Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Queue Model: HCM Queue Formula.

Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).

HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: SIDRA Standard.

Delay Model: HCM Delay Formula (Geometric Delay is not included).

# GAINESVILLE CITY SCHOOL SYSTEM

*ONE GAINESVILLE: We will inspire, nurture, challenge, and prepare our students.*

Dear Doug and members of the Planning & Appeals Board:

Thank you for the opportunity to submit comments relative to the applications of Caballero Holdings, LLC in its quest to rezone and annex properties in east Gainesville. Our comments are in two parts, general and specific.

For the record, these properties lie within our New Holland Elementary attendance zone. Several references are made to White Sulphur Elementary, owned by the Hall County School System and slated to close in two years.

In general, we view the proposed as too massive, too dense and projects to be too populated for the extended, planned growth plans in our school system. Further, with studies confirming more than 9000 apartments in our city of about 40,000, we are astonished that no market study accompanies the application verifying the need for more multi-family/apartment units. Also, there is no traffic-generation data in the application to add to the busiest corridor in the entire county, Old Cornelia Highway/Jesse Jewell Parkway/Browns Bridge Road. Clearly, the project reflects profit over pride and unestimated population over strategic planning.

With precedence in the Mundy Mill community whereby the second development company honored the commitment of the original development company to donate a suitable site for a school, nowhere in the submitted application confirms a suitable school site of twenty acres.

We maintain interest in such donation, if a preferred site is determined by our school system. It should be noted, again referencing the Mundy Mill community, the developer donated additional acreage to the original 20 acres with no obligation to the school system. Mundy Mill Learning Academy has frontage on the property's main thoroughfare as a community (+) amenity, exceptional learning, convenience and safety. We are unable to support a passing reference to a school site without much further study.

Specifically in our study, we also recommend conditions be added to the Planning Commission's consideration:

- Developer-paid traffic signals at each proposed entrance for the safety of vehicles and/or buses transporting students;
- Bus pull-off aprons in each interior pod artery;
- Prohibited weekday parking in cul-de-sacs to ensure safe and smooth bus flow;
- Honoring, in a separate certified communique to the school system, the 20-acre site proposed for an elementary school; and
- Community information sessions in Sherwood Heights, New Holland/Fair Street and Morningside Heights neighborhoods.

Thank you.

**Date Submitted:** 11/29/2021

**Presenter:** Matt Tate

**Item of Business:** Request from **Sonia del Carmen** to vary the rear yard and right side yard setback requirements on a 0.072± acre tract located on the north side of Rainey Street, west of Woods Mill Road (a/k/a **878 Rainey Street, NW**), having a zoning of Residential-II (R-II).  
Ward Number: Five  
Tax Parcel Number(s): 01-045-008-012  
Request: Bedroom addition

**Meeting Date:** 12/14/2021

**Purpose of Request:**

The applicant is proposing to vary the rear yard setback from 20-feet to 5-feet and the right side yard setback from 10-feet to 5-feet for a 160 square foot bedroom addition to the rear of the home that is in progress of being built. The property consists of a 760± square foot, two-story single-family home originally constructed in 1937. The property owner is basing the hardship on the small size of the lot and the location of the existing home. The applicant states she was unaware there was a setback issue when she purchased the property and found out later there was a discrepancy on the original survey. The adjacent properties are zoned Residential-II (R-II) and General Business (G-B) and includes older single-family homes and various office/warehouse uses.

STAFF RECOMMENDATION**

**Applicant and Property Owner**..... Sonia del Carmen  
**Location**..... 878 Rainey Street, NW  
**Request**..... Vary the rear yard and right side yard setback  
**Size** ..... 0.072± acre  
**Ward**..... Five  
**Proposed Use**..... Bedroom addition  
**Planning Division Staff Recommendation** ..... **Approval, with conditions**  
**Date**..... December 14, 2021

---

▪ **Request**

The applicant is proposing to vary the rear yard setback from 20-feet to 5-feet and the right side yard setback from 10-feet to 5-feet for a 160 square foot, two-story addition to the rear of the home that will increase the size of two bedrooms.

▪ **Background Information and Existing Conditions**

The property consists of a 760± square foot, two-story single-family home originally constructed in 1937. A building permit was issued for the proposed addition on June 24, 2021. The applicant has partially constructed the addition until it was determined there was a setback issue due to an inaccurate survey. The adjacent properties are zoned Residential-II (R-II) and General Business (G-B) and includes older single-family homes and various office/warehouse uses.

▪ **Significant Factors**

The Ordinance requires that the applicant's claim for hardship must be based on the size or shape of the lot, its topography, or other physical characteristics inherent in the lot itself and not on the desired aesthetics. Further, the Code states that a variance shall not be granted as a convenience to the applicant or as a way to gain any advantage or interest over similarly zoned properties.

The property owner is basing the hardship on the small size of the lot and the narrow shape of the lot. The applicant states she was unaware there was a setback issue when she purchased the property and found out later there was a discrepancy on the original survey. The original survey located the rear and right side yard property lines further from the existing home which was incorrect.

According to Planning records there have been no similar rear or side yard variances granted within the immediate area. However, in March of 2008, a front yard setback variance from 40-feet to 15-feet was approved for an office building located just east of the property at 705 Oak Street.

- **Other Departmental Comments**

There are no other departmental comments for this request.

- **Supporting Documents**

Statement of Hardship, Plat, Pictures.

- **Analysis**

**(1) Are there extraordinary and exceptional conditions pertaining to the particular piece of property in question because of its size, shape or topography?**

The property is very small. The width of the property averages approximately 39 feet and the depth averages 77 feet. In addition, the property slopes up from Rainey Street.

**(2) Would the application of the Unified Land Development Code to this particular piece of property create an unnecessary hardship?**

The purpose of the building setback requirement is to provide for uniformity of building placement, sufficient access, as well as to provide for adequate separation from neighboring properties for fire safety.

Given the size of the lot, the existing home currently does not meet the required 20-foot rear yard setback and 10-foot side yard setback requirements. The existing home is currently setback 5-feet to 8-feet from the side property lines and approximately 13-feet from the rear property line. The request is based on the applicant's desire to provide more livable space by increasing the size of two existing bedrooms.

**(3) Are there conditions that are peculiar to the property which adversely affect its reasonable uses or usability as currently zoned?**

The small size of the lot and the existing location of the home adversely affect the ability to build the proposed addition. Whether the request is approved or not, the property will retain its right to be used as a single-family home regardless of the proposed variance request.

**(4) Would relief, if granted, cause substantial detriment to the public good or impair the purposes and intent of this ordinance?**

The proposed addition would effectively close in the rear of the home giving it a more uniform footprint. Given the distance from the adjacent and nearby homes, there appears to be no fire or safety building separation issues if the variance were to be approved. The proposal would not appear to impair the ordinance.

**(5) There must be a proved hardship by showing beyond a doubt the inability to make a reasonable use of the land if the zoning ordinance were applied literally.**

The size of the lot and the location of the existing home appear to be viable physical hardships which support the need for a rear yard and side yard setback variance. As well, the property slopes up from Rainey Street and is flat toward the rear of the property where the proposed addition is located.

**(6) The hardship cannot be self-created; e.g., as in a case where the lot was purchased with the knowledge of an existing restriction.**

The applicant did not construct the home and states they were unaware there were setback issues until it was determined the original survey was incorrect.

▪ **Staff Recommendation**

The Planning Division staff is recommending **conditional approval** of this variance request based on the size of the property and the location of the existing home.

**Conditions**

1. The exterior siding materials for the proposed addition shall match exterior materials on the existing home.
2. The subject property shall be properly maintained including the removal of material, appliances and debris stored outside.

