimum Rear Yard Setback           | 10'      | 10'      | 10'      | 10'      | 10'      |
| Minimum Building Separation         | 10'      | 10'      | 10'      | 10'      | 10'      |
| Maximum Height (Number of Stories)  | 3        | 3        | 3        | 3        | 3        |
| Minimum Heated Square Feet per Home | 1,400 SF | 1,800 SF | 1,800 SF | 2,000 SF | 2,200 SF |
| **Maximum % of SF Detached Lot Type | 15%      | 35%      | 35%      | No Max   | No Max   |

\*40' lots are restricted to age-restricted neighborhoods only.

\*\*Any lot allocation from a smaller category may move to a larger category.

9. The front yard of each lot shall be sodded and planted with at least one 3" caliper in size hardwood tree.

10. The proposed amenities shall be required as shown on the site plan and the pictures shown on pages 10, 14, 15, 16, 17 28, 29, 34, 75, 76, 77, 87, 88 and 89 of the applicant's revised narrative submitted with this application per the approval of the Community and Economic Development Department Director. The amenity area must be started in the first phase of construction. No more than 250 single-family detached homes shall receive a certificate of occupancy (CO) prior to the Central Amenity Center being substantially completed as described on page 37 of the applicant's revised narrative. This shall include at minimum the clubhouse, swim center with lap pool with children's play area, tennis center with lighted courts, pickle ball courts, great lawn with pavilion for outdoor functions, and mail kiosk. Certain elements, such as additional courts may be phased in as demand dictates. Additional CO's may be granted at the discretion of the Community and Economic Development Director, if sufficient progress is being made on the amenity.
11. Covenants shall be put in place by the developer restricting against the parking of boats, trailers, and campers within driveways or streets. In addition, no on street parking shall be permitted for vehicles.
12. No more than 10% of the units within the proposed community storage facility may be leased to non-residents of the proposed development. There are no restrictions for non-resident use of any commercially operated storage facility that is located within the Commercial District.
13. A Uniform Sign Plan as identified within Section 9-18-7-4 of the Unified Land Development Code shall be required from the developer and is subject to approval by the Gainesville Community and Economic Development Director. All signs associated with residential uses shall be limited to indirect lighting. All signs shall be located outside of utility areas and shall not block visibility of vehicular traffic.
14. All proposed detention ponds shall be fenced and landscaped in order to mitigate the view from all roads and adjacent properties. All fencing and landscaping materials shall be approved by the Community and Economic Development Department Director.
15. A site shall be made available within the boundaries of the proposed development to the City of Gainesville for a school consisting of twenty (20) acres of land which meets the criteria established by the Georgia State School Board for such a public school. This site shall be made available by the developer without charge for the land, at any time within seven (7) years after the developer has provided paved access to the site. Alternatively, the School Board may elect to receive an amount equal to the Developer's per acre purchase price for 20 acres paid in two installments within 7 years of a land development permit being issued. The School Board shall identify a potential site no later than 180 days from closing, excluding any portions of the property that have been presented as Phase 1 of the community.
16. The developer agrees to make available an additional twenty (20) acres, for a total of forty (40) acres, if the City of Gainesville has a need for a second school site. The Gainesville School Board would be required to pay fair market value for this last twenty (20) acres. The School Board shall identify a potential site no later than 180 days from closing, excluding any portions of the property that have been presented as Phase 1 of the community.
17. A site shall be made available within the boundaries of the proposed development to the City of Gainesville for a fire station and a precinct for the police department

consisting of not more than two (2) acres of land which will be designated by the developer and reasonably approved by the Gainesville City Council for such public services. This site shall be made available by the developer without charge for the land, at any time within seven (7) years after the developer has provided paved access to the site. This site has been identified on the Concept Plan and the City of Gainesville shall have 180 days from closing to determine if the site meets their requirements or if another site is preferred, however any portions of the property that have been presented as Phase 1 of the community shall be excluded.

18. The plan shall include a fifty (50') foot perimeter buffer separating all portions of the development from the existing single-family communities to the south of the project site. The specific parcels are shown on the buffer exhibit attached. The composition of this buffer, including any fencing deemed necessary, shall be subject to final approval by the Community and Economic Development Department Director.
19. Minimum five foot (5') wide sidewalks with a two foot (2') grass beauty strip shall be required as shown on the Pedestrian Access Plan filed with this request. Applicant, at his sole discretion, shall substitute a five foot (5') sidewalk with a ten foot (10') multi-use trail (asphalt or concrete) where indicated on the Pedestrian Access Plan to be maintained by the Homeowners Association (HOA).
20. All new streets shall meet the standards within the current Gainesville Unified Land Development Code, unless varied herein. All proposed residential uses, commercial uses and amenities shall provide for pedestrian connectivity throughout the development. All costs associated with the improvements shall be at the full expense of the developer.
21. All access point design for the subject property shall be submitted for review and approval by the Gainesville Public Works Director, Hall County and/or the Georgia Department of Transportation. The main access road, from Old Cornelia Highway to Applicant's property shall be constructed by the City of Gainesville at its expense. Applicant shall be responsible for access beyond this point and any other access points to the property.

|                                                                                                                                                                 |  |                                                                                                                                                                                                                                     |  |

# PROJECT OVERVIEW

## OF GAINESVILLE TOWNSHIP

Gainesville Township is a master planned community consisting of approximately 2365 homes on approximately 1122 acres. Development is planned to be primarily confined to the ridgelines in order to promote a greater balance with nature. 645± acres will remain as open space. The project's overall density is approximately 2.11 units per acre. The project is less dense than most other developments served by public sewer and will contain a variety of different housing types and sizes, which will be separated into various sub-communities or pods. This variety of housing types is intended to encompass different price points and accommodate residents of varying ages, from young professionals to families to active seniors. The community's focal point will be the Gainesville Township Central Amenity, passive parks throughout and extensive trail system, which are all designed to create a unique identity and character for the development.

Large areas of open space containing mature trees are integrated into the master plan to preserve the property's natural beauty. A significant number of homes within each pod will adjoin these open spaces thereby allowing residents to use and enjoy the open space areas. Over 80,000 feet of jurisdictional streams bisect the property, creating natural buffers and preservation areas.

In essence, Gainesville Township connotes a sense of community at a special place in the foothills of the Northeast Georgia Mountains — a place many would like to call home.

# DEVELOPER'S STORY

## OF GAINESVILLE TOWNSHIP

Cotter Properties and Development, LLC ("CPD"), parent company of Caballero Holdings, LLC was established by Douglas W. Cotter, Jr. in 2004 and is one of the preeminent residential real estate development firms in the southeast.

Mr. Cotter and his partners have extensive development experience and participated in the development of over 8,000 residential lots prior to 2014. Since 2014 CPD has rezoned, entitled or developed in excess of 8,000 residential lots and is currently working to rezone, entitle and develop over 12,000 additional residential lots in four states.

CPD has served as the sole or primary developer on over 40 projects since 2014 and more than 60 projects prior to 2014.

Through its relationships with local real estate brokers and the nation's largest home builders, CPD is able to source projects others miss and close on projects others simply cannot disentangle and consummate.

CPD is well positioned for the future and to take advantage of current market opportunities, which include serving as a preferred development partner for multiple national builders and local development sponsors.

CPD's current principals are Douglas W. Cotter, Jr. and George E. Harvey III. Mr. Cotter is a past president of The Greater Atlanta Home Builders Association and has been active in the real estate development and home building arenas since 1991. Mr. Harvey is an attorney that left the full-time practice of law in 2006 in order to pursue a career as a real estate developer.

# LOCATION OF GAINESVILLE TOWNSHIP

The future Gainesville Township community is located less than 3 miles north-east of the City of Gainesville square and less than 1 mile east of I-985 at Exit 24. Primary access to the property will be from Old Cornelia Highway near the current location of White Sulphur Elementary School. The property is surrounded primarily by developed residential uses.

Gainesville Township will straddle and protect the floodplain of Pond Fork, a tributary to the Middle Oconee River. Several unnamed streams exist on the property and will be preserved along with the majority of their associated mature tree canopy. Limited areas of the property were previously timbered, creating pastures in the lower lying areas. The property is surrounded by a variety of residential uses which have been developed over the past 50 years. Approximately 1400 lf of the property fronts to I-985 just south of Exit 24. A major retail area, anchored by a Mega Kroger is developing on the west side of I-985 along with restaurants and other commercial uses. North Georgia Health System's main campus is located approximately 2.2 miles away on Jesse Jewell Parkway. The new campus of Lanier Technical Institute is located less than 2 miles north on I-985.

**DRAFT**

# CHARACTER

## OF GAINESVILLE TOWNSHIP

The Gainesville Township community has been carefully planned to minimize environmental impacts and maximize internal connectivity based on streams, wetlands, steep slopes and other natural features. Development will be concentrated primarily along ridge lines with the majority of land adjacent to streams left untouched. The general theme is planned to promote a sense of community and interconnectivity while still providing smaller pods of development that may have their own individual identities.

Gainesville Township is planned to contain a variety of housing types, including age-targeted single-family houses and town houses for active adults and traditional single-family neighborhoods with a range of lot widths and home sizes as well as multi-family options.

A key feature of Gainesville Township will be its multi-use system of walking paths that will connect all areas of the community to the Central Amenity. The community design will foster connectivity for the residents to one another, nature and the amenities. Additional planned amenities include a spacious clubhouse for gatherings, lap pool with separate children's area, pickle ball courts, disc golf and lighted tennis courts suitable for ALTA/USTA competition. Small pocket parks, intimate landscaped spaces and winding sidewalks will further promote the cohesiveness of the community.

GAINESVILLE TOWNSHIP  
HAS BEEN PLANNED  
TO PROMOTE A SENSE OF  
COMMUNITY AND  
INTERCONNECTIVITY.

**DRAFT**

# STREET SYSTEM

## OF GAINESVILLE TOWNSHIP

The primary entrance to Gainesville Township will be at the current intersection of Old Cornelia Highway and White Sulphur Elementary School. Additionally, a second entrance is planned on Old Cornelia Highway to the west of the primary entrance. A future third entrance may be added to the south of the property with access to Athens Highway (US 129). All streets are planned to become publicly maintained at the expiration of the required maintenance periods. All streets will be constructed to City of Gainesville standards and will include sidewalks, multi-use paths, street lights and cross walks where indicated. Multi-Use paths may be constructed of concrete or asphalt.

Streets that are located internal to single family attached and multi-family portions of the project may be gated and remain private as determined by the Developer.

**PRIMARY ENTRANCE**

Located at the intersection  
of Old Cornelia Hwy &  
White Sulphur Elementary School

**DRAFT**

# OPEN SPACE

## OF GAINESVILLE TOWNSHIP

At 645± acres, the open space that meanders throughout the development will be directly accessible to each residential pod. The open space will include areas for amenities, walking paths and passive or active recreation. However, the majority of the open space will be left undisturbed to protect the natural beauty of the site as well as environmentally sensitive areas. The development team believes this element adds tremendous value to the overall development.

Gainesville Township is being developed with nature and outdoor experiences in mind, including numerous parks, open spaces and an extensive network of walking paths as well as natural water amenities. Pocket parks will be located throughout the community and will be connected through the network of walking paths. One pocket park may include benches and an arboretum while another may have a swing set and yet another may simply have a community lawn or nature observation deck. These areas will serve as the focal points for different areas of the community. This element of the community will become a social gathering place and will serve as host to diverse community activities.

**DRAFT**

**645± ACRES OF OPEN SPACE**

Including numerous parks,  
open spaces, walking paths  
and natural water amenities.

**DRAFT**

# AMENITIES

## OF GAINESVILLE TOWNSHIP

Primary amenities are planned in the central portion of the property with additional amenities planned throughout the project.

### The Central Amenity Center will include:

**Clubhouse**

**Swim Center** with a lap pool with children's play area

**Tennis Center** with lighted courts suitable for ALTA/USTA competition

**Pickle Ball courts**

**Great Lawn** with pavilion for outdoor functions

**Mail Kiosk**

**Disc Golf**

**Pocket Parks**

**Dog Park**

**Extensive Trail, Sidewalk and Multi-Use Path System**

The Central Amenity building, parking and street elements are designed to be pedestrian-friendly with vehicular traffic programmed for slower speeds around the proposed roundabout. Bicycle racks are planned to promote non-vehicular trips to the Center. Satellite amenities of a smaller scale may be offered at other areas based on future needs and market demand. These amenities could range from small open space areas to cabanas with neighborhood sized pools. A boat/RV storage area may also be included for the neighborhood

The extensive trail and sidewalk and multi-use path system, along with the other amenity features, will promote social interaction between residents of the Gainesville Township community and promote a healthy lifestyle for its residents.