STATE OF GEORGIA  
COUNTY OF HALL

08C-0282

THIS INDENTURE, Made this 13th day of October, 2017 between

BEACH NEST, LLC

of the State of Georgia, as party or parties of the first part, hereinafter called Grantor, and

SONIA DEL CARMEN LOPEZ

As party or parties of the second part, hereinafter called Grantee (the words "Grantor" and "Grantee" to include their respective heirs, successors, and assigns where the context requires or permits).

WITNESSETH that: Grantor, for and in consideration of the sum of TEN AND 0/100 DOLLARS AND GOOD AND VALUABLE CONSIDERATION in hand paid at and before the Sealing and delivery of these presents, the receipt whereof is hereby acknowledged, has granted, bargained, sell, alien, convey and confirm unto the said Grantee the following described property:

All that tract or parcel of land lying and being in the City of Gainesville, Hall County, Georgia, known as 878 Rainey Street, and lying on the north side of Rainey Street and being more fully described as follows:

BEGINNING at an iron pin at the curb line of Rainey Street and the center of a driveway and at the corner of the property heretofore sold by C.H. Martin, Sr. and C.H. Martin, Jr, to Sam Lance; thence easterly along Rainey Street 50 feet, more or less, to an iron pin at curb line of Rainey Street at corner of property of Comer Payne; thence in a northerly direction along the Comer Payne line 69 feet to an iron pin; thence in a westerly direction 50 feet, more or less, to an iron pin on Sam Lance line; thence in a southerly direction 84 feet, more or less, along the Sam Lance line to the beginning corner.

TO HAVE AND TO HOLD the said tract or parcel of land, with all and singular the rights, Members, and appurtenances thereof, to the same being, belonging, or in anywise appertaining, to the only proper use, benefit and behalf of the said Grantee forever in FEE SIMPLE.

BK8016PG160

AND THE SAID Grantor will warrant and forever defend the right and title to the above Described property unto the said Grantee against the claims of all persons whomsoever.

IN WITNESS WHEREOF, the Grantor has signed and sealed this deed, the day and year above written.

Signed, sealed and delivered

## Variance Request

### STATEMENT OF HARDSHIP

The Gainesville Planning and Appeals Board has the authority, in specific cases, to grant variances from the terms of the Unified Land Development Code of the City of Gainesville, Georgia, when the variance will not be contrary to the public interest where, owing to special conditions, a literal enforcement of the Unified Land Development Code will, in specific cases, result in unnecessary hardship and so that the resolution shall be observed, public safety and welfare secured, and substantial justice done. The authority to grant such variances shall be limited to those instances where a hardship is clearly established as required by the Unified Land Development Code. Variances may be granted only upon a finding by the Gainesville Planning and Appeals Board that:

Describe how each situation listed below relates to your application.

1) There are extraordinary and exceptional conditions pertaining to the particular piece of property in question because of its size, shape, or topography. (The hardship must relate to the physical character of the lot and not to a personal or economic hardship.)

The property is very small and narrow.

2) The application of the requirements of this resolution to this particular property would create an unnecessary hardship.

The existing home was not constructed by the applicant.

The home is located close to the rear and side property line.

3) There are conditions that are peculiar to the property which adversely affect its reasonable use or usability as currently zoned.

The property is very small and is nonconforming in size.

4) Relief, if granted, would not cause substantial detriment to the public good or impair the purposes and intent of this Ordinance. For example, granting the variance would not confer any special privilege that is denied by this regulation to other property in the same zoning district. Such conditions are not the result of any actions of the property owner.

The proposed addition will allow for two bedrooms to be expanded.

The adjacent properties will not be impacted by the improvements to the home.

5) There must be a proved hardship by showing beyond a doubt the inability to make a reasonable use of the land if the zoning ordinance were applied literally.

The size and dimensions of the property impact the ability to improve our home.

6) The hardship cannot be self-created; e.g., as in a case where the lot was purchased with the knowledge of an existing restriction.

We purchased the property as is and were not aware of the setback requirements. There was a mistake on the original plat.

I hereby certify that the above information and all attached information is true and correct.

**Date Submitted:** 11/29/2021

**Presenter:** Matt Tate

**Item of Business:** Request from **Federal Construction** to vary the front yard setback requirement from Race Street on a 0.31± acre tract located on the southwest side of the intersection of Broad Street and Race Street and the northwest side of the intersection of Jesse Jewell Parkway and Race Street (a/k/a **430 Broad Street, SE**), having a zoning of General Business (G-B).  
 Ward Number: Four  
 Tax Parcel Number(s): 01-008-002-001  
 Request: Restaurant

**Meeting Date:** 12/14/2021

**Purpose of Request:**

The applicant is proposing to vary the front yard setback from Race Street from 40-feet to zero feet (0'). The purpose of the request is to construct a two-story, 6,000 square foot restaurant building with a drive-thru pick-up window that will replace an existing 1,500 square foot office/garage building previously occupied by Stat Delivery Services. The restaurant will serve breakfast, lunch, and dinner, seven days a week to include Mediterranean cuisine, brick oven pizza, coffee, desserts, and ice cream. The applicant intends to improve an existing access drive from Broad Street and two driveways from Race Street. The property owner is basing the hardship on the size and width of the lot. Adjacent uses include medical offices, AT&T office, retail shopping center and Cadence Bank.

**History/Background:**

**Facts & Issues for Consideration:**

**Department Recommendation:**

Planning staff recommended approval with two conditions. See the Staff Recommendation report for details.

**Department Director:**

**Applicant and Property Owner**..... Federal Construction  
**Property Owner** ..... Franze Properties II, LLC  
**Location**..... 430 Broad Street, SE  
**Request**..... Vary the front yard setback from Race Street  
**Size** ..... 0.31± acre  
**Ward**..... Four  
**Proposed Use**..... Restaurant  
**Planning Division Staff Recommendation** ..... **Approval, with conditions**  
**Date**..... December 14, 2021

---

▪ **Request**

The applicant is proposing to vary the front yard setback from Race Street from 40-feet to zero feet (0') for a restaurant building. Specifically, the proposed building footprint is setback fourteen feet (14') from the front property line. The proposed exterior stairwell protruding from the building extends to the property line. The proposed restaurant building is two-stories in height and 6,000± square feet in size. The restaurant will serve breakfast, lunch, and dinner, seven days a week to include Mediterranean cuisine, brick oven pizza, coffee, desserts, and ice cream. The applicant intends to improve an existing access drive from Broad Street and the two driveways from Race Street.

▪ **Background Information and Existing Conditions**

The subject property contains a 1,500 square foot office/garage building previously occupied by Stat Delivery Services that will be demolished. According to tax records the building was originally constructed in 1955. The property is mostly impervious with minimal vegetation. Adjacent uses include medical offices, AT&T office, retail shopping center and Cadence Bank. As well, Brenau University is located just north of the property.

▪ **Significant Factors**

The Ordinance requires that the applicant's claim for hardship must be based on the size or shape of the lot, its topography, or other physical characteristics inherent in the lot itself and not on the desired aesthetics. Further, the Code states that a variance shall not be granted as a convenience to the applicant or as a way to gain any advantage or interest over similarly zoned properties.

The property owner is basing the hardship on the three road frontages and the narrow width of the lot. The applicant states the lot is unbuildable given the front yard setback requirements and the depth of the lot from Race Street.

In 1998, the subject property was granted a front setback variance from 35-feet to 27-feet from Race Street to construct a new medical office building fronting closer to Jesse Jewell Parkway. The building was never constructed.

- **Other Departmental Comments**

There are no other departmental comments for this request.

- **Supporting Documents**

Statement of Hardship, Site Plan, Architectural Rendering

- **Analysis**

**(1) Are there extraordinary and exceptional conditions pertaining to the particular piece of property in question because of its size, shape or topography?**

The property is small in size and is very narrow measuring 47-feet deep by 305 feet long fronting Race Street. The property is relatively flat but slopes downward toward Broad Street.

**(2) Would the application of the Unified Land Development Code to this particular piece of property create an unnecessary hardship?**

The purpose of the building setback requirement is to provide for uniformity of building placement, sufficient access, as well as to provide for adequate separation from neighboring properties for fire safety.

The Unified Land Development Code requires a 40-foot front yard setback and a zero foot (0') setback adjacent to commercially zoned properties. The subject property is bound on three sides by Jesse Jewell Parkway, Race Street and Broad Street and is adjacent to property zoned General Business (G-B). The property is somewhat limited due to the width of the lot and the front yard setback requirements.

**(3) Are there conditions that are peculiar to the property which adversely affect its reasonable uses or usability as currently zoned?**

The property is zoned for commercial uses including a restaurant. The existing building is considered a nonconforming structure as it is setback only 18± feet from Race Street. The applicant could improve the existing nonconforming building for a restaurant but would be unable to expand the building without a setback variance.

**(4) Would relief, if granted, cause substantial detriment to the public good or impair the purposes and intent of this ordinance?**

The proposed restaurant building would not appear to cause detriment to the public good or impair the purpose of the ordinance. The surrounding area includes numerous buildings with zero foot (0') setbacks given that the properties are older and are located close to downtown. Examples of this include the adjacent AT&T office building across Race Street and the neighboring medical office building fronting Broad Street. Given the proposed location of the building, there should be no fire or safety building separation issues if the variance were to be approved.

**(5) There must be a proved hardship by showing beyond a doubt the inability to make a reasonable use of the land if the zoning ordinance were applied literally.**

The narrowness of the lot and the three front yard setbacks are considered a physical hardship. In order to construct a new building, a front yard setback variance would be necessary regardless of the proposed building size or location.

**(6) The hardship cannot be self-created; e.g., as in a case where the lot was purchased with the knowledge of an existing restriction.**

The applicant was made aware of the front yard setback requirements during their due diligence process. According to the applicant, the lot is under contract to purchase with a contingency on the variance.

▪ **Staff Recommendation**

The Planning Division staff is recommending **conditional approval** of this variance request based on the narrow shape of the subject property and the three front yard building setbacks.

**Conditions**

- 1. The proposed building shall be consistent with the architectural rendering provided with this variance application.**
- 2. Upon the discretion of the Community and Economic Development Director and Public Works Director, the proposed exterior stairwell shall be sufficiently setback from Race Street so as not to cause a safety hazard or impede traffic circulation within the property.**

## Variance Request

### STATEMENT OF HARDSHIP

The Gainesville Planning and Appeals Board has the authority, in specific cases, to grant variances from the terms of the Unified Land Development Code of the City of Gainesville, Georgia, when the variance will not be contrary to the public interest where, owing to special conditions, a literal enforcement of the Unified Land Development Code will, in specific cases, result in unnecessary hardship and so that the resolution shall be observed, public safety and welfare secured, and substantial justice done. The authority to grant such variances shall be limited to those instances where a hardship is clearly established as required by the Unified Land Development Code. Variances may be granted only upon a finding by the Gainesville Planning and Appeals Board that:

Describe how each situation listed below relates to your application.

1) There are extraordinary and exceptional conditions pertaining to the particular piece of property in question because of its size, shape, or topography. (The hardship must relate to the physical character of the lot and not to a personal or economic hardship.)

The subject lot, like most of the lots on this block is long and narrow. The lot is 50 feet wide. The current setback requirements are unreasonable for this particular piece and make it unbuildable.

2) The application of the requirements of this resolution to this particular property would create an unnecessary hardship.

The current setback requirements render this piece of property virtually unbuildable. The current setbacks are unreasonable for this lot in this area.

3) There are conditions that are peculiar to the property which adversely affect its reasonable use or usability as currently zoned.

The current zoning is fine for the intended use. The setbacks are the problem.

4) Relief, if granted, would not cause substantial detriment to the public good or impair the purposes and intent of this Ordinance. For example, granting the variance would not confer any special privilege that is denied by this regulation to other property in the same zoning district. Such conditions are not the result of any actions of the property owner.

If granted, the change would make the building more conforming to surrounding properties. The current building on the subject lot and the building directly next door both have closer to the setbacks we seek rather than the setbacks currently required.

5) There must be a proved hardship by showing beyond a doubt the inability to make a reasonable use of the land if the zoning ordinance were applied literally.

The lot is 50 feet wide. The current side setbacks are 20 feet each. The usable space with out overhang is 10 feet. This is not reasonable for this or any other possible building project.

6) The hardship cannot be self-created; e.g., as in a case where the lot was purchased with the knowledge of an existing restriction.

The lot is under contract to purchase, with a contingency on a variance.

I hereby certify that the above information and all attached information is true and correct.

**Date Submitted:** 11/29/2021

**Presenter:** Matt Tate

**Item of Business:** Request from **Moez Hasni** to annex a 5.503± acres tract located on the northeast corner of Jesse Jewell Parkway and Crescent Drive, having frontage on Exit 24/ I-985 (a/k/a **374 and 400 Crescent Drive**) and to establish zoning as General Business (G-B).  
Ward Number: Two  
Tax Parcel Number(s): 15-033C-000-077  
Request: Retail shopping center

**Meeting Date:** 12/14/2021

**Purpose of Request:**

The applicant is proposing to annex the subject property with a zoning of General Business (G-B). The property is contiguous to the city limits to the east across I-985 and currently zoned Highway Business (H-B) within unincorporated Hall County. As well, the property is located within the Limestone Parkway Overlay Zone and the Hall County Gateway Corridor Overlay District. The purpose of the request is to access sewer for the development of a 6,070 square foot retail shopping center. The property consists of two tracts which includes GDOT surplus property which was sold to the applicant. One access driveway is proposed from Crescent Drive. The adjacent uses include single-family residential uses to the north and west, Hall County Farmers Market to the south across Jesse Jewell Parkway and mini-warehouses and an assisted living facility across I-985 to the east.

**History/Background:**

**Facts & Issues for Consideration:**

**Department Recommendation:**

Planning staff recommended approval with seven conditions. See the Staff Recommendation report for details.

▪ **Applicant's Proposal and Background Information**

The applicant is proposing to annex the subject property with a zoning of General Business (G-B). The property is contiguous to the city limits to the east across I-985 and is currently zoned Highway Business (H-B) within unincorporated Hall County. As well, the property is located within the Limestone Parkway Overlay Zone and the Gateway Corridor Overlay Zone. The property consists of two tracts of land which includes surplus property from the Georgia Department of Transportation (GDOT) that was recently sold to the applicant.

The purpose of the request is to access sewer for the development of a 6,070 square foot retail shopping center that will include a Dunkin Donuts restaurant. One access driveway is proposed along Crescent Drive near the center of the property. The subject property previously contained a single-family home that was demolished and has since been graded for a stormwater easement and detention pond located on the north end of the property.

▪ **Adjacent Land Use and Zoning**

| Location | Use                                                                                       | Zoning                                                                                                                  |
|----------|-------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|

Other uses within the surrounding area include the New Holland Market shopping center to the west, Gainesville Regional Youth Detention Center (Juvenile Justice Department), Hall County Emergency Services Complex and the New Horizons Lanier Park to the north.

▪ **Other Departmental Comments**

According to the Georgia Department of Transportation (GDOT), the developer will need to coordinate with GDOT since this development will impact the State Route System.

The Gainesville Public Works Department comments for this request are stated in proposed zoning condition # 7 of this staff report.