The individual elements of these amenities may be phased in relation to future needs and market demand.

# RESIDENTIAL PRODUCTS

OF GAINESVILLE TOWNSHIP

**DRAFT**

**DRAFT**

GAINESVILLE TOWNSHIP

SINGLE  
FAMILY  
DETACHED

The community's development plan has created a balance of residential product choices that will accommodate multiple lifestyle desires. Particular emphasis has been placed on preserving as many areas of natural beauty and tree cover as possible, thereby creating natural separation of neighborhoods and promoting access to parks and open spaces.

Traditional single-family lots are proposed for the majority of Gainesville Township. A variety of lot width sizes and product sizes will be located throughout the project. Similar sizes will be "clustered" together and may be completed by multiple builder groups. While the majority of these products will be owner occupied, nothing in this document shall prohibit their use as for rent products, at the requested limit.

| SF Detached                       | 40'   | 50'   | 60'   | 75'    | 95'    |

| Minimum Heated SF per Home        | 1,400 | 1,800 | 1,800 | 2,000  | 2,200  |

Lot standards and the allowable maximum percentages of each lot size is indicated below. The combined number of 40's & 50's shall not exceed 50% of the total.

DRAFT

DRAFT

# 40' SINGLE FAMILY DETACHED LOTS

The Community's development plan has been created to provide a balance of residential product choices that will accommodate multiple lifestyle options. Up to 15% of the lots could be 40' wide lots with a minimum lots size of 4,000 SF. These lots will support a product width up to 30' wide with two car garages and a minimum heated floor area of 1,400 SF. The product type could be a single story ranch or a 1 ½ to 2 story product. The 40' lots shall be limited to age-restricted neighborhoods only.

DRAFT

# 50' SINGLE FAMILY DETACHED LOTS

The Community's development plan has been created to provide a balance of residential product choices that will accommodate multiple lifestyle options. Up to 35% of the lots could be 50' wide lots with a minimum lots size of 5,000 SF. These lots will support a product width up to 40' wide with two car garages and a minimum heated floor area of 1,800 SF. The product type could be a single story ranch or a 1 ½ to 2 story product. The combined number of 40' lots and 50' lots shall not exceed 50% of the total lot count.

DRAFT

# 60' SINGLE FAMILY DETACHED LOTS

The Community's development plan has been created to provide a balance of residential product choices that will accommodate multiple lifestyle options. Up to 35% of the lots could be 60' wide lots with a minimum lots size of 6,000 SF. These lots will support a product width up to 50' wide with two car garages and a minimum heated floor area of 1,800 SF. The product type could be a single story ranch or a 1 ½ to 2 story product. The combined number of 40', 50' & 60' lots shall not exceed 85% of the total lot count.

NOTES:  
MINIMUM 6,000 SF LOT  
MINIMUM 60' LOT WIDTH  
MINIMUM BUILDING SEPARATION 10'  
MAXIMUM PERCENTAGE OF LOT TYPE IN DEVELOPMENT: 80%  
MINIMUM HOUSE SF: 1,500 SF

DRAFT

# 75' & 95' SINGLE FAMILY DETACHED LOTS

The Community's development plan has been created to provide a balance of residential product choices that will accommodate multiple lifestyle options. There is no proposed maximum number of lots for 75' & 95' wide lots with a minimum lots size of 7,500 to 9,000 SF. These lots will support a product width 65' to 85' wide with front or side entry garages and a minimum heated floor area of 2,000 SF. The product type could be a single story ranch or a 1 ½ to 2 story product.

NOTES:  
MINIMUM 7,500 - 9,000 SF LOT  
MINIMUM 75' - 95' LOT WIDTH  
MINIMUM BUILDING SEPARATION 10'  
MAXIMUM PERCENTAGE OF LOT TYPE IN DEVELOPMENT: NO MAX  
MINIMUM HOUSE SF: 2,000-2,200 SF

DRAFT

GAINESVILLE TOWNSHIP

# SINGLE FAMILY ATTACHED

Single Family Attached product will be located strategically within the project, providing an alternative lifestyle and pricing option. This product may consist of both multi-level townhome style homes and single-level quadraplex homes. While some of the products will be targeted toward families, others may be age-targeted to a 55+ buyer. All single family attached homes will be offered as low or no maintenance alternatives to detached home ownership. While the majority of these products will be owner occupied, nothing in this document shall prohibit their use as “for rent” products.

DRAFT

Lot standards and the allowable maximum percentages of each lot size is indicated below:

| SF Attached            | Townhomes | Townhomes |
|------------------------|-----------|-----------|
| Lot Width              | 20        | 24        |
| Minimum lot size       | 2,000     | 2,000     |
| Front Setback          | 15        | 20        |
| Side Setback           | 0         | 0         |
| Rear Setback           | 0         | 0         |
| Exterior Buffer        | 25        | 25        |
| Building Separation    | 20        | 20        |
| Minimum Square Footage | 1,100     | 1,400     |
| Maximum %              | No Max*   | No Max*   |

*\*TOTAL NUMBER OF SF DETACHED UNITS SHALL NOT EXCEED 311.*

DRAFT

GAINESVILLE TOWNSHIP

# MULTI-FAMILY

Multi-Family product is planned for a minimum of two locations within the project. Product offerings may include both family oriented as well as adult focused options. The product will be low rise (two/three or three/four story) garden style or breezeway style buildings, attached manor homes or detached cottages.

The Multi-Family areas of the project will provide their own amenities, geared specifically to their target markets. Amenities typically include; clubhouse, pool, fitness equipment and outdoor amenities such as fire pits and park areas.

**THE TOTAL NUMBER OF MULTI-FAMILY UNITS  
WILL BE CAPPED AT 640.**

**DRAFT**

Multi-Family standards are indicated below:

| Multi-Family        | Garden Style | Breezeway Style | Manor | Cottages |
|---------------------|--------------|-----------------|-------|----------|
| Front SB            | 30'          | 30'             | 10'   | 10'      |
| Side SB             | 10'          | 10'             | 10'   | 5'       |
| Rear SB             | 20'          | 20'             | 10'   | 10'      |
| Building Separation | 20'          | 20'             | 20'   | 10'      |
| Maximum Stories     | 4            | 4               | 3     | 2        |
| Maximum Height      | 60'          | 60'             | 45'   | 35'      |

**DRAFT**

# COMMERCIAL DEVELOPMENT

## OF GAINESVILLE TOWNSHIP

Commercial development may occur in areas with external road access, primarily along Old Cornelia Highway. Allowable uses shall be those specific to the Neighborhood Business District (N-B), drive thru restaurants and those specified under the "Institutionalized residential living and care facilities, serving more than eighteen (18) persons" use. Individual buildings shall not exceed three (3) stories in height with a gross square footage not to exceed 75,000 square feet. Parking ratios shall be in accordance with City of Gainesville ordinances based on the final use of the property.

**DRAFT**

31

**DRAFT**

30

GAINESVILLE TOWNSHIP

# SITE DEVELOPMENT

## OF GAINESVILLE TOWNSHIP

### Monumentation & Signage

The gateway to Gainesville Township is located at the intersection of Old Cornelia Highway and the City's new entrance to the Gainesville Youth Sports Complex. This intersection will serve the Youth Sports Complex, White Sulphur Elementary School and Gainesville Township. This entrance will act as the main visual link to the project and announces the development. As such, a critical part of Gainesville Township's initial impression, the project gateway will include landscape and hardscape features, signage, monumentation, and lighting establishing a sense of place and arrival point. The major gateway will define Gainesville Township, reflecting the architectural and landscape style of the development. Signage will contain additional identification of the Gainesville Youth Sports Complex and the White Sulphur Elementary School.

Billboard placement, including electronic billboards, on the property shall be allowed and limited to frontage along I-985. These billboards shall not exceed 440 square feet and 45 feet in height. All billboards are limited to project related content and must be removed within seven years of erection or 95% of project build-out, whichever occurs last. There shall be a limit of two such billboards.

### Secondary Identification

Additional signage and monumentation elements may be placed throughout the development and should be similar in style to the major project identification but will be smaller in scale. These may be placed at the secondary access points on Old Cornelia Highway or on interior streets of Gainesville Township. Minor information signs may also be used to guide visitors to various neighborhoods, amenities, and points of interest within Gainesville Township. The information signs might include event listings and other pertinent information relevant to the community.

### Landscaping

Together with the infrastructure design, the proper planning and design of outdoor spaces is critical in fostering the desired atmosphere of Gainesville Township. The overall landscape concept for this area plays a crucial role in unifying Gainesville Township and is intended to ensure that residences and related improvements are in concert with scenic beauty and natural conditions. The development will respect the area's natural setting and include new plantings that harmonize with the existing environment and the landscape character of the region. A consistent landscape that responds to aesthetic concerns and helps establish a positive image within the development for years to come must be established.

# COMMUNITY STANDARDS

## OF GAINESVILLE TOWNSHIP

### Maintenance & Ownership of Streets and Open Spaces

All of the streets, including those within individual pods or phases, are intended to be built to the typical sections shown herein and otherwise to the standards of the City of Gainesville. Other than the Parkway, roads may be gated for limited access and privately maintained. Roads not gated or otherwise access-limited will be dedicated to the City of Gainesville for maintenance. All interior open spaces and common elements will be deeded to the Master Home Owner's Association for maintenance and operation.

### Water & Sewer Utilities

The City of Gainesville will provide water and sewer service to Gainesville Township. The availability of services has been verified with the City of Gainesville.

### Homeowners Association

A mandatory Home Owner's Association (HOA) will be formed for Gainesville Township. The HOA will maintain and manage all of the common areas of the development, including financial management, architectural controls, and enforcement of community standards. The Multi-Family areas will be separate from the overall HOA but they will contribute to certain common element maintenance. The Restrictive Covenants will limit the number of single family detached rentals to 300 units and limit the number of single family attached rentals to no more than 75% of the units constructed at any given time. Any modifications or new construction within the community must be approved by an Architectural Review Board. The Board will be established and operated by the Developer until such time as the powers are transferred to the HOA(s).

### Model Homes & Prairie Homes

Prior to approval of any phased Final Plat, the City of Gainesville will issue a maximum of 50 model home permits and 50 prairie home permits. Once final platting has been approved for the outstanding prairie home permits, the City of Gainesville will issue additional prairie home permits, not to exceed 50 at any given time. This time period allows the Developer to accelerate their production schedule and reduce the time frame necessary to complete a house and close a sale. In a development of this magnitude, the City of Gainesville recognizes the carrying cost of land acquisition, infrastructure and overhead requires an expedited delivery schedule to meet project objectives and insure the ongoing success and vitality of the project.

Model home and prairie home permits will not be issued until access to the lot is provided in the form of a hard surface (crusher run) and fire protection is established within 500 feet of the lot in the form of a 1500-gallon tank fitted to City of Gainesville Fire Department specifications. The applicant/property owner agrees to indemnify the City of Gainesville against any claim of loss that may result from the early issuance of these type of permits.

**Model Home and Prairie Home shall be defined as follows:**

**PRAIRIE HOME** – *A concept used by Developers to allow for home construction starts (building permit issuance) prior to Final Plat recording. Prairie Home permits will not be granted temporary certificates of occupancy or permanent certificates of occupancy until approval of the final plat for the phase of development in which they are located.*

**MODEL HOME** – *A concept used by Developers to allow for home construction starts in order to model building types, floor plans, interior finishes, etc. to potential buyers. Model home permits will be granted a temporary certificate of occupancy (provided adequate restroom facilities have been completed) prior to final plat that will restrict the use of the structure to a sales center and furniture staging. Habitation will not be allowed in model homes until a permanent certificate of occupancy has been issued. Permanent certificate of occupancy will not be issued until approval of the final plat for the phase of development in which they are located.*

DRAFT

DRAFT

Drainage & Stormwater Management

All of Gainesville Township lies within the Pond Fork drainage basin and flows to the Middle Oconee River. Highest elevations are on the north and east and sides of the property, with flows generally to the east side of the property. Master detention facilities, serving multiple phases of development, are planned at suitable locations to reduce the number of detention ponds otherwise required.

Uses

Land development for residential housing is dynamic because of the need to concurrently predict and respond to the local real estate market and national economic and demographic trends.