▪ **Zoning History**

*The following zoning actions have taken place in the immediate area during the last ten years:*

**2021** – A request by Jim Chapman Communities to rezone 36.7± acres located at 0 Beverly Road, NE from General Business (G-B) to Planned Unit Development (P-U-D) zoning for a 220-unit rental cottage community was withdrawn.

**2020** – A request by Frank Norton, Jr. to annex a 2.16± acres tract with a zoning of Planned Unit Development (P-U-D) located at 39, 44, 48 and 49 Quarry Street; 4 Highland Street and to amend a 14.43± acres tract with a zoning of Planned Unit Development (P-U-D) located at 0 Lakeview Drive NE; 52, 54 and 56 Quarry Street NE was conditionally approved for 49 residential cottage and townhomes.

**2020** – A request by Capstone Acquisitions, LLC to annex a 6.148± acres tract with a zoning of Light Industrial (L-I) located at 0 Jesse Jewell Parkway for a climate-controlled self-storage and office/warehouse was conditionally approved.

**2018** – A request by Limestone Greenway, LLC to annex a 75.12± acres tract with a zoning of Planned Unit Development (P-U-D) located at 0 and 2065 Limestone Parkway was conditionally approved for a mixed-use development.

**2017** – A request by Keel Property Management, LLC to annex a 6.32± acres tract with a zoning of General Business (G-B) located at 0 White Sulphur Road Drive was conditionally approved for restaurant, retail and a carwash.

**2017** – A request by the City of Gainesville to rezone 53.177± acres located at 1514, 1515, 1545, 1560 and 1581 Community Way from Residential-II (R-II) to Office and Institutional (O-I) zoning was approved for existing uses and for future professional office purposes.

**2016** – A request by Timothy Bullard to annex a 20.417± acres tract located at 1582 and 1586 Pine Valley Road was denied for a 240-unit apartment complex with Residential-II (R-II) zoning.

**2012** – A request by Pacolet Milliken Enterprises, Inc. to annex a 68.223± acres tract located at 601 White Sulphur Road was approved with conditional Planned Unit Development (P-U-D) zoning for a mixed-use development.

▪ **Staff Analysis**

**(1) Is the proposed use suitable in view of the zoning and development of adjacent and nearby property?**

The proposed use appears suitable given the surrounding uses and adjacent zoning. Nearby properties include a mixture of residential, institutional, office and commercial uses. The adjacent and nearby properties are zoned General Business (G-B) and Planned Unit Development (P-U-D) in the city and Highway Business (H-B) and Agricultural Residential-IV (AR-IV) in the county. The

subject property is located along a commercial corridor that has had significant growth within the past 5 to 7 years due to its proximity to Exit 24/I-985 and nearby medical facilities.

**(2) Will the proposed use adversely affect the existing use or usability of adjacent or nearby property?**

Given the property is undeveloped, the proposed use will increase traffic and turning movements on Crescent Drive. Crescent Drive is a two-lane county road with no curb/gutter or sidewalks. Coordination with the City of Gainesville, Hall County and Georgia Department of Transportation will be necessary to address the access requirements. Proposed improvements recommended by the Gainesville Public Works Department are as stated in zoning condition #7 of this staff report.

**(3) Is the proposed use compatible with the purpose and intent of the Comprehensive Plan?**

It is staff's opinion that the proposed retail building is supported by the Comprehensive Plan. The proposal is consistent with the Comprehensive Plan. The Future Development Map for the City of Gainesville places the subject property within the *Retail/Commercial* land use category which includes commercial service activities such as grocery stores, banks, restaurants, theatres, hotels, and automotive related businesses. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

According to the Character Area map for the City of Gainesville, the subject property is located within the *Limestone Medical Corridor* Character Area. The Limestone Parkway corridor area is an employment corridor that is envisioned as one of the priority growth areas and is not anticipated to expand Gainesville's traditional neighborhood fabric. Land uses allowed within this area include public / institutional, low-density residential, medium-density residential, multi-family residential, mixed-use, commercial, and parks / recreation / conservation.

**(4) Are there substantial reasons why the property cannot or should not be used as currently zoned?**

The proposed zoning of General Business (G-B) is similar to the property's existing zoning of Highway Business (H-B). The applicant desires to utilize sewer services which requires the property to be annexed given it is adjacent to the city limits.

**(5) Will the proposed use cause an excessive or burdensome use of public facilities or services, including but not limited to streets, schools, water or sewer utilities, and police or fire protection?**

Nearby developments currently utilize City water and sewer services and there is sufficient capacity to serve the development.

The applicant will be required to coordinate with Gainesville, Hall County and GDOT regarding any access and driveway improvements. According to the "9<sup>th</sup> Edition Trip Generation Manual" as published by the Institute of Transportation Engineers, the estimated trips for a proposed retail center are 266± two-way trips per weekday and 41 A.M. / 30 P.M. two-way peak hour trips.

Existing public safety services respond to the adjacent and nearby properties. Gainesville Fire Station #2 off of Cleveland Highway is located approximately 2.5 miles away. As well, Hall County Fire Station #7 off of East Crescent Drive is located approximately 0.23 miles away.

Given the proposal is for non-residential purposes, there should be no impacts to the Gainesville City School System.

**(6) Is the proposed use supported by new or changing conditions not anticipated by the Comprehensive Plan or reflected in the existing zoning on the property or surrounding properties?**

As previously stated, the surrounding area has experienced significant residential, office and commercial growth along Jesse Jewell Parkway due to its proximity to Exit 24/I-985, Northeast Georgia Medical Center and downtown Gainesville.

The proposed retail development appears to be consistent with adjacent commercial development.

**(7) Does the proposed use reflect a reasonable balance between the promotion of the public health, safety, morality, or general welfare and the right to unrestricted use of property?**

Due to the subject property's proximity to existing residential, commercial and industrial land uses, the proposal, *with the recommended conditions of zoning* appears to promote a reasonable balance between the interests of the City, the property owner, and neighboring residents and property owners.

---

▪ **Staff Recommendation**

The Planning Division staff is recommending **conditional approval** of the proposed annexation request with **General Business (G-B) zoning**, based on the Comprehensive Plan and the adjacent residential and non-residential land uses.

**Conditions**

1. The proposed development shall be generally consistent depicted on the concept plan and architectural renderings provided with this application.
2. Prohibited uses for the subject property shall include adult novelty stores, group homes, crisis centers, adult entertainment centers, pawn shops, dollar-type stores, massage parlors, hookah lounge, tobacco or vaping stores, gas station/convenience stores, tire stores, auto parts stores, auto body shops, automobile sales establishments, marine sales or repair stores, automated or non-automated car washes, truck stops, coin-laundry facilities, tattoo parlors, psychics, fortune tellers, clairvoyants and the like.
3. The proposed buildings shall meet the Limestone Parkway Overlay Zone and Gateway Corridor Overlay Zone standards.
4. The frontage landscape areas shall be sodded with grass and contain minimum 3-inch caliper size hardwood trees subject to the Community & Economic Development Director approval.
5. The subject property shall be limited to one (1) multi-tenant sign not to exceed 15-feet in height, 80 square feet of sign face area, 120 square feet of total sign structure area with internal or external lighting. Building signage shall be permitted as regulated within the Gainesville Unified Land Development Code. An electronic message board sign or electronic changeable copy sign shall not be permitted for the subject property.
6. An updated as-built boundary survey/plat of the subject property, indicating all improvements required for the proposed use shall be required.

7. All access point design for the subject property shall be submitted for review by the Gainesville Public Works Director in coordination with Hall County and the Georgia Department of Transportation (GDOT). The approval of said design shall be required prior to issuance of a building permit. All required access / traffic / sidewalk improvements associated with the proposed development shall be at the full expense of the owner/developer.
- a) Crescent Drive shall be improved to City standards along both sides of the roadway for the length of the proposed site. This includes roadway, curb and gutter, sidewalk, etc.
  - b) Jesse Jewell Parkway frontage shall be improved to City standards along the front roadway side for the length of the proposed site. This includes curb and gutter, sidewalk, etc. There is currently an existing right turn lane at this location.
  - c) The proposed RCUT at Crescent Drive and Jesse Jewell Parkway to allow left turns onto Crescent Drive shall be reviewed by the Georgia Department of Transportation (GDOT). This will require coordination between the development and GDOT for permitting approval/denial. Any correspondence from the GDOT shall be forwarded to the Gainesville Public Works Department.
  - d) The westbound left turn lane on Jesse Jewell Parkway at Textile Way and the Jesse Jewell Parkway at East Crescent Drive intersection shall be reviewed by GDOT for improvements to accompany any U-Turn movements. This will require coordination between the development and GDOT for permitting approval/denial. Any correspondence from the GDOT shall be forwarded to the Gainesville Public Works Department.
  - e) Southern site access on Crescent Drive is proposed to be a full access side street STOP. With the increased development in the area and the projected peak hour/daily trips for the development, it is recommended that the driveway also include a right turn deceleration lane into the development with sufficient spacing for the deceleration lane from the intersection of Jesse Jewell Parkway at no cost to the City. The deceleration lane should be a full width storage of 100 feet with a 50-foot taper.
  - f) Northern site access on Crescent Drive is proposed to be a full access side street STOP. Should this access be built, site distance shall be evaluated to determine the type of access permitted and it shall meet all City of Gainesville requirements.

The property located at 400 crescent drive, Gainesville GA 30501  
Currently it is an undeveloped land right of Exit 24, Part of Hall County and commonly known as Simpson land. We are requesting to be annexed into City of Gainesville as the utilities will be provided by the city. The property is a total of 5.5 acres, and we are proposing a 6070sf shopping center facing Jesse Jewell pkwy.

We have a commitment from A national QSR (Dunkin Donuts) to occupy the first unit. Rest of the tenants are still TBD, but we are confident we will get additional national tenants once we start the construction.

We hope this project will add value to the city gateway exit and will be constructed with all the gateway and city requirements.

Thank you

Moez Hasni

**Date Submitted:** 11/29/2021

**Presenter:** Matt Tate

**Item of Business:** Request from **Fred and Olivia Skey** to rezone a 0.65± acre tract located on the east side of Northside Drive, southeast of its intersection with Ivey Terrace (a/k/a **352 Northside Drive, NW**) from Office and Institutional (O-I) and General Business (G-B) to Office and Institutional (O-I) with a special use.  
 Ward Number: Four  
 Tax Parcel Number(s): 01-025-005-010  
 Request: Single-family residence

**Meeting Date:** 12/14/2021

**Purpose of Request:**

The applicant is proposing to rezone the property with a special use for a single-family residence. The property is vacant of structures but was originally developed for a single-family home many years ago. The preliminary design of the home is for a single-story over a basement, 2,500 square foot home to include an attached in-law suite and a detached garage. The proposed architecture of the home will resemble a cottage/bungalow/craftsman style home similar to the original home that burned down around 1970. Adjacent uses include residential condominiums, quadplex, single-family home, AHAVA Hair Salon and professional offices.

**History/Background:**

**Facts & Issues for Consideration:**

**Department Recommendation:**

Planning staff recommended approval with one condition. See the Staff Recommendation report for details.

▪ **Applicant's Proposal and Background Information**

The applicant is proposing to rezone the property with a special use for a single-family residence. The home will be occupied by the applicant. The property is vacant of structures but was originally developed for a single-family home many years ago. The preliminary design of the home is for a single-story over a basement, 2,500 square foot home to include an attached in-law suite and a detached garage. The proposed architecture of the home is intended to resemble a cottage/bungalow/craftsman style home similar to the original home that burned down around 1970. One driveway for access is proposed off of Northside Drive.

▪ **Adjacent Land Use and Zoning**

▪ **Other Departmental Comments**

There were no other departmental comments for this request.

▪ **Zoning History**

*The following zoning actions have taken place in the immediate area during the last ten years:*

**2021** - A request by Dave Odom to rezone a 0.50± acre tract located at 341 and 361 Oak Street, NW, from General Business (G-B) to Planned Unit Development (P-U-D) was conditionally approved for mixed-use residential and commercial.

**2020** – A request by Juan Luna for a special use within Neighborhood Business (N-B) zoning on a 1.66± acres tract located at 0, 903, 915, 919, 921, 925 and 927 Washington Street, NW was conditionally approved for twenty apartments.

**2018** – A request by KRM 2016, LLC for a special use within Neighborhood Business (N-B) zoning on a 0.82± acre tract located at 520 Washington Street, NW was conditionally approved for five duplex apartments.

▪ **Staff Analysis**

**(1) Is the proposed use suitable in view of the zoning and development of adjacent and nearby property?**

The adjacent properties consist of a mixture of residential and nonresidential uses and are zoned Office and Institutional (O-I), General Business (G-B) and Central Business (C-B). The subject property has historically been occupied for single-family residential purposes which is consistent with the proposal.

**(2) Will the proposed use adversely affect the existing use or usability of adjacent or nearby property?**

The proposed single-family home will restore the subject property to its original use. Given the small scale of the proposal, there should be no adverse effects to the adjacent or nearby properties.

**(3) Is the proposed use compatible with the purpose and intent of the Comprehensive Plan?**

The Gainesville Future Development Map for the City of Gainesville places the property within the *Mixed-Use Downtown* land use category. Land uses allowed in the *Mixed-Use Downtown* category include mixed-use, retail, office and residential.

According to the Character Area map for the City of Gainesville, the subject property is located within the *Central Core* Character Area. The vision for this area is to continue to evolve as the symbolic heart of the city and should strive for a more sustainable mixture of uses. Recent and ongoing public improvements Downtown have begun a long-term transition to more diverse land uses and redevelopment opportunities. Land uses supported in this Character Area include mixed-use, medium-density residential, multi-family residential, commercial, parks / recreation / conservation.

**(4) Are there substantial reasons why the property cannot or should not be used as currently zoned?**

The property currently has a split zoning of Office and Institutional (O-I) and General Business (G-B). The intent is to rezone the entire property to O-I with a special use to allow for a single-family home. Presently, the property could be developed for office and partly commercial. A zoning of O-I would allow the proposed home to be converted to professional office space if so desired in the future.

**(5) Will the proposed use cause an excessive or burdensome use of public facilities or services, including but not limited to streets, schools, water or sewer utilities, and police or fire protection?**

City water, sewer and public safety services are currently provided to the property. Gainesville Fire Station #1 off of Queen City Parkway is located approximately 1.2± miles from the subject property.

The applicants do not have school age children. Any future impact to the school system would be minimal given that only one home is proposed.

The proposal will slightly increase ingress and egress traffic movements along Northside Drive but will be insignificant.

**(6) Is the proposed use supported by new or changing conditions not anticipated by the Comprehensive Plan or reflected in the existing zoning on the property or surrounding properties?**

The Comprehensive Plan identifies the need for quality housing within the downtown area. New attached housing in the form of condominiums and townhomes have been or are in the process of being redeveloped along nearby Bradford Street, Oak Street and Forrest Avenue. It is anticipated that nearby residential properties located west of downtown will continue to be desirable for improvement given they are situated within an area that is walkable to downtown office, retail, restaurant and public uses.

**(7) Does the proposed use reflect a reasonable balance between the promotion of the public health, safety, morality, or general welfare and the right to unrestricted use of property?**

Based on the Comprehensive Plan and the adjacent residential uses, the proposal appears to reflect a reasonable balance between the promotion of the public health, safety, morality, or general welfare and the right to unrestricted use of property.