Approval of the Gainesville Township Master Plan is intended to approve approximately 2365 units as the maximum number of units for the development. Housing product types may be rearranged, combined or reconfigured without limit within the development, provided the total number of units nor the maximum number of lot sizes are not exceeded and that the overall change will not substantially increase impact to the public school system, roadways at peak hours or points of connection.

Uses of a traditional single family residential nature are primarily for owner occupancy but, up to 300 units Single Family Detached and Single Family Attached may be used for rental purposes. Multi-Family uses are intended to be 100% for rental purposes. If market conditions warrant, up to 5% of the acreage of Gainesville Township may be used instead for senior resident adult congregate living facilities of independent living, assisted living, personal care and/or memory care at a density not to exceed 22 units per acre, but shall not include a nursing home or any other facility that requires a Certificate of Need.

Uses and standards described in the plan anticipate and describe single-family detached, single-family attached and multi-family forms of construction. If the use and/or form of housing for a particular phase is not specifically described or detailed in the plan, such a use or form may be approved administratively by staff based on then existing approved standards of the City of Gainesville for such a form of construction on similar sites elsewhere in the incorporated areas of the City.

Rental Percentage Breakdown

| Type              | Number | % of Total | % of Max Rental | Max # Rental |
|-------------------|--------|------------|-----------------|--------------|
| SF Detached       | 1,414  | 60%        | 21%             | 300*         |
| SF Attached       | 311    | 13%        | 96%             | 300*         |
| Multi-Family      | 640    | 27%        | 100%            | 640          |
| Total Residential | 2,365  | 100%       |                 | 940          |

\*COMBINED TOTAL OF SF DETACHED/SF ATTACHED SHALL NOT EXCEED 300 UNITS.

Phasing

- Phase 1 – The Developer intends to construct a portion of Gainesville Township Parkway (beyond the point constructed by the City) to access and serve approximately 200 single family detached lots, 150 single family attached units and 320 multi-family units. In addition, the Central Amenity will be started during Phase 1, with a completion no later than the completion of Phase 2.
- Phase 2 – The Developer intends to develop additional portions of the property, to serve 200 single family attached lots.
- Phase 3 – The Developer intends to develop additional portions of the property, to serve 200 single family attached lots.
- Phase 4 – The Developer intends to develop additional portions of the property, to serve 200 single family attached lots and 150 additional single family detached homes.
- Phase 5 & Future Phases – The Developer intends to complete the Gainesville Township Parkway and develop additional lots as demand warrants

Phasing is generally sequential, but may overlap. Lots of various sizes and ownership types may be under development concurrently in multiple portions of the overall site.

# ZONING REQUEST

## OF GAINESVILLE TOWNSHIP

The current zoning was approved in February 2001 as "Sussex". The chart below shows the primary differences in the two plans:

### Comparison to Current Zoning Plan

| Version                       | Current Plan | Proposed Plan        |
|-------------------------------|--------------|----------------------|
| Name                          | Sussex       | Gainesville Township |
| Acreage                       | 965          | 1,122                |
| Single Family Detached Units* | 977          | 1,414                |
| Single Family Attached Units  | 197          | 311                  |
| Multi-Family Units            | 1,096        | 640                  |
| Total Residential             | 2,270        | 2,365                |
| Overall Density               | 2.35         | 2.11                 |
| Open Space                    | 548.5 acres  | 645.3 acres          |
| Commercial                    | 24,000 sf    | 75,000 sf            |

#### This request includes:

- Annexation and Rezoning of five parcels that are contiguous with the currently zoned property. These parcels total approximately 144 acres.
- Amend the existing zoning approval as detailed in the application, zoning narrative and conceptual site plan.
- Adopt the conditions of zoning as outlined below.

DRAFT

## STAFF PROPOSED CONDITIONS

1. The development standards within the applicant's narrative, site plans, and architectural renderings shall be made part of the zoning ordinance, and shall be subject to the Community and Economic Development Director approval. Any zoning conditions adopted as part of this zoning ordinance that conflict with the applicant's narrative, concept plan and architectural renderings shall take precedence over the applicant's development standards.
2. The maximum number of single-family detached homes/lots shall be 1,414. The maximum number of single-family attached homes shall be 311. The maximum number of multi-family units shall be 640. The total number of residential units shall not exceed 2,365 units.
3. No more than 300 single-family units (detached and/or attached) and 640 multi-family units shall be rental units for a total of 940 rental units. The multi-family units may be any combination of traditional garden-style apartments, townhomes, manor houses, cottages, and/or carriage houses built within the confines of the multi-family areas.
4. Prior to permits being issued for the residential uses, each contractor/developer shall provide architectural renderings of the proposed single-family detached homes, attached townhomes and multi-family apartments for the review and approval of the Community and Economic Development Department Director.
5. The minimum heated floor space for single-family detached homes shall be as presented in the below table associated with zoning condition number 8. The minimum heated floor space for the attached townhomes shall be 1,100 square feet and 640 square feet for the multi-family units. The single-family detached homes and attached townhomes shall not exceed 3 stories in height. The multi-family apartment buildings shall not exceed 3 stories, although 3 / 4 splits shall be allowed.
6. All exterior wall front, sides, and rear of the single-family detached homes, townhomes, and multi-family units shall consist of a variety of building materials consistent with architectural themes and styles determined by the applicant. Foundation water tables of matching brick or stone material, that also covers all exposed foundation walls, will be used where architecturally compatible. Vinyl siding shall only be permitted on soffit areas.

#### Other architectural requirements will include:

- Carriage style garage doors with decorative hardware or other embellishments shall be used on all single-family detached homes and townhomes;
- The roofing material used on all single-family detached homes and townhomes shall be 3-tab architectural/dimensional style asphalt shingles or metal as appropriate to the architectural style of each home as determined by the builder.
- All overhangs including gables and side gables will have a minimum of a 12-inch overhang on all sides;
- The developer shall use a variety of techniques to avoid the monotonous appearance of identical single-family detached homes. Such techniques may employ among others the use of differing front elevations, architectural styles, building exteriors, and other similar techniques so that no single-family detached house is the same as any house directly in front of a single-family detached home or on either adjacent side of a single-family detached home;
- All roofs and gables shall be of a pitch no less than 8/12. This condition shall not apply to dormers, porches, bay windows, and third floor retreats;
- The exterior materials for all homes shall consist of brick, stone, fiber cement siding, cedar shake or wood siding;
- All roof vents, pipes, and other roof equipment (except chimneys) shall be located on the rear elevations and shall be painted to match the color of the roof;
- No above-ground swimming pools shall be permitted;
- No window air conditioning unit may be installed;
- No exterior blank, windowless walls will be constructed;
- If dormers are included, they will not be taller than the main roof;

DRAFT

STAFF PROPOSED CONDITIONS (continued)

- All single-family detached house plans will have front or side loaded garages;
  - All townhomes will have front or rear entry garages;
  - Street lighting will be provided throughout the development;
  - All front porches of single-family detached homes shall have a minimum depth of 5’;
  - Windows are restricted to single hung or double hung windows.
- These requirements shall be included in the Covenants to be recorded against the property.*
7. Each detached single-family home and townhome shall have, at a minimum, an attached two car garage.
8. Specific development standards for the single-family detached homes shall include the following:

| Lot Width                           | *40'     | 50'      | 60'      | 75'      | 95'      |
|-------------------------------------|----------|----------|----------|----------|----------|
| Minimum lot size                    | 4,000 SF | 5,000 SF | 6,000 SF | 7,500 SF | 9,000 SF |
| Minimum Front Yard Setback          | 25'      | 25'      | 25'      | 25'      | 25'      |
| Minimum Side Yard Setback           | 5'       | 5'       | 5'       | 5'       | 5'       |
| Minimum Rear Yard Setback           | 10'      | 10'      | 10'      | 10'      | 10'      |
| Minimum Building Separation         | 10'      | 10'      | 10'      | 10'      | 10'      |
| Maximum Height (# of stories)       | 3        | 3        | 3        | 3        | 3        |
| Minimum Heated SF per Home          | 1,400 SF | 1,800 SF | 1,800 SF | 2,000 SF | 2,200 SF |
| **Maximum % of SF Detached Lot Type | 15%      | 35%      | 35%      | No Max   | No Max   |

- \*40’ LOTS ARE RESTRICTED TO AGE-RESTRICTED NEIGHBORHOODS ONLY.**
- \*\*ANY LOT ALLOCATION FROM A SMALLER CATEGORY MAY MOVE TO A LARGER CATEGORY.**
9. The front yard of each lot shall be sodded and planted with at least one 3” caliper in size hardwood tree.
10. The proposed amenities shall be required as shown on the site plan and the pictures shown on pages 10, 14, 15, 16, 17 28, 29, 57 and 66 of the applicant’s narrative submitted with this application per the approval of the Community and Economic Development Department Director. The amenity area must be started in the first phase of construction. No more than 250 single-family detached homes shall receive a certificate of occupancy (CO) prior to the Central Amenity Center being substantially completed as described on page 19 of the applicant’s narrative. This shall include at minimum the clubhouse, swim center with lap pool with children’s play area, tennis center with lighted courts, pickle ball courts, great lawn with pavilion for outdoor functions, and mail kiosk. Certain elements, such as additional courts may be phased in as demand dictates. Additional CO’s may be granted at the discretion of the Community and Economic Development Director, if sufficient progress is being made on the amenity.
11. Covenants shall be put in place by the developer restricting against the parking of boats, trailers, and campers within driveways or streets. In addition, no on street parking shall be permitted for vehicles.
12. No more than 10% of the units within the proposed community storage facility may be leased to non-residents of the proposed development. There are no restrictions for non-resident use of any commercially operated storage facility that is located within the Commercial District.
13. A Uniform Sign Plan as identified within Section 9-18-7-4 of the Unified Land Development Code shall be required from the developer and is subject to approval by the Gainesville Community Development Director. All signs associated with residential uses shall be limited to indirect lighting. All signs shall be located outside of utility areas and shall not block visibility of vehicular traffic.

14. All proposed detention ponds shall be fenced and landscaped in order to mitigate the view from all roads and adjacent properties. All fencing and landscaping materials shall be approved by the Community and Economic Development Department Director.
15. A site shall be made available within the boundaries of the proposed development to the City of Gainesville for a school consisting of twenty (20) acres of land which meets the criteria established by the Georgia State School Board for such a public school. This site shall be made available by the developer without charge for the land, at any time within seven (7) years after the developer has provided paved access to the site. Alternatively, the School Board may elect to receive an amount equal to the Developer’s per acre purchase price for 20 acres paid in two installments within 7 years of a land development permit being issued. The School Board shall identify a potential site no later than 180 days from closing, excluding any portions of the property that have been presented as Phase 1 of the community.
16. The developer agrees to make available an additional twenty (20) acres, for a total of forty (40) acres, if the City of Gainesville has a need for a second school site. The Gainesville School Board would be required to pay fair market value for this last twenty (20) acres. The School Board shall identify a potential site no later than 180 days from closing, excluding any portions of the property that have been presented as Phase 1 of the community.
17. A site shall be made available within the boundaries of the proposed development to the City of Gainesville for a fire station and a precinct for the police department consisting of not more than two (2) acres of land which will be designated by the developer and reasonably approved by the Gainesville City Council for such public services. This site shall be made available by the developer without charge for the land, at any time within seven (7) years after the developer has provided paved access to the site. This site has been identified on the Concept Plan and the City of Gainesville shall have 180 days from closing to determine if the site meets their requirements or if another site is preferred, however any portions of the property that have been presented as Phase 1 of the community shall be excluded.
18. The plan shall include a fifty (50’) foot perimeter buffer separating all portions of the development from the existing single-family communities to the south of the project site. The specific parcels are shown on the buffer exhibit attached. The composition of this buffer, including any fencing deemed necessary, shall be subject to final approval by the Community and Economic Development Department Director.
19. Minimum five foot (5’) wide sidewalks with a two foot (2’) grass beauty strip shall be required as shown on the Pedestrian Access Plan filed with this request. Applicant, at his sole discretion, shall substitute a five foot (5’) sidewalk with a ten foot (10’) multi-use trail (asphalt or concrete) where indicated on the Pedestrian Access Plan to be maintained by the Homeowners Association (HOA).
20. All new streets shall meet the standards within the current Gainesville Unified Land Development Code, unless varied herein. All proposed residential uses, commercial uses and amenities shall provide for pedestrian connectivity throughout the development. All costs associated with the improvements shall be at the full expense of the developer.
21. All access point design for the subject property shall be submitted for review and approval by the Gainesville Public Works Director, Hall County and/or the Georgia Department of Transportation. The main access road, from Old Cornelia Highway to Applicant’s property shall be constructed by the City of Gainesville at its expense. Applicant shall be responsible for access beyond this point and any other access points to the property.