---

**Additional Criteria**

**(1) The type of street providing access to the subject property is adequate to serve the proposed Special Use.**

Northside Drive is a local road maintained by the City of Gainesville. Access and capacity are sufficient for the proposed single family home.

**(2) Access into and out of the property adequately provides for traffic and pedestrian safety, the anticipated volume of traffic flow, and access by emergency vehicles.**

Access is sufficient given the property's proximity to downtown which is conducive for pedestrian connectivity. The subject property is located west of downtown and is walkable to the nearby Ivey Terrace Park, Rock Creek Park, Veterans Park, Highlands to Islands trail network, public library, shopping and restaurants.

**(3) Public facilities such as schools, water or sewer utilities, and police or fire protection are adequate to serve the Special Use.**

Existing public facilities are adequate to serve the proposed use.

**(4) Refuse, service, parking and loading areas on the property are located and screened to protect other properties in the area from such adverse effects as noise, light, glare or odor.**

The proposed residential use will function similar to other single-family homes within the city limits. There should be no issue with noise, light, glare or odor. Solid waste services will be provided by the City.

**(5) The hours and manner of operation of the Special Use have no adverse effects on other properties in the area.**

The property will be occupied as a single-family residence and will operate as such. No adverse effects are anticipated.

**(6) The height, size and location of the buildings or other structures proposed on the property are compatible with the height, size or location of buildings or other structures on neighboring properties.**

The height and size of the proposed residential home, attached in-law suite and garage appear to be in scale and in character with the surrounding area.

▪ **Staff Recommendation**

The Planning Division staff is recommending **conditional approval** of this request based on the Comprehensive Plan and the adjacent residential uses.

**Condition**

- 1. The proposed single-family home shall be generally consistent with the standards depicted on the concept plan and architectural picture provided with this application.**

Application for Rezoning to O/I with Special Use Permit to  
build single family residence

Fred and Olivia Skey

Eager for a walking lifestyle and desiring to live close to the square in downtown Gainesville, we were thrilled when one of our walks took us down Northside Drive. We knew as soon as we saw this lot that it was just the right location for us. Our hope is that we can build a new home here in 2022, living in a condo we own off Green St in the meantime. We plan to engage an architect who can assist us in the planning details, including an in-law suite and features that will allow us to age in place. If approved, this will allow us to actively engage and participate in the vibrant city life of Gainesville. We are excited at the prospect of walking and cycling on the Midtown Greenway as well as walking to almost everything - the square, library, post office, Frances Meadows Aquatic Center, History Center, Brenau, church, and events - and we will gladly work with the City to assure that our plans are compliant with all City plans and regulations. Thank you for your consideration.

Tax Parcel Number(s): 01-119C-001-001, 001A, 029, 029A, 029D and 031  
Request: Master planned mixed-use rental community

**Meeting Date:** 12/14/2021

**Purpose of Request:**

The proposed rezoning is for a mixed-use rental community to include a total of 385 residential units and 17,000 square feet of commercial retail space to be called "AVA Shallowford Station." The property is the site of the Gainesville Market "Blueridge" Shopping Center, outdoor soccer field, office/ warehouse and U-Haul dealer. Specifically, the residential component is intended to be 100% rental to include a 4-story, 200 unit multi-family apartment building, 2- to 3-story, 100 townhomes and 1- to 2-story, 85 single-family cottages. Apartments will range from studio, two and three bedrooms and ranging from 550 to 1,350 square feet in size. Townhomes will be two and three bedrooms ranging from 1,250 to 1,900 square feet with one-car garages. The single-family cottages will range from 1,650 to 2,200 square feet in size with one and two car garages. All proposed residential units will be market rate. Access is proposed from three existing driveways off of Shallowford Road to serve the commercial, apartments and cottages. As well, one driveway is proposed off of Skelton Road serving the townhomes. Surrounding uses include Target, the Army Reserve, single-family homes, Arby's, Gainesville Towne Center shopping center, Gallery Furniture and Jim Hardman auto dealership.

▪ **Applicant's Proposal and Background Information**

The applicant is proposing to rezone the subject property from Neighborhood Business (N-B) and General Business (G-B) to Planned Unit Development (P-U-D) for a mixed-use rental community. The anticipated completion date of the project is the year 2024. The 24.857± acres property consists of six parcels of which three smaller parcels are zoned N-B and three larger parcels are G-B. The property is the site of the Gainesville Market "Blueridge" Shopping Center, an outdoor soccer field, office/warehouse building and U-Haul rental office.

The development is to include a total of 385 residential units and 17,000 square feet of commercial retail space to be called "AVA Shallowford Station." A full description of the proposed development standards can be found within the applicant's narrative which is provided with this rezoning request.

**Residential**

Specifically, the residential component is intended to be 100% market rate rentals to include a 200 unit multi-family apartment building (4-stories); 100 townhomes (2 to 3 stories) and 85 single-family cottages (1 to 3 stories). The apartments consist of 120 studio/1 bedroom units and 80 two bedroom units ranging from 550 to 1,350 square feet in size. The townhomes consist of two and three bedrooms ranging from 1,250 to 1,900 square feet in size with one-car garages. The single-family cottages will range from 1,650 to 2,200 square feet in size with one and two car garages. Exterior architectural standards for the residential products include a mixture of cementitious materials including Hardie plank, board and batten and brick materials.

**Amenities**

Some of the amenities include a 2,000+ square feet of fitness facilities, 1,700 to 2,000+ square feet of co-working facilities, multiple resort pools, outdoor living space, private dining/demonstration kitchens, tech-enable package locker systems, bike storage, virtual sports simulators, oversized dog parks and bark spas. The entire property will be professionally managed by an experienced multi-family residential operator specializing in Class-A apartment

communities. Solid waste is to be provided by the City of Gainesville except for the multi-family apartments, amenities and commercial uses.

### Commercial

Commercial space includes up to 15,000 square feet of retail or restaurant space and an additional 2,000 square feet of pop-up retail space fronting Shallowford Road.

### Access

Access is proposed from three existing driveways off of Shallowford Road to serve the commercial, apartments and cottages. As well, one driveway is proposed off of Skelton Road serving the townhomes; however, pedestrian connectivity will be provided to the apartment and cottage pods. The minimum driveway width is 24-feet with fire lanes being a minimum of 26-feet in width. Concrete sidewalks will be constructed throughout the complex with a well landscaped environment.

### Parking Ratio

- 2.0 parking spaces per single family cottage and townhome unit
- 1.3 spaces per multi-family unit
- 1 space per 125 square feet for restaurant space (Shared parking allowed)
- 1 space per 275 square feet of retail spaces (Shared parking allowed)

### Signage

A maximum of three (3) entry monument signs not to exceed 15-feet in height, 120 square feet of sign face and 160 square feet of sign structure area with decorative internal or external lighting. In addition, no more than three (3) blade signs located on the retail building.

### ▪ **Adjacent Land Use and Zoning**

| Location | Use                                                                                        | Zoning                                                                                           |
|----------|--------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| North    | Target, Lowe's and Walmart<br>US Army Reserve Center                                       | Regional Business (R-B) -City<br>Highway Business (H-B) -County                                  |
| South    | Gainesville Towne Center (Big Lots /<br>Harbor Freight); Jim Hardman; Gallery<br>Furniture | General Business (G-B) -City                                                                     |
| East     | Arby's restaurant, Walgreen's, Regions<br>Bank branch                                      | General Business (G-B) -City                                                                     |
| West     | Single-family homes; Crowder Signs                                                         | Residential-I (R-I) -County<br>Highway Business (H-B) -County<br>Suburban Shopping (S-S) -County |

Other significant uses within the area include Lakeshore Mall and the Walton Harbor Apartments under development.

### ▪ **Traffic Summary**

A Traffic Impact Study was conducted for the proposed development on September 10, 2021. A brief summary of the findings is provided below. The entire study is provided as part of the supporting documents. Of note, the study was based off of a total of 336 residential units and 12,500 square feet of commercial space which is less than the actual proposed 385 residential units and 17,000 square feet of commercial space.

#### Studied intersections:

1. Skelton Road at U-Haul Driveway/Future Site Driveway #1\*\*\*
2. Shallowford Road at Skelton Road
3. Shallowford Road at Albert Street/Commercial Driveway #1/Future Site Driveway #2\*\*\*
4. Shallowford Road at Regions Bank Driveway/Commercial Drive #2/Future Site Driveway #3\*\*\*
5. Shallowford Road at Commercial Driveway #3/Future Site Driveway #4\*\*\*
6. Pearl Nix Parkway at Shallowford Road

An average traffic growth rate of 1.3% was established for each year for a 5-year and 15-year period. The estimated build out date for the entire development is 2024. The estimated total new trips include 2,597 daily trips, 1,297 Peak Hour trips entering and 1,300 trips exiting; 115 AM Peak Hour trips entering /154 AM trips exiting; 135 PM Peak Hour trips entering / 99 PM trips exiting.

Based on the findings in this study, the proposed project is not expected to significantly impact the roadway network surrounding the development. However, the stop controlled intersection at Shallowford Road and Driveway #3 across from Albert Street will continue to experience a Level of Service E during the PM peak period with northbound left turn movements.

The eastbound left-turn queue at the intersection of Pearl Nix Parkway and Shallowford Road is expected to extend beyond the existing storage bay during the PM peak period. Currently, the striped left-turn lane is only 80'; however, the left-turn lane could be extended by utilizing the existing two-way left turn lane (TWLTL) along Shallowford Road. If queues in excess of 80' are experienced, it is expected that the existing TWLTL will accommodate the additional vehicles without affecting the operation at this intersection, or those in the immediate vicinity. Additionally, the eastbound left-turn movement is not currently receiving a lot of green time in the existing timing parameters. It is expected that small increments of green time for the eastbound left-turn movement will reduce the queue lengths currently shown in the table above.

### ▪ **Other Departmental Comments**

Coordination will be required from the Gainesville Public Works Department and the Georgia Department of Transportation (GDOT) regarding access improvements to the site.

Further discussion will be needed regarding the solid waste service from the City. The City can provide solid waste pick-up for the single-family detached cottages and possibly the townhomes depending on accessibility and other criteria. The multi-family apartments, businesses and all amenity areas will be handled privately.

There were no comments from other departments for this request.

### ▪ **Zoning History**

*The following zoning actions have taken place in the immediate area during the last ten years:*

**2019** – A request by the Gainesville Housing Authority to rezone a 6.822± acres tract located at 320 Tower Heights Road from Residential-II (R-II) to Planned Unit Development (P-U-D) was approved with conditions for multi-family apartments.

**2018** – A request by REB Land Development, LLC to rezone a 2.744± acres tract located at 621 Lakeshore Drive from Residential-I (R-I) to General Business (G-B) for a multi-tenant retail, office and restaurant was withdrawn.

**2017**- A request by Gainesville Market, LLC for a special use within General Business (G-B) zoning on a 5.0± acres located at 600 Shallowford Road was approved with conditions for a commercial outdoor recreational facility.

**2017** – A request by Masy Seng to annex a 0.19 ± acre tract with a zoning of General Business (G-B) located at 593 and 597 Shallowford Road was conditionally approved for a donut shop.

▪ **Staff Analysis**

**(1) Is the proposed use suitable in view of the zoning and development of adjacent and nearby property?**

The subject property is located within the heart of a regional shopping district. The surrounding uses mostly non-residential uses to the north, south and east with zonings of General Business (G-B), Highway Business (H-B), Reginal Business (R-B) and Neighborhood Business (N-B). The property located to the west is located within unincorporated Hall County and consist of mostly single-family homes and small businesses zoned Residential-I (R-I), Highway Business (H-B) and Suburban Shopping (S-S). The proposed location of the retail/restaurant component is consistent with the adjacent uses. The proposed residential component includes 385 residential units which appears to be too aggressive for the property.

**(2) Will the proposed use adversely affect the existing use or usability of adjacent or nearby property?**

The proposed mixed-use development will increase traffic loads and turning movements along Shallowford Road and Skelton Road given the scale of the proposal. Based on the proposed plan, the existing residential homes to the west along Hudgins Street will be buffered and no direct access is proposed. However, the adjacent residential streets located within the county serve as a cut through from Browns Bridge Road, Skelton Road and Shallowford Road.

**(3) Is the proposed use compatible with the purpose and intent of the Comprehensive Plan?**

The subject property is located within the *Retail/Commercial* land use category which includes commercial service activities such as grocery stores, banks, restaurants, theatres, hotels, and automotive related businesses. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

The subject property is also located within the *Browns Bridge Corridor* Character Area. The vision for this area encourages long term activity center nodes at the Pearl Nix Parkway intersection to include public space improvements, better pedestrian facilities and connections. Targeted redevelopment of outdated strip commercial is also encouraged.

Residential uses are not listed as an appropriate use based on the Future Land Use Map but may be considered where appropriate within the Character Area at the appropriate residential density

between 4 to 12 dwelling units per acre. The proposal is for a mixed-use development which includes up to 17,000 square feet of commercial space and 385 market-rate rental units at a density of 15.5 dwelling units per acre. Staff believes the proposal as presented is too dense and should be reduced by a *minimum* of 85 units. This is based on the subject property being located within an established commercial corridor and within the *Retail/Commercial* land use category.

**(4) Are there substantial reasons why the property cannot or should not be used as currently zoned?**

The property is currently zoned Neighborhood Business (N-B) and General Business (G-B). Most of the property is blighted and should be redeveloped. A zoning of P-U-D may be appropriate for the site at the appropriate density range under 12 dwelling units per acre.

**(5) Will the proposed use cause an excessive or burdensome use of public facilities or services, including but not limited to streets, schools, water or sewer utilities, and police or fire protection?**

Existing water and sewer are currently on site and there is sufficient capacity.

Gainesville Fire Station #1 located off of Queen City Parkway is approximately 2.0± miles from the subject property and currently serves the site.

According to the Traffic Study for the proposed rezoning request, the estimated total new trips include 2,597 daily trips, 269 AM Peak Hour trips and 234 PM Peak Hour trips.

The proposed request will have impact on the City School System given a total of 385 residential units are proposed. The actual number of school aged children is unknown. It's expected that not all would be occupied by children given that some of the rental units are studio, one and two bedroom units.

**(6) Is the proposed use supported by new or changing conditions not anticipated by the Comprehensive Plan or reflected in the existing zoning on the property or surrounding properties?**

The surrounding area falls within a mixed-use area which contains some older properties in need of redevelopment. The anticipated future uses for the surrounding area are primarily for non-residential purposes given the surrounding commercial and availability of sewer. Limited residential development is plausible to help support existing and new commercial uses.

**(7) Does the proposed use reflect a reasonable balance between the promotion of the public health, safety, morality, or general welfare and the right to unrestricted use of property?**

Due to the Comprehensive Plan, proposed residential density and the adjacent commercial uses, the proposal does not appear to reflect a reasonable balance between the promotion of the public health, safety, morality, or general welfare and the right to unrestricted use of the property.

---

▪ **Staff Recommendation**

The Planning Division staff is recommending **denial** of this request based on the Comprehensive Plan, proposed residential density and the adjacent commercial uses.

## EXECUTIVE SUMMARY

AVA Shallowford Station is a Planned Unit Development located at 610 Shallowford Road within the limits of the City of Gainesville, Georgia. The property is located within the Browns Bridge Character Area and with access to Shallowford Road and Skelton Road

The property is an assemblage of several individual parcels with an aggregated parcel totaling 24.857 +/- acres. The property is contiguous and contains a former home used for office and the former Blue Ridge Shopping Center.