Conceptual Master Plan

Fold open to view

The development of the Community shall be controlled by this Narrative, the Master Plan, attached hereto, Zoning Condition Modifications referenced above and other exhibits provided as modified in the final approval. The Plan is considered conceptual in nature, and certain modifications to that Plan are anticipated as reflected in the specific language herein. Beyond such specific language, modifications of the location and arrangement of lots, roads, amenities and other improvements that do not materially conflict with specific standards and requirements of these conditions may be made by the Developer, so long as such modification does not materially alter the location or nature of improvements within 100 feet of the Community Boundary, or impact previously recorded residential sections, or change the land use or increase density.

# INTRODUCTION

The purpose of this study is to conduct a Traffic Impact Study (TIS) for the proposed residential development and a intersection analysis for the proposed site driveway on Old Cornelia Highway between White Sulphur Elementary School and Dana Drive. The development is located in Hall County, Georgia. The project location is shown in Figure 1.

**Figure 1: PROJECT LOCATION MAP**

The study intersections are shown below in Figure 2.

Figure 2: STUDY INTERSECTION MAP

## NEARBY PLANNED PROJECTS

The area surrounding the proposed study area was searched for potential information regarding other relevant projects. The following public entities were examined for projects that overlap in scope with this project:

- Federally funded transportation projects in the Statewide Transportation Improvement Program (STIP)
- MPO funded transportation projects in the Transportation Improvement Program (TIP)
- Transportation projects in the Regional Transportation Program (RTP), funded from local, state, and federal planning partners
- Georgia Department of Transportation projects identified in the GeoPI website

There is a single planned project that would impact this study. Information regarding this project is shown below in Table 1 below.

**Table 1: OTHER PLANNED PROJECTS**

| PUBLIC DOMAIN | PROJECT NUMBER | PROJECT TITLE                 | PROJECT BOUNDARY/INTERSECTION                                  | PRELIMINARY (PE) YEAR | CONSTRUCTION (CST) YEAR |
|---------------|----------------|-------------------------------|----------------------------------------------------------------|-----------------------|-------------------------|
| GeoPI         | 132280-        | Old Cornelia Highway Widening | Jesse Jewell Parkway/Old Cornelia Highway to Joe Chandler Road | 2051                  | 2051                    |

There is a long range widening project on Old Cornelia Highway between Jesse Jewell Parkway and Joe Chandler Highway scheduled to begin construction in 2051.

## PLANNED DEVELOPMENT

The proposed Sussex development is a residential development on approximately 472 acres. The site plan provides for 1,226 single-family homes, 924 multi-family homes, 190 townhomes, and a youth baseball park. The development is proposed to initially have one access on Old Cornelia Highway between White Sulphur Elementary School and Dana Drive, with two future entrances planned on Old Cornelia Highway south of Jesse Jewell Parkway and Floyd Road.

The development is projected to be constructed at a rate of 160 homes per year, and is anticipated to be built-out by 2035. For the purposes of the study, the development was evaluated in three phases:

- **Phase 1 (2025)** – A youth baseball park, 436 single family homes, 190 townhomes, and 174 multi-family homes.
- **Phase 2 (2030)** – 50 single family homes and 750 multi-family homes.
- **Phase 3 (2035)** – 740 single family homes

It was assumed that a second access point on Old Cornelia Highway would be open by 2030, and a third access point on Floyd Road would be open by 2035.

A site plan is shown in Figure 3. A larger scale site plan is included in Appendix A.

**Figure 3: SITE PLAN**

## EXISTING CONDITIONS

An inventory was conducted of the current conditions at the study intersections, including roadway geometry, traffic control, and traffic volumes.

The existing roadway geometry and traffic control in the study area are shown in Figure 4 below.

Figure 4: EXISTING CONDITIONS

## TURNING MOVEMENT VOLUMES

Turning Movement Counts (TMC's) were conducted at the study intersection on Wednesday, February 17, 2021 from 7:00 AM to 9:00 AM and from 4:30 PM to 6:30 PM. Turning movement data is provided in Appendix B.

Existing Peak Hour turning movement volumes are shown in Figure 5 below. The AM Peak Hour was found to be 7:15 to 8:15 AM, and the PM Peak Hour was found to be 4:45 to 5:45 PM.

**Figure 5: EXISTING 2021 TRAFFIC VOLUMES**

## AUTOMATIC TRAFFIC RECORDER

An Automatic Traffic Recorder (ATR) was placed on Old Cornelia Highway at GDOT Count Station #139-0210 to collect bi-directional 24-hour traffic data on Wednesday, February 17, 2021. The recorded daily volumes, truck percentages, and 85<sup>th</sup> percentile speed are shown in Figure 6 below. The ATR data can be found in Appendix C.

Figure 6: ATR DATA

## COVID-19 TRAFFIC VOLUME COMPARISON & ADJUSTMENT

Due to the COVID-19 pandemic, GDOT issued guidance on the collection of Turning Movement Counts (TMC's). One example of guidance provided by the document issued in April 2020 states the following, "prior to collecting counts, the engineer should identify the nearest Continuous Count Station (CCS) or Short-Term count station from GDOT's Traffic Analysis and Data Application (TADA)...Turning movement counts should be factored based on the comparison of data available in TADA ..."

The ATR data was collected on GDOT count station (139-0210) near the proposed development. The raw count data from September 2018 showed a daily volume of 14,113 and a K-factor of 10.9%. After applying a growth rate of 1.5%, the daily volume at the GDOT count station was projected to grow to 14,758 vehicles per day in 2021. A comparison of the daily volume from the projected 2021 count station data and the collected volume from the 2021 ATR data revealed a reduction of 9%. The data found at this count station can be found in Appendix D.

Additionally, the volumes were balanced between intersections, using the high point for the most conservative estimate.

Figure 7 below shows the balanced 2021 TMC volume adjusted for pre-COVID traffic.

**Figure 7: 2021 TRAFFIC VOLUMES (ADJUSTED)**

# SAFETY EVALUATION

## CRASH HISTORY

Crash data was analyzed to identify collision-prone movements at the study intersection. Data was obtained from the Georgia Electronic Accident Reporting System (GEARS) for the five most recent years. Detailed crash data is provided in Appendix E.

Table 2 summarizes the crash frequency at the intersection of Old Cornelia Highway and Dana Drive.

**Table 2: CRASH DATA SUMMARY, OLD CORNELIA HWY @ DANA DR**

| YEAR         | TOTAL CRASHES | INJURY CRASHES/ INJURIES | FATAL -ITIES | COLLISION WITH VEHICLE |          |          |            | COLLISION WITH ANIMAL OR STRUCTURE |
|--------------|---------------|--------------------------|--------------|------------------------|----------|----------|------------|------------------------------------|
|              |               |                          |              | RIGHT-ANGLE            | HEAD ON  | REAR END | SIDE-SWIPE |                                    |
| 2016         | 1             | 1/1                      | 0            | 0                      | 0        | 0        | 0          | 1                                  |
| 2017         | 0             | 0/0                      | 0            | 0                      | 0        | 0        | 0          | 0                                  |
| 2018         | 1             | 0/0                      | 0            | 0                      | 0        | 0        | 0          | 1                                  |
| 2019         | 1             | 0/0                      | 0            | 0                      | 0        | 1        | 0          | 0                                  |
| 2020         | 1             | 0/0                      | 0            | 1                      | 0        | 0        | 0          | 0                                  |
| <b>Total</b> | <b>4</b>      | <b>1/1</b>               | <b>0</b>     | <b>1</b>               | <b>0</b> | <b>1</b> | <b>0</b>   | <b>2</b>                           |

According to the crash history, collisions with an animal or structure were the most prominent type of crash, accounting for 50% of the total collisions in the past five years. No fatalities were reported during this time period.

Table 3 summarizes the crash frequency at the intersection of Old Cornelia Highway and White Sulphur Elementary School.

**Table 3: CRASH DATA SUMMARY, OLD CORNELIA HWY @ WHITE SULPHUR ELEMENTARY SCHOOL**

| YEAR         | TOTAL CRASHES | INJURY CRASHES/ INJURIES | FATAL -ITIES | COLLISION WITH VEHICLE |          |          |            | COLLISION WITH ANIMAL OR STRUCTURE |
|--------------|---------------|--------------------------|--------------|------------------------|----------|----------|------------|------------------------------------|
|              |               |                          |              | RIGHT-ANGLE            | HEAD ON  | REAR END | SIDE-SWIPE |                                    |

| 2019         | 2                | 1/3                            | 0               | 1                      | 0          | 0           | 1              | 0                                        |
| 2020         | 3                | 1/1                            | 0               | 1                      | 0          | 0           | 1              | 1                                        |
| <b>Total</b> | <b>24</b>        | <b>5/8</b>                     | <b>0</b>        | <b>8</b>               | <b>1</b>   | <b>4</b>    | <b>6</b>       | <b>5</b>                                 |

According to the crash history, right angle collisions were the most prominent type of crash, accounting for 33% of the total collisions in the past five years. No fatalities were reported during this time period.

# TRAFFIC PROJECTION METHODOLOGY

The methodology used to estimate future traffic growth included the examination of Hall County census data and historic trends from the nearby GDOT count stations.

## CENSUS DATA

The census data from the Hall County Strategic Plan developed in 2018 is shown in Table 5. The Strategic Plan is included in Appendix F.

**Table 5: CENSUS DATA: HALL COUNTY STRATEGIC PLAN**

| HALL COUNTY |            |          |                   |
|-------------|------------|----------|-------------------|
| YEAR        | POPULATION | % CHANGE | % CHANGE PER YEAR |
| 2010        | 189,684    | -        | -                 |
| 2040        | 371,570    | 95.9%    | 2.27%             |

Source: Hall County Strategic Plan (2018 – 2028)

The data shows an increase of the population in Hall County of 95.9%, or a yearly rate of 2.27%, between 2010 and 2040.

The most recent Hall County population data from the Atlanta Regional Commission (ARC) was developed in 2015 and is shown in Table 6. The ARC population data is included in Appendix G.

**Table 6: CENSUS DATA: ATLANTA REGIONAL COMMISSION**

| HALL COUNTY |            |          |                   |
|-------------|------------|----------|-------------------|
| YEAR        | POPULATION | % CHANGE | % CHANGE PER YEAR |
| 2015        | 200,586    | -        | -                 |
| 2050        | 289,128    | 44.1%    | 1.05%             |

Source: Atlanta Regional Commission, 2050 Population Forecast: Hall County

According to the ARC data, the population will see an increase of 44.1%, or a yearly rate of 1.05%, between 2015 and 2050.

## HISTORIC TRAFFIC DATA

The GDOT maintains multiple annual traffic count stations in the vicinity of the study area. This data was used to establish historic growth rates in the area. Figure 8 below shows the count stations in the study area.

**Figure 8: NEARBY GDOT COUNT STATIONS**

Table 7 summarizes the average annual daily traffic (AADT) reported by the GDOT for each of the years 2010 through 2020. Historic data reported by the GDOT for each of the count stations can be found in Appendix D.

**Table 7: HISTORIC TRAFFIC DATA**

| Year | GDOT Count Station 139-0210 | GDOT Count Station 139-0223 |
|------|-----------------------------|-----------------------------|
| 2010 | *10,900                     | *7,890                      |
| 2011 | *10,600                     | 9,170                       |
| 2012 | 10,964                      | *8,260                      |
| 2013 | *9,620                      | *8,440                      |
| 2014 | *9,620                      | *8,440                      |
| 2015 | *9,940                      | 9,300                       |
| 2016 | 11,184                      | *8,790                      |
| 2017 | *10,800                     | *8,850                      |
| 2018 | 14,113                      | *8,780                      |
| 2019 | *13,000                     | 9,540                       |
| 2020 | 12,442                      | -                           |

\*Estimated counts not used in trend analysis.

## TREND ANALYSIS

Figures 9 and 10, on the following pages, show graphs of the historic AADT as reported by the GDOT. A trend line is shown for each count station. Gaps in the graphs represent years for which data was estimated, which are not used in the analysis, per GDOT policy.

**Figure 9: 5-YEAR TREND LINES FOR GDOT COUNT STATIONS**

**Figure 10: 10-YEAR TREND LINES FOR GDOT COUNT STATIONS**

Growth rates were developed based on the 5-year and 10-year analyses of count station data shown above. Table 8 shows the resulting trend rates.

**Table 8: TREND ANALYSIS FOR COUNT STATION DATA**

| GDOT Count Stations                     | 5-year | 10-year |
|-----------------------------------------|--------|---------|
| 139-0210                                | 2.15%  | 1.27%   |
| 139-0223                                | 0.00%  | 0.40%   |
| Blended Trend Rates from Count Stations | 1.37%  | 0.95%   |

Note: Rates are calculated based on annual compounding.

## GROWTH RATE

The Hall County Strategic Plan projects an annual population growth rate of 2.27%. The ARC's population forecast for Hall County projects annual population growth rate to be 1.05% for the county. Based on the data available from the nearby GDOT count station, the growth trend was calculated to be 1.37% for the past five years, and 0.95% for the past ten years.

Based on these rates and the surrounding area, the background traffic growth rate was established to be **1.5%** from the Existing year (2021) to the Phase 3 Build year (2035), for the purposes of the study.

## GROWTH FACTOR

A growth factor was established by applying the growth rates to the following equation, shown below:

$$\text{Growth Factor} = (1 + r)^n$$

Where:

**r** = growth rate

**n** = number of years

The volumes projections were calculated using the following values as 'n', taken as the time period between the 2021 Existing year and each corresponding phase.

- Existing Year (2021) to Phase 1 Build Year (2025) – n=4
- Existing Year (2021) to Phase 2 Build Year (2030) – n=9
- Existing Year (2021) to Phase 3 Build Year (2035) – n=14

Growth factors are provided in Table 9.

**Table 9: GROWTH FACTORS**

| PROJECTED YEARS           |                           |                           |
|---------------------------|---------------------------|---------------------------|
| Phase 1 Build Year (2025) | Phase 2 Build Year (2030) | Phase 3 Build Year (2035) |
| 1.06                      | 1.14                      | 1.23                      |

Figures 11 through 13 on the following pages show the estimated No-Build traffic volumes at the study intersections for each Phase (2025, 2030, 2035).

# PROJECTED CONDITIONS

## TRIP GENERATION

The trips generated by the development were estimated using trip generation rates found in ITE's publication *Trip Generation*, 10<sup>th</sup> Edition. *TripGen 10* software from Trafficware was used to facilitate the calculation. The trip generation publication contains multiple associated trip rates for the listed land uses. The rate that resulted in the larger trip generation was used for this study.

The development is scheduled to be constructed at a rate of 160 homes per year, and was evaluated in three phases: Phase 1 (2025), Phase 2 (2030), and Phase 3 (2035). Each phase of the trip generation is cumulative and includes the previous phase.

The weekday AM and PM Peak Hour trip generation estimates correspond to the peak hour of the adjacent street. It was assumed that 50% of the trips generated by the baseball park would be internal capture trips, generated by the residential land uses. Tables 10 through 12 summarizes the trip generation results. The trip generation data is provided in Appendix H.

**Table 10: TRIP GENERATION, PHASE 1 (2025)**

| ITE CODE                         | LAND USE                       | SIZE     | DAILY TRIPS | AM PEAK HOUR |      |       | PM PEAK HOUR |      |       |
|----------------------------------|--------------------------------|----------|-------------|--------------|------|-------|--------------|------|-------|
|                                  |                                |          |             | ENTER        | EXIT | TOTAL | ENTER        | EXIT | TOTAL |

| <b>UNADJUSTED VOLUME</b>                |                                |          | 18,585      | 349          | 1,032 | 1,381 | 1,144        | 689  | 1,833 |
| <b>INTERNAL CAPTURE TRIPS</b>           |                                |          | -50         | -0           | -0    | -0    | -6           | -6   | -12   |
| <b>VOLUME ADDED TO ADJACENT STREETS</b> |                                |          | 18,535      | 349          | 1,032 | 1,381 | 1,138        | 683  | 1,821 |

The development is proposed to have a main driveway on Old Cornelia Highway between White Sulphur Elementary School and Dana Drive, with additional driveways added to the development in 2030 and 2035, respectively. The following assumptions were made for each build phase:

- **Phase 1 (2025)** - 100% of the trips would use the main driveway.
- **Phase 2 (2030)** – 80% of the trips would use the main driveway, and the remaining trips would use the secondary access point on Old Cornelia Highway.
- **Phase 3 (2035)** – 60% of the trips would use the main driveway, and the remaining trips would use the other access points on Old Cornelia Highway and Floyd Road.

## TRIP DISTRIBUTION

In order to develop a distribution pattern for residential trips, the TMC data of the study area was analyzed and used to determine the percentage of traffic passing the proposed residential driveways for the new trips. The trip distribution percentages were based on the AM traffic pattern.

Figure 14 below shows the resulting trip distribution pattern that was used to assign the new generated traffic for the residential land uses.

**Figure 14: TRIP DISTRIBUTION PATTERN**

## TRAFFIC ASSIGNMENT

Tables 13 through 15 shows how the distributed trips are expected to enter and exit the development for each phase, according to the direction traveled.

**Table 13: NEW TRIPS ASSIGNMENT, PHASE 1 (2025)**

## New Trips

The new trips generated by the development for each phase are shown in Figures 15 through 17 on the following pages. These trips are based on the assumptions from the traffic assignment.

**Figure 15: NEW TRIPS, PHASE 1 (2025)**

Figure 16: NEW TRIPS, PHASE 2 (2030)

Figure 17: NEW TRIPS, PHASE 3 (2035)

## Total Peak Hour Traffic Volumes

The Total Peak Hour Traffic Volumes for each phase are derived by combining the New Trips (Figures 15 through 17) with the No-Build Volumes (Figures 11 through 13). The Projected 2025 Peak Hour Traffic Volumes are shown below in Figure 18, and the Projected 2030 and 2035 Peak Hour Traffic Volumes are shown on the following pages in Figure 19 and 20.

**Figure 18: TOTAL PEAK HOUR TRAFFIC VOLUMES, PHASE 1 (2025)**

Figure 19: TOTAL PEAK HOUR TRAFFIC VOLUMES, PHASE 2 (2030)

Figure 20: TOTAL PEAK HOUR TRAFFIC VOLUMES, PHASE 3 (2035)

## CAPACITY ANALYSIS

Existing and projected conditions were evaluated using capacity analysis techniques described in the *Highway Capacity Manual, Special Report 209*, published by the Transportation Research Board, 2016. *Synchro 10* from Trafficware was used to facilitate the analysis. HCM level-of-service (LOS) definitions are shown in Table 16. The target LOS at the study intersection is 'D' or better.

**Table 16: LEVEL OF SERVICE CRITERIA**

| LEVEL OF SERVICE | DELAY PER VEHICLE (SECONDS) |                            |
|------------------|-----------------------------|----------------------------|
|                  | SIGNALIZED INTERSECTIONS    | UNSIGNALIZED INTERSECTIONS |
| A                | ≤10.0                       | ≤10.0                      |
| B                | 10.1 to 20.0                | 10.1 to 15.0               |
| C                | 20.1 to 35.0                | 15.1 to 25.0               |
| D                | 35.1 to 55.0                | 25.1 to 35.0               |
| E                | 55.1 to 79.9                | 35.1 to 49.9               |
| F                | >80.0                       | >50.0                      |

## EXISTING CONDITIONS

The intersections included in the study were first evaluated using the existing geometry and volumes. The results of the capacity analysis for the intersections are summarized in Table 17. For each condition, the level of service is shown, followed parenthetically by the average delay per vehicle, in seconds. The capacity analysis reports for the intersections under existing conditions are provided in Appendix I.

**Table 17: CAPACITY ANALYSIS RESULTS - EXISTING CONDITIONS**

| INTERSECTION                                       | MOVEMENT | EXISTING YEAR (2021) |                 |
|----------------------------------------------------|----------|----------------------|-----------------|
|                                                    |          | AM PEAK HOUR         | PM PEAK HOUR    |
| Old Cornelia Hwy @ Dana Dr                         | EBT/R    | -                    | -               |
|                                                    | WBL/T    | A (8.4)              | -               |
|                                                    | NBL/R    | D (29.2)             | <b>E (38.6)</b> |

|                                                    | NBL/R    | <b>F (161.5)</b>     | <b>E (38.2)</b> |
| Old Cornelia Hwy @ Oconee Cir                      | EBL      | B (10.3)             | A (8.8)         |
|                                                    | EBT      | -                    | -               |
|                                                    | EBR      | -                    | -               |
|                                                    | WBL      | A (8.6)              | B (10.7)        |
|                                                    | WBT/R    | -                    | -               |
|                                                    | NBL/T/R  | C (18.7)             | <b>F (95.1)</b> |
|                                                    | SBL/T/R  | D (32.5)             | C (15.9)        |

Capacity results indicate that the following intersections are experiencing unacceptable operation under existing conditions:

- Old Cornelia Highway and Dana Drive, which currently operates at LOS ‘E’ on the northbound approach in the PM Peak Hour.
- Old Cornelia Highway and White Sulphur Elementary School, which currently operates at LOS ‘E’ or worse on the northbound approach in both peak hours.
- Old Cornelia Highway and Oconee Circle, which currently operates at LOS ‘F’ on the northbound approach in the PM Peak Hour.

## PROJECTED NO-BUILD CONDITIONS

The projected No-Build conditions include the existing geometry and the background growth volumes without the new trips generated from the development. The capacity analysis results for each of the study intersections under projected No-Build conditions for each Phase (2025, 2030, and 2035) are provided in Table 18 below. The capacity analysis reports for the intersections under projected No-Build conditions can be found in Appendix J.

**Table 18: CAPACITY ANALYSIS RESULTS – NO-BUILD CONDITIONS**

| INTERSECTION                                       | MOVEMENT | PHASE 1 (2025)   |                  | PHASE 2 (2030)   |                  | PHASE 3 (2035)   |                  |

|                                                    | NBL/T/R  | C (21.7)         | <b>F (157.9)</b> | D (27.5)         | <b>F (334.3)</b> | <b>F (56.9)</b>  | <b>F (619.0)</b> |
|                                                    | SBL/T/R  | <b>E (40.6)</b>  | C (17.0)         | <b>F (57.9)</b>  | C (18.8)         | <b>F (96.0)</b>  | C (21.6)         |

Capacity results indicate that the following intersections are projected to experience unacceptable operation under No-Build conditions:

- Phase 1 (2025):
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'E' on the northbound approach in the PM Peak Hour.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'E' on the northbound approach in the PM Peak Hour and LOS 'F' in the AM Peak Hour.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'E' on the southbound approach in the AM Peak Hour and at LOS 'F' on the northbound approach in the PM Peak Hour.
- Phase 2 (2030):
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'E' on the northbound approach in the AM Peak Hour and LOS 'F' in the PM Peak Hour.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'F' on the southbound approach in the AM Peak Hour and at LOS 'F' on the northbound approach in the PM Peak Hour.
- Phase 3 (2035):
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'E' on the northbound approach in the AM Peak Hour and LOS 'F' in the PM Peak Hour.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'F' on the southbound approach in the AM Peak Hour and at LOS 'F' on the northbound approach in both peak hours.

## PROJECTED BUILD CONDITIONS

The projected Build conditions include the existing geometry and the Total Peak Hour Traffic Volumes, which includes the background growth and new trips generated by the development. The capacity analysis results for each of the study intersections under projected Build conditions are provided in Table 19. The capacity analysis reports for the intersections under projected Build conditions can be found in Appendix K.

**Table 19: CAPACITY ANALYSIS RESULTS – BUILD CONDITIONS**

| INTERSECTION                                       | MOVEMENT | PHASE 1 (2025)   |                  | PHASE 2 (2030)   |                  | PHASE 3 (2035)   |                  |

Capacity results indicate that the following intersections are projected to experience unacceptable operation under Build conditions:

- Phase 1 (2025):
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'E' on the northbound approach in the AM Peak Hour and LOS 'F' in the PM Peak Hour.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'F' on the southbound approach in the AM Peak Hour and at LOS 'E' or worse on the northbound approach in both peak hours.
  - Old Cornelia Highway and Driveway #1, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
- Phase 2 (2030):
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'E' or worse on the southbound approach in both peak hours and at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and Driveway #1, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
- Phase 3 (2035):
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'F' on the southbound approach in both peak hours and at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and Driveway #1, which is projected to operate at LOS 'F' on the northbound approach in both peak hours and at LOS 'F' on the westbound approach in the PM Peak Hour.

## PROJECTED CONDITIONS WITH WIDENING

A long range widening project on Old Cornelia Highway is scheduled to begin construction after the completion of Phase 3 (2035) of the development. In order to evaluate potential improvements to the study area, the No-Build and Build condition volumes were evaluated for all three phases with Old Cornelia Highway widened to four lanes.

The capacity analysis results for each of the study intersections under projected No-Build conditions with widening on Old Cornelia Road are provided in Table 20. The capacity analysis reports for the intersections under projected No-Build and Build conditions with the widening project can be found in Appendix L.

**Table 20: CAPACITY ANALYSIS RESULTS – NO-BUILD CONDITIONS WITH WIDENING**

| INTERSECTION                                       | MOVEMENT | PHASE 1 (2025)  |                 | PHASE 2 (2030)  |                  | PHASE 3 (2035)   |                  |

|                                                    | SBL/T/R  | C (23.7)        | B (14.8)        | D (29.6)        | C (16.2)         | <b>E (40.8)</b>  | C (18.3)         |

Capacity results indicate that the following intersections are projected to experience unacceptable operation under No-Build conditions with widening on Old Cornelia Highway:

- Phase 1 (2025):
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'E' on the northbound approach in the PM Peak Hour.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'F' on the northbound approach in the AM Peak Hour.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'F' on the northbound approach in the PM Peak Hour.
- Phase 2 (2030):
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'E' in the PM Peak Hour.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'E' or worse on the northbound approach in both peak hours.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'F' on the northbound approach in the PM Peak Hour.
- Phase 3 (2035):
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'F' on the northbound approach in the PM Peak Hour.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'E' on the southbound approach in the AM Peak Hour and at LOS 'F' on the northbound approach in the PM Peak Hour.

The capacity analysis results for each of the study intersections under projected Build conditions with widening on Old Cornelia Road are provided in Table 21.

Capacity results indicate that the following intersections are projected to experience unacceptable operation under Build conditions with widening on Old Cornelia Highway:

- Phase 1 (2025):
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'F' on the northbound approach in the PM Peak Hour.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'E' on the southbound approach in the AM Peak Hour and at LOS 'F' on the northbound approach in the PM Peak Hour.
  - Old Cornelia Highway and Driveway #1, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
- Phase 2 (2030):
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'F' on the northbound approach in the PM Peak Hour.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'E' or worse on the southbound approach in both peak hours and at LOS 'F' on the northbound approach in the PM Peak Hour.
  - Old Cornelia Highway and Driveway #1, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
- Phase 3 (2035):
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'E' or worse on the northbound approach in both peak hours.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'F' on the northbound approach in both peak hours.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'F' on the southbound approach in both peak hours and at LOS 'F' on the northbound approach in the PM Peak Hour.
  - Old Cornelia Highway and Driveway #1, which is projected to operate at LOS 'F' on the northbound approach in both peak hours and at LOS 'F' on the westbound approach in the PM Peak Hour.

## DRIVEWAY #1 IMPROVEMENTS

The intersection of Old Cornelia Highway and Driveway #1 was evaluated for alternative traffic control. Due to the close proximity to the intersections with White Sulphur Elementary School and Dana Drive, these improvements were evaluated with those intersections to observe how they operate. The following improvements were evaluated at Old Cornelia Highway and Driveway #1:

- Minor Street Stop Control, with added turn lanes
- Traffic Signal
- Multilane Roundabout

Additionally, each alternative was evaluated under two scenarios: with the existing geometry and with four lane widening on Old Cornelia Highway.

In order to determine if a signal would be warranted at the intersection, the 8<sup>th</sup> highest hour volume was estimated and compared to the volume thresholds of Warrants #1 and #2, which are established in the *MUTCD* handbook. The daily volume was estimated from the highest peak hour volume and the K-factor, which was found from the ATR data to be 9.4% on SR 81. The 8<sup>th</sup> highest hour, which is estimated to be 5.6% of the daily traffic in accordance with the GDOT Design Manual, was then calculated from the daily volume through the intersection.

Further analysis was conducted to check each of the intersections against Warrant 2 – Four Hour Vehicular Volume. The 4<sup>th</sup> highest hour was calculated to be 7.8% from the K-factor and the 8<sup>th</sup> highest hour.

The warrant analysis was conducted in two ways: the conventional method, using the side street Volumes.

Table 22 and 23 on the following page summarizes the results of the signal warrants with the conventional method, using the 70% thresholds for the study intersection. Signal Warrants were evaluated using 2025, 2030, and 2035 Build volumes, the 8<sup>th</sup> highest hour method, and the 4<sup>th</sup> highest hour.

$$\text{Estimated Daily Volume} = \frac{\text{Highest Peak Hour Volume}}{K - \text{factor}}$$

**2025:**  $\text{Estimated Daily Volume}_{\text{Major Street, 2025}} = \frac{1491}{.094} \approx 15862$   
 $\text{Estimated Daily Volume}_{\text{Minor Street, 2025}} = \frac{210}{.094} \approx 2234$

**2030:**  $\text{Estimated Daily Volume}_{\text{Major Street, 2030}} = \frac{1616}{.094} \approx 17191$   
 $\text{Estimated Daily Volume}_{\text{Minor Street, 2030}} = \frac{265}{.094} \approx 2819$

**2035:**  $\text{Estimated Daily Volume}_{\text{Major Street, 2035}} = \frac{1756}{.094} \approx 18680$   
 $\text{Estimated Daily Volume}_{\text{Minor Street, 2035}} = \frac{329}{.094} \approx 3500$

$$8\text{th Highest Hour Volume} = \frac{\text{Highest Peak Hour Volume}}{K - \text{factor}} * .056$$

**2025:**  $8\text{th Highest Hour Volume}_{\text{Major Street, 2025}} = \frac{1491}{.094} * .056 \approx 888$   
 $8\text{th Highest Hour Volume}_{\text{Minor Street, 2025}} = \frac{210}{.094} * .056 \approx 125$

**2030:**  $8\text{th Highest Hour Volume}_{\text{Major Street, 2030}} = \frac{1616}{.094} * .056 \approx 963$   
 $8\text{th Highest Hour Volume}_{\text{Minor Street, 2030}} = \frac{265}{.094} * .056 \approx 158$

**2035:**  $8\text{th Highest Hour Volume}_{\text{Major Street, 2035}} = \frac{1756}{.094} * .056 \approx 1046$   
 $8\text{th Highest Hour Volume}_{\text{Minor Street, 2035}} = \frac{329}{.094} * .056 \approx 196$

$$\frac{4\text{th Highest Hour Volume}}{K - \text{factor}} = \frac{\text{Highest Peak Hour Volume}}{K - \text{factor}} * (.056 + (K \text{ factor} - .056) \left(\frac{4}{7}\right))$$

**2025:**  $4\text{th Highest Hour Volume}_{\text{Major Street, 2025}} = \frac{1491}{.094} * (.056 + (.038) \left(\frac{4}{7}\right)) \approx 1233$   
 $4\text{th Highest Hour Volume}_{\text{Minor Street, 2025}} = \frac{210}{.094} * (.056 + (.038) \left(\frac{4}{7}\right)) \approx 174$   
**2030:**  $4\text{th Highest Hour Volume}_{\text{Major Street, 2030}} = \frac{1616}{.094} * (.056 + (.038) \left(\frac{4}{7}\right)) \approx 1336$   
 $4\text{th Highest Hour Volume}_{\text{Minor Street, 2030}} = \frac{265}{.094} * (.056 + (.038) \left(\frac{4}{7}\right)) \approx 219$   
**2035:**  $4\text{th Highest Hour Volume}_{\text{Major Street, 2035}} = \frac{1756}{.094} * (.056 + (.038) \left(\frac{4}{7}\right)) \approx 1452$   
 $4\text{th Highest Hour Volume}_{\text{Minor Street, 2035}} = \frac{329}{.094} * (.056 + (.038) \left(\frac{4}{7}\right)) \approx 272$

**Table 22: TRAFFIC SIGNAL WARRANTS (CONVENTIONAL METHOD), EXISTING GEOMETRY**

| YEAR | HIGHEST PEAK HOUR VOLUMES (MAJOR/MINOR) | ESTIMATED DAILY VOLUME | 8 <sup>th</sup> HIGHEST PEAK HOUR (Warrant 1) | Warrant 1A       | Warrant 1B      | 4 <sup>th</sup> HIGHEST PEAK HOUR (Warrant 2) | Warrant 2        |

**Table 23: TRAFFIC SIGNAL WARRANTS (CONVENTIONAL METHOD), FOUR LANE GEOMETRY**

| YEAR | HIGHEST PEAK HOUR VOLUMES (MAJOR/MINOR) | ESTIMATED DAILY VOLUME | 8 <sup>th</sup> HIGHEST PEAK HOUR (Warrant 1) | Warrant 1A       | Warrant 1B      | 4 <sup>th</sup> HIGHEST PEAK HOUR (Warrant 2) | Warrant 2        |
|------|-----------------------------------------|------------------------|-----------------------------------------------|------------------|-----------------|-----------------------------------------------|------------------|
|      |                                         |                        |                                               | (70%)<br>420/105 | (70%)<br>630/70 |                                               | (70%)<br>1000/80 |
| 2025 | 1491/210                                | 15862/2234             | 888/125                                       | Y/Y              | Y/Y             | 1233/174                                      | Y/Y              |
| 2030 | 1616/265                                | 17191/2819             | 963/158                                       | Y/Y              | Y/Y             | 1336/219                                      | Y/Y              |
| 2035 | 1756/329                                | 18680/3500             | 1046/196                                      | Y/Y              | Y/Y             | 1452/272                                      | Y/Y              |

Warrant analysis indicates that the intersection meets the 100% threshold for signal warrants 1 and 2 using the conventional method beginning in 2025 for both existing and proposed geometry.

## MINOR STREET STOP CONTROL, WITH ADDED TURN LANES

The first alternative evaluated at the site driveway was minor street stop control with added turn lanes. Figure 21 below shows the intersection with turn lane improvements and with the existing and four lane geometry.

Figure 21: MINOR STREET STOP CONTROL, WITH ADDED TURN LANES

The capacity analysis results for the site driveway are provided in Tables 24 and 25. The delay for the intersections at White Sulphur Elementary School and Dana Drive maintain the same results listed in Tables 19 and 21. Capacity analysis results for each of the Driveway #1 improvements and the nearby intersections are included in Appendix M.

**Table 24: CAPACITY ANALYSIS RESULTS – ADDED TURN LANES (TWO LANE GEOMETRY)**

| INTERSECTION                   | MOVEMENT | PHASE 1 (2025)   |                 | PHASE 2 (2030) |                 | PHASE 3 (2035) |                  |

|                                | EBR      | -                | -            | -                | -            | -              | -            |
|                                | WBL      | A (8.8)          | B (14.2)     | A (9.1)          | C (17.0)     | A (9.4)        | C (24.2)     |
|                                | WBT      | -                | -            | -                | -            | -              | -            |
|                                | NBL      | <b>F (247.2)</b> | <b>F (*)</b> | <b>F (573.3)</b> | <b>F (*)</b> | <b>F (*)</b>   | <b>F (*)</b> |
|                                | NBR      | B (12.0)         | C (15.7)     | B (13.2)         | C (18.1)     | C (15.1)       | C (22.5)     |

Capacity results for the site driveway with added turn lanes indicate the following:

- Existing Geometry
  - Phase 1 (2025)
    - The northbound left turn movement is projected to operate at LOS 'F' for both peak hours.
    - The northbound right turn movement is projected to operate at LOS 'E' in the PM Peak Hour.
  - Phase 2 (2030)
    - The northbound left turn movement is projected to operate at LOS 'F' for both peak hours.
    - The northbound right turn movement is projected to operate at LOS 'F' in the PM Peak Hour.
  - Phase 3 (2035)
    - The northbound left turn movement is projected to operate at LOS 'F' for both peak hours.
    - The Northbound right turn movement is projected to operate at LOS 'F' in the PM Peak Hour.
- Four Lane Geometry
  - Phase 1 (2025)
    - The northbound left turn movement is projected to operate at LOS 'F' for both peak hours.
  - Phase 2 (2030)
    - The northbound left turn movement is projected to operate at LOS 'F' for both peak hours.
  - Phase 3 (2035)
    - The northbound left turn movement is projected to operate at LOS 'F' for both peak hours.

Tables 26 and 27 below shows the corresponding 95<sup>th</sup> percentile queue lengths (in feet) for each approach at the intersection of Old Cornelia Highway and Driveway #1, as well as the adjacent intersections.

**Table 26: 95<sup>TH</sup> PERCENTILE QUEUE LENGTH (FT) – ADDED TURN LANES (TWO LANE GEOMETRY)**

| INTERSECTION                                       | MOVEMENT | PHASE 1 (2025) |              | PHASE 2 (2030) |              | PHASE 3 (2035) |              |

## TRAFFIC SIGNAL

The second alternative evaluated at the site driveway was a traffic signal, with additional turn lanes. Figure 22 below shows the intersection under signal control and with the existing and four lane geometry.

**Figure 22: TRAFFIC SIGNAL, WITH ADDED TURN LANES**

The capacity analysis results for the site driveway are provided in Tables 28 and 29.

**Table 28: CAPACITY ANALYSIS RESULTS – TRAFFIC SIGNAL (TWO LANE GEOMETRY)**

| INTERSECTION                      | MOVEMENT | PHASE 1 (2025) |                 | PHASE 2 (2030) |                 | PHASE 3 (2035)  |                  |

Capacity results for the site driveway under signal control indicate the following:

- Existing Geometry
  - Phase 1 (2025)
    - The traffic signal is projected to operate at LOS 'B' for both peak hours.
  - Phase 2 (2030)
    - The traffic signal is projected to operate at LOS 'D' or better for both peak hours.
  - Phase 3 (2035)
    - The traffic signal is projected to operate at LOS 'C' in the AM Peak Hour and LOS 'E' in the PM Peak Hour.
- Four Lane Geometry
  - Phase 1 (2025)
    - The traffic signal is projected to operate at LOS 'A' for both peak hours.
  - Phase 2 (2030)
    - The traffic signal is projected to operate at LOS 'B' or better for both peak hours.
  - Phase 3 (2035)
    - The traffic signal is projected to operate at LOS 'B' for both peak hours.

Tables 30 and 31 below shows the corresponding 95<sup>th</sup> percentile queue lengths (in feet) for each approach at the intersection of Old Cornelia Highway and Driveway #1, as well as the adjacent intersections.

**Table 30: 95<sup>TH</sup> PERCENTILE QUEUE LENGTH (FT) – TRAFFIC SIGNAL (TWO LANE GEOMETRY)**

Based on the queuing analysis, the traffic signal will experience queues that will extend into the adjacent intersections with both the existing and four lane geometry beginning in Phase 1 (2025).

## ROUNDAABOUT

The third alternative evaluated at the site driveway was a roundabout. This alternative was evaluated as a single lane roundabout with the existing geometry, and as a multilane roundabout with widened four lane geometry. Figure 23 below shows the intersection under roundabout control improvements and with the existing and four lane geometry.

**Figure 23: SINGLE/MULTILANE ROUNDAABOUT**

The capacity analysis results for the site driveway are provided in Tables 32 and 33.

**Table 32: CAPACITY ANALYSIS RESULTS – SINGLE LANE ROUNDABOUT (TWO LANE GEOMETRY)**

| INTERSECTION                   | MOVEMENT | PHASE 1 (2025)  |                  | PHASE 2 (2030)   |                  | PHASE 3 (2035)   |                  |

Capacity results for the site driveway under roundabout control indicate the following:

- Existing Geometry
  - Phase 1 (2025)
    - The single lane roundabout is projected to operate at LOS 'F' on the westbound approach in the AM Peak Hour.
    - The single lane roundabout is projected to operate at LOS 'F' on the eastbound approach in the PM Peak Hour.
  - Phase 2 (2030)
    - The single lane roundabout is projected to operate at LOS 'F' on the westbound approach in the AM Peak Hour.
    - The single lane roundabout is projected to operate at LOS 'F' on the eastbound approach in the PM Peak Hour.
  - Phase 3 (2035)
    - The single lane roundabout is projected to operate at LOS 'F' on the westbound approach in the AM Peak Hour.
    - The single lane roundabout is projected to operate at LOS 'E' on the northbound approach in the AM Peak Hour.
    - The single lane roundabout is projected to operate at LOS 'F' on the eastbound approach in the PM Peak Hour.
- Four Lane Geometry
  - Phase 1 (2025)
    - The multilane roundabout is projected to operate at LOS 'B' or better for both peak hours on all approaches.
  - Phase 2 (2030)
    - The multilane roundabout is projected to operate at LOS 'B' or better for both peak hours on all approaches.
  - Phase 3 (2035)
    - The multilane roundabout is projected to operate at LOS 'C' or better for both peak hours on all approaches.

Tables 34 and 35 below shows the corresponding 95<sup>th</sup> percentile queue lengths (in feet) for each approach at the intersection of Old Cornelia Highway and Driveway #1, as well as the adjacent intersections.

**Table 34: 95<sup>TH</sup> PERCENTILE QUEUE LENGTH (FT) – SINGLE LANE ROUNDABOUT (TWO LANE GEOMETRY)**

Based on the queuing analysis, both the single lane and multilane roundabouts will experience queues that will extend into the adjacent intersections beginning in Phase 1 (2025).

## DRIVEWAY #1 CONSOLIDATED IMPROVEMENTS

The alternatives evaluated at the intersection of Old Cornelia Highway and Driveway #1 either do not sufficiently improve operation at the intersection or creates queues that block the nearby unsignalized intersections at White Sulphur Elementary School and Dana Drive. Therefore, additional alternatives were evaluated to implement access control and improve the operation of the existing minor street stop controlled intersections.

The following alternatives were evaluated at Old Cornelia Highway and Driveway #1:

- Traffic Signal, with Dana Drive and White Sulphur Elementary School consolidated at the proposed location of Driveway #1
- Dumbbell Roundabout, with Dana Drive consolidated with Driveway #1
- Elliptical Roundabout

Additionally, each alternative was evaluated under two scenarios: with the existing geometry and with four lane widening on Old Cornelia Highway.

Capacity analysis results for each of the Driveway #1 consolidated improvements are included in Appendix N.

## ALTERNATIVE A: TRAFFIC SIGNAL

The first consolidation alternative evaluated was a traffic signal. In this scenario, both White Sulphur Elementary School and Dana Drive would have access to the development road and have a single access point to Old Cornelia Highway from Driveway #1. Figure 24 below shows the consolidated intersection under signal control and with the existing and four lane geometry.

Figure 24: TRAFFIC SIGNAL, CONSOLIDATED DRIVEWAY

The capacity analysis results for the site driveway are provided in Tables 36 and 37.

**Table 36: CAPACITY ANALYSIS RESULTS – ALTERNATIVE A (TWO LANE GEOMETRY)**

|                                | NBR      | -              | -            | -              | -            | -              | -            |

Capacity results for the consolidated site driveway under traffic control indicate the following:

- Existing Geometry
  - Phase 1 (2025)
    - The traffic signal is projected to operate at LOS 'B' for both peak hours.
  - Phase 2 (2030)
    - The traffic signal is projected to operate at LOS 'D' or better for both peak hours.
  - Phase 3 (2035)
    - The traffic signal is projected to operate at LOS 'C' in the AM Peak Hour and LOS 'F' in the PM Peak Hour.
- Four Lane Geometry
  - Phase 1 (2025)
    - The traffic signal is projected to operate at LOS 'A' for both peak hours.
  - Phase 2 (2030)
    - The traffic signal is projected to operate at LOS 'B' for both peak hours.
  - Phase 3 (2035)
    - The traffic signal is projected to operate at LOS 'B' for both peak hours.

## ALTERNATIVE B: DUMBBELL ROUNDABOUT

The second consolidation alternative evaluated was a dumbbell roundabout. A dumbbell roundabout consists of two roundabouts connected together in a relatively short distance. The first roundabout is at the intersection of Old Cornelia Highway And White Sulphur elementary School, and the second roundabout is at the intersection of Old Cornelia Highway and the consolidated driveway of Dana Drive and Driveway #1. This alternative was evaluated as single lane roundabouts with the existing geometry, and multilane roundabouts with the widened four lane geometry. Figure 25 below shows the dumbbell roundabout configuration with the existing and four lane geometry.

Figure 25: DUMBBELL ROUNDABOUT

The capacity analysis results for the site driveway are provided in Tables 38 and 39.

**Table 38: CAPACITY ANALYSIS RESULTS – ALTERNATIVE B (TWO LANE GEOMETRY)**

|                                                          | WBL/T    | A (9.2)        | A (6.0)      | B (10.9)       | A (6.7)      | B (13.3)       | A (7.6)      |
|                                                          | NBL/R    | A (6.2)        | A (6.9)      | A (7.0)        | A (7.8)      | A (7.8)        | A (9.1)      |

Capacity results of the dumbbell roundabout indicate the following:

- Existing Geometry
  - Phase 1 (2025)
    - The single lane roundabout of White Sulphur Elementary School is projected to operate at LOS 'F' on the westbound approach in the AM Peak Hour, and at LOS 'F' on the eastbound approach in the PM Peak Hour.
    - The single lane roundabout of Driveway #1 is projected to operate at LOS 'F' on the westbound approach in the AM Peak Hour, and at LOS 'F' on the eastbound approach in the PM Peak Hour.
  - Phase 2 (2030)
    - The single lane roundabout of White Sulphur Elementary School is projected to operate at LOS 'F' on the westbound approach in the AM Peak Hour, and at LOS 'F' on the eastbound approach in the PM Peak Hour.
    - The single lane roundabout of Driveway #1 is projected to operate at LOS 'F' on the westbound approach in the AM Peak Hour, at LOS 'F' on the eastbound approach in the PM Peak Hour, and at LOS 'E' on the northbound approach in the PM Peak Hour.
  - Phase 3 (2035)
    - The single lane roundabout of White Sulphur Elementary School is projected to operate at LOS 'F' on the westbound approach in the AM Peak Hour, and at LOS 'F' on the eastbound approach in the PM Peak Hour.
    - The single lane roundabout of Driveway #1 is projected to operate at LOS 'F' on the westbound approach in the AM Peak Hour, at LOS 'F' on the eastbound approach in the PM Peak Hour, and at LOS 'E' or worse on the northbound approach for both peak hours.

- Four Lane Geometry
  - Phase 1 (2025)
    - The multilane roundabout of White Sulphur Elementary School is projected to operate at LOS 'B' or better for all approaches during both peak hours.
    - The multilane roundabout of Driveway #1 is projected to operate at LOS 'A' for all approaches during both peak hours.
  - Phase 2 (2030)
    - The multilane roundabout of White Sulphur Elementary School is projected to operate at LOS 'C' or better for all approaches during both peak hours.
    - The multilane roundabout of Driveway #1 is projected to operate at LOS 'B' for all approaches during both peak hours.
  - Phase 3 (2035)
    - The multilane roundabout of White Sulphur Elementary School is projected to operate at LOS 'C' or better for all approaches during both peak hours.
    - The multilane roundabout of Driveway #1 is projected to operate at LOS 'B' for all approaches during both peak hours.

### **ALTERNATIVE C: ELLIPTICAL ROUNDABOUT**

The third consolidation alternative evaluated was an elliptical roundabout. With this alternative, the roundabout retains three northbound approaches that connect to a single large roundabout. In order to distinct the three northbound approaches, White Sulphur Elementary School is defined as the northeast approach, Driveway #1 is defined as the northbound approach, and Dana Drive is defined as the northwest approach. This alternative was evaluated as a single lane roundabout with the existing geometry, and multilane roundabout with the widened four lane geometry. Figure 26 on the following page shows the elliptical roundabout configuration with the existing and four lane geometry.

Figure 26: ELLIPTICAL ROUNDABOUT

The capacity analysis results for the site driveway are provided in Tables 40 and 41.

**Table 40: CAPACITY ANALYSIS RESULTS – ALTERNATIVE C (TWO LANE GEOMETRY)**

Capacity results of the elliptical roundabout indicate the following:

- Existing Geometry
  - Phase 1 (2025)
    - The westbound approach is projected to operate at LOS 'F' in the AM Peak Hour.
    - The eastbound approach is projected to operate at LOS 'F' in the PM Peak Hour.
    - The northbound approach of Driveway #1 is projected to operate at LOS 'E' in the PM Peak Hour.
  - Phase 2 (2030)
    - The westbound approach is projected to operate at LOS 'F' in the AM Peak Hour.
    - The eastbound approach is projected to operate at LOS 'F' in the PM Peak Hour.
    - The northbound approach of Driveway #1 is projected to operate at LOS 'E' for both peak hours.
  - Phase 3 (2035)
    - The westbound approach is projected to operate at LOS 'F' in the AM Peak Hour.
    - The eastbound approach is projected to operate at LOS 'F' in the PM Peak Hour.
    - The northbound approach of Driveway #1 is projected to operate at LOS 'E' or worse for both peak hours.
- Four Lane Geometry
  - Phase 1 (2025)
    - The elliptical roundabout is projected to operate at LOS 'B' or better on all approaches for both peak hours.
  - Phase 2 (2030)
    - The elliptical roundabout is projected to operate at LOS 'C' or better on all approaches for both peak hours.
  - Phase 3 (2035)
    - The elliptical roundabout is projected to operate at LOS 'D' or better on all approaches for both peak hours.

## SUMMARY OF FINDINGS

- The Sussex development is a residential development on approximately 472 acres. The site plan provides for 1,226 single-family homes, 924 multi-family homes, 190 townhomes, and a youth baseball park.
- A long range widening project on Old Cornelia Highway between Jesse Jewell Parkway and Joe Chandler Highway scheduled to begin construction in 2051.
- The development is proposed to initially have one access on Old Cornelia Highway between White Sulphur Elementary School and Dana Drive, with two future entrances planned on Old Cornelia Highway south of Jesse Jewell Parkway and Floyd Road. It was assumed that a second access point on Old Cornelia Highway would be open by 2030, and a third access point on Floyd Road would be open by 2035.
- The development is projected to be constructed at a rate of 160 homes per year, and is anticipated to be built-out by 2035. The three phases evaluated in the study were Phase 1 (2025), Phase 2 (2030), and Phase 3 (2035).
- Turning movement count data was collected at the study intersections on Wednesday, February 17, 2021. The AM Peak Hour was observed to be 7:15 to 8:15 AM, and the PM Peak Hour was observed to be 4:45 to 5:45 PM.
- Bi-directional 24-hour traffic data was collected on SR 14 on Wednesday, February 17, 2021.
  - Eastbound: 85<sup>th</sup> percentile speed of 46 mph, traffic volume of 6,476 vehicles per day, and truck percentage of 4.4%
  - Westbound: 85<sup>th</sup> percentile speed of 44 mph, traffic volume of 6,974 vehicles per day, and truck percentage of 5.3%
- Due to the COVID-19 pandemic, turning movement data was compared to a nearby GDOT count station (139-0210) in order to determine how the pandemic was affecting traffic patterns. It was determined that the collected data experienced a reduction of approximately 9%.
- Crash data at the study intersections indicates that of the 29 crashes that occurred between 2016-2020 right angle collisions were the most common crash, accounting for 31% of the total.
- Based on the Atlanta Regional Commission's population forecast for Hall County, the census data from the Hall County Strategic Plan, and the trend analysis for nearby GDOT Count Stations, an annual growth rate of 1.5% was established between the Existing Year (2021) to the Phase 3 Build Year.

- With the full build out in Phase 3 (2035), the residential development is projected to generate 18,535 net daily trips, with 1,381 trips (349 entering, 1,032 exiting) in the AM Peak Hour and 1,821 trips (1,138 entering, 683 exiting) in the PM Peak Hour. Trip distribution for the new trips were based on the existing AM Peak Hour distribution.
- It was assumed that 100% of the trips would use the east access on Old Cornelia Highway in Phase 1 (2025), 80% of the trips in Phase 2 (2030), and 60% of the trips in Phase 3 (2035).
- Under Existing 2021 conditions, capacity analysis results indicate that the following intersections are experiencing unacceptable operation:
  - Old Cornelia Highway and Dana Drive, which currently operates at LOS 'E' on the northbound approach in the PM Peak Hour.
  - Old Cornelia Highway and White Sulphur Elementary School, which currently operates at LOS 'E' or worse on the northbound approach in both peak hours.
  - Old Cornelia Highway and Oconee Circle, which currently operates at LOS 'F' on the northbound approach in the PM Peak Hour.
- Under No-Build conditions, capacity analysis results indicate that the following intersections are projected to experience unacceptable operation:
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'E' on the northbound approach beginning in 2025.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'E' or worse on the northbound approach beginning in 2025.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'E' or worse on the northbound and southbound approaches beginning in 2025.
- Under Build conditions, capacity analysis results indicate that the following intersections are projected to experience unacceptable operation:
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'E' on the northbound approach beginning in 2025.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'F' on the northbound approach beginning in 2025.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'E' or worse on the northbound and southbound approaches beginning in 2025.
  - Old Cornelia Highway and Driveway #1, which is projected to operate at LOS 'F' on the northbound approach beginning in 2025 and the westbound approach beginning in 2035.

- The No-Build and Build Conditions were also evaluated with widening on Old Cornelia Highway from two lanes to four lanes. Under No-Build conditions and with widening on Old Cornelia Highway, capacity analysis results indicate that the following intersections are projected to experience unacceptable operation:
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'E' on the northbound approach beginning in 2025.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'E' or worse on the northbound approach beginning in 2025.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'E' or worse on the northbound approach beginning in 2025 and the southbound approach beginning in 2035.
- Under Build conditions and with widening on Old Cornelia Highway capacity analysis results indicate that the following intersections are projected to experience unacceptable operation:
  - Old Cornelia Highway and Dana Drive, which is projected to operate at LOS 'E' on the northbound approach beginning in 2025.
  - Old Cornelia Highway and White Sulphur Elementary School, which is projected to operate at LOS 'F' on the northbound approach beginning in 2025.
  - Old Cornelia Highway and Oconee Circle, which is projected to operate at LOS 'E' or worse on the northbound and southbound approaches beginning in 2025.
  - Old Cornelia Highway and Driveway #1, which is projected to operate at LOS 'F' on the northbound approach beginning in 2025 and the westbound approach beginning in 2035.
- The intersection of Old Cornelia Highway and Driveway #1 was evaluated for alternative traffic control, with both existing geometry and four lane geometry. The following improvements were evaluated:
  - Minor Street Stop Control, with added turn lanes
  - Traffic Signal
  - Multilane Roundabout
- Under Build conditions with turn lane improvements at the intersection of Old Cornelia Highway and Driveway #1:
  - With existing geometry, the northbound approach is projected to operate at LOS 'E' or worse beginning in 2025.
  - With the four lane widened geometry, the northbound left movement is projected to operate at LOS 'E' or worse beginning in 2025.

- Under Build conditions with signal control at the intersection of Old Cornelia Highway and Driveway #1:
  - With existing geometry, the signal is projected to operate at LOS 'C' in the AM Peak Hour and LOS 'E' in the PM Peak Hour in 2035.
  - With the four lane widened geometry, the signal is projected to operate at LOS 'B' for both peak hours in 2035.
  
- Under Build conditions with roundabout control at the intersection of Old Cornelia Highway and Driveway #1:
  - With a single lane roundabout, the intersection is projected to have several approaches that operate at LOS 'E' or worse for both peak hours in 2035.
  - With a multilane roundabout, the intersection is projected to operate at LOS 'C' or better on all approaches for both peak hours in 2035.
  
- All of the improvements evaluated at the intersection of Old Cornelia Highway and Driveway #1 operate poorly under projected conditions, or experience queuing that affects the adjacent intersections. Therefore, additional alternatives were evaluated to implement access control and improve the operation of the existing minor street stop controlled intersections.
  - Traffic Signal, with Dana Drive and White Sulphur Elementary School consolidated at the proposed location of Driveway #1
  - Dumbbell Roundabout, with Dana Drive consolidated with Driveway #1
  - Elliptical Roundabout
  
- Under Build conditions with signal control at the intersection of Old Cornelia Highway and the Consolidated Driveway:
  - With existing geometry, the signal is projected to operate at LOS 'C' in the AM Peak Hour and LOS 'F' in the PM Peak Hour in 2035.
  - With the four lane widened geometry, the signal is projected to operate at LOS 'B' for both peak hours in 2035.
  
- Under Build conditions with the dumbbell roundabout at the consolidated intersection of Old Cornelia Highway and White Sulphur Elementary School/Driveway #1/Dana Drive:
  - With a single lane dumbbell roundabout, the consolidated intersection is projected to have several approaches that operate at LOS 'E' or worse for both peak hours in 2035.
  - With a multilane dumbbell roundabout, the consolidated intersection is projected to operate at LOS 'C' or better on all approaches for both peak hours in 2035.

- Under Build conditions with the elliptical roundabout at the consolidated intersection of Old Cornelia Highway and White Sulphur Elementary School/Driveway #1/Dana Drive:
  - With a single lane elliptical roundabout, the consolidated intersection is projected to have several approaches that operate at LOS 'E' or worse for both peak hours in 2035.
  - With a multilane elliptical roundabout, the consolidated intersection is projected to operate at LOS 'D' or better on all approaches for both peak hours in 2035.

## CONCLUSION

Based on the findings in this study, any improvements implemented at Driveway #1 on Old Cornelia Highway could not be implemented without adversely affecting the adjacent intersections. Therefore, three alternatives were evaluated that would also address the operation of White Sulphur Elementary School and Dana Drive.

Alternative A operates at LOS 'D' with the existing geometry through 2030. However this alternative requires all of the driveways to be consolidated and connect on the development roadway, which will be difficult to implement given the terrain of the site.

Alternatives B and C have movements that operate at LOS 'E' or worse on several movements in 2025, but are more feasible forms of traffic control for the site driveway and the existing adjacent intersections.

It is recommended that the roadway of Old Cornelia Highway be widened to four lanes to accommodate for these Alternatives. A long range project is currently planned for widening, but the background growth of the roadway coupled with the development volume exacerbate the need for the project. The developer should work with GDOT for widening project, while the developer will be solely responsible for the selected Alternative.

The intersection of Old Cornelia Road and Oconee Circle is currently experiencing unacceptable LOS before adding the project volumes, and improvements should be implemented by local officials.

Figure 27 through 29 on the following pages show each of the three recommended Alternatives.

### HALL COUNTY STRATEGIC PLAN

A STRATEGIC PLAN FOR

# HALL COUNTY

2018-2028

Carl Vinson Institute of Government  
UNIVERSITY OF GEORGIA

## Existing Plan Review

Institute faculty, with input from the Steering Committee, conducted a plan review to highlight initiatives, projects, and programs underway in Hall County. The plan review identified the major focus of each plan, successes achieved under each plan, and the status of each.

The following seven plans were reviewed:

- 2017 Hall County Economic Development Report
- Gainesville–Hall County Economic Development Council FY 2018 Marketing Plan
- Hall County Forward: 2017 Hall County Comprehensive Plan
- Hall County Fire Services 2016 Annual Report
- Hall County Annual Budget Guide FY 2018
- 2017 Hall County Service Delivery Strategy
- North and South Hall Sewer Master Plans

These documents were presented to the stakeholders to further develop their knowledge base. The information from the plans was also used to inform the discussion of prioritizing action items in the coming years. These plans are the roadmap for achieving a community’s objectives. The strategic plan contains the turn-by-turn directions.

## Common Themes

The following themes are found in the seven major guidance documents and plans Hall County has adopted and were used to guide discussions around developing strategic priorities for the next 10 years.

### POPULATION GROWTH

Hall County is projected to more than double in population by 2040, from 179,684 in 2010 to 371,570, a 106.8% increase. Population growth in the unincorporated area alone is projected to slightly exceed the countywide increase at 110.3%. The greatest percentage population increase is expected to occur to the north and east of Gainesville, in particular along the Highway 365 corridor. Residential growth is being stimulated by available jobs in skilled manufacturing and health care, lower home prices, and a high quality of life.

### ECONOMIC INVESTMENT AND WORKFORCE DEVELOPMENT

Hall County has benefited tremendously from major local employers like Kubota and Northeast Georgia Medical Center. According to market research conducted by the Greater Hall Chamber of Commerce, desirable new businesses include skilled manufacturing, biotechnology, health care, food processing, and transportation and logistics. Guiding the growth of specific industries and businesses through careful planning is a next step for Hall County. With economic investment comes the need for a skilled workforce. Building new talent in these industries locally has been and continues to be a priority for Hall County and its partners.

## APPENDIX G

### ARC POPULATION FORECAST

# 2050 Population Forecast

Source: Atlanta Regional Commission

\*ARC's 2050 forecasts were developed using several growth scenarios for each county: a "higher regional growth" scenario, a "slower regional growth" scenario, and a "preferred" scenario that serves as the official forecast number.