The current zoning of the property includes:

GB – General Business

NB – Neighborhood Business

Currently, the site is mostly an old and functionally obsolete shopping center. There are no streams or wetlands on the site and no known historical sites. The property is bounded by a number of uses and zoning districts including G-B, H-B, S-S and R-1.

The development concept is an innovative urban master plan, mixed use, rental community incorporating multiple types of residential and retail uses. The project will include: 1) a four story apartment project consisting of Studios, one, two, and three bedrooms ranging in size from 550-1,350sf; 2) Two and Three story Townhomes with two and three bedrooms ranging from 1,250-1,900sf; and 3) One and two story detached Single-Family Cottages ranging from 1,650sf- 2,200+sf. The SF and TH will self-park with a combination of one and two car garages and driveways. The MF parking will be provided at a ratio of 1.30 spaces per unit. All units in the development will lease at market rates and none of the units will be subsidized.

TWO Capital Partners focuses on an affluent renter by choice who desires the full suite of services and amenities our communities offer, and in varying residential product types as they age and their needs of housing change. Our customer tends to be older, more affluent, and with higher educational attainment levels than the overall trade area demographic. TWO's developments have very robust amenities that include: 2,000 sf+ fitness facilities, 1700-2000 sf co-working facilities, multiple luxury resort pools with expansive focus on outdoor living, private dining/demonstration kitchens, tech-enable package locker systems, virtual sports simulators, and oversized dog parks and bark spa's. Our unit amenities continue this trend with oversized Kitchens, including expansive eat in islands, mud-rooms, built in desks, large walk in closets, luxury finishes, and multiple tech-enabled features including keyless entry, smart thermostats, in unit Bluetooth enabled speaker system, and in select units smart lighting.

The property will have easy vehicular access to Browns Bridge Road, Dawsonville Highway and downtown Gainesville. It is strategically located for quick access to I-985 via Queen City Parkway. Pedestrian access to a variety of retail and commercial uses will be provided.

## COMPREHENSIVE PLAN CONSISTENCY

The AVA Shallowford Station Planned Unit Development is consistent with the City of Gainesville's vision for future land use in Urban Redevelopment Areas.

The intent of a Planned Unit Development (PUD) is to:

- Provide for maximum flexibility in the mixture and arrangement of land uses and unique and innovative land planning via planned unit developments, at appropriate locations, and with appropriate sizes and scales.
- Redevelopment and infill opportunities of underutilized and re-purposed sites are one of Gainesville's greatest challenges as their redevelopment can help further transform these areas for more desirable uses. Development of these infill sites can reduce the need to travel further to shop or work, preserve lands further out, and provide better utilization of existing infrastructure.

With proper planning, well designed architectural themes and an emphasis on livability, the goal of the AVA Shallowford Station Planned Unit Development is to provide a high level of compatibility with City of Gainesville's 2040 Comprehensive Plan Goals for the Browns Bridge Corridor as follows:

1. Targeted redevelopment of outdated strip commercial
2. Provide for a vibrant, human-scaled and pedestrian friendly community.

This new community will integrate seamlessly within the City's goal of bringing medium density, mixed use development to this corridor. The efforts of the City to redevelop this area will be benefited by another high quality project mixed use project with multiple housing options.

AVA Shallowford Station will set the example as a well-conceived redevelopment by not only meeting the Comprehensive Plan goals but also by transforming neglected and outdated resources into a livable community that will create new living opportunities for Gainesville's growing urban population.

## DEVELOPMENT SUMMARY

|                               |                                                                                                                                                                                                                                                                                  |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Property Address:</b>      | 610 Shallowford Road, Lot 165 & 170, 9th District, Gainesville, Georgia                                                                                                                                                                                                          |
| <b>Site Area:</b>             | 24.857 AC +/-                                                                                                                                                                                                                                                                    |
| <b>Existing Zoning:</b>       | GB – General Business & N-B – Neighborhood Business                                                                                                                                                                                                                              |
| <b>Existing Conditions:</b>   | Dilapidated and functionally obsolete shopping center                                                                                                                                                                                                                            |
| <b>Proposed Uses:</b>         | A mixed use, urban planned development incorporating vibrant, human-scaled living spaces, abundant interior and exterior amenity, retail, a pedestrian friendly location.                                                                                                        |
| <b>Proposed Density:</b>      | 15.5 DU/AC                                                                                                                                                                                                                                                                       |
| <b>Site Development:</b>      | <p>Maximum Residential Units: 385<br/>Multi-Family – 200 (220,000 NRSF)<br/>Townhomes – 100<br/>Single Family - 85</p> <p>Maximum Commercial Square Footage<br/>Retail or Restaurant – 15,000 sf<br/>Pop Up Retail – 2,000 sf</p>                                                |
| <b>Max. Structure Height:</b> | <p>Multi-Family - 60', measured from the average grade plane to the top of the roof (not including parapet heights). Parapet heights shall not exceed 65', measured from the average grade plane to the top of the parapet.</p> <p>Single Family &amp; Townhomes – 3 stories</p> |
| <b>Open Space:</b>            | As exhibited in the Concept Plan, community Open Space will be provided in throughout the project.                                                                                                                                                                               |
| <b>Parking:</b>               | As shown for each use in the General Guidelines, located throughout the development via driveways and surface lots.                                                                                                                                                              |
| <b>Flexibility:</b>           | As the Developer progresses with design and approval of the project, it is understood that minor revisions may occur to the Concept Plan and that staff level approval will be granted as long as overall design intent and proposed density are not be exceeded.                |

## AERIAL OVERVIEW

DRAWINGS AND SPECIFICATIONS ARE PROPRIETARY AND PROPERTY OF TWO CAPITAL PARTNRS. NO USAGE ON ANY OTHER PROJECT OR DESIGN PERMITTED. VIOLATIONS SUBJECT TO FULL PROSECUTION UNDER LAW. USAGE FOR ANY REASON OUTSIDE OF THIS SPECIFIC PROJECT MUST HAVE WRITTEN PERMISSION FROM MCNEAL TWO CAPITAL PARTNERS.

## **GENERAL GUIDELINES**

### **A. PARKING**

Parking is being proposed as follows:

- 1.3 parking spaces per multi-family unit
- 1/125 SF for Restaurant (shared parking allowed)
- 1/275 SF for Retail (shared parking allowed)
- 2.0 parking spaces per single family unit
- 2.0 parking spaces per townhouse unit

### **B. RESIDENTIAL UNITS**

The multi-family units will consist of a mix of Apartments, Single-Family Detached, and attached Townhomes ranging from studios to four-bedrooms.

### **C. BUILDING HEIGHTS & MASSING**

Structure heights are permitted to a maximum sixty feet (60'), measured from the average grade plane to the top of the roof (not including parapet heights). Parapet heights shall not exceed 65', measured from the average grade plane to the top of the parapet.

### **D. PROFESSIONAL MANAGEMENT**

The property will be professionally managed by an experienced multifamily residential operator specializing in Class-A apartment communities. The property management company will be responsible for maintenance of the complex as well as leasing and amenities.

### **E. UTILITIES**

The City of Gainesville will provide water and sewer services via existing adjacent infrastructure. Power and natural gas will be provided by Georgia Power. Garbage collection will be provided by the City of Gainesville. Storm water management is proposed through surface ponds or underground facilities as dictated by the final design.

### **F. SIGNAGE**

Up to three entry signage monuments, at a height maximum of fifteen feet (15') each, with a maximum sign face area of 120 sf and a maximum sign structure area of 160 sf, identifying the project will be placed in future locations, to be determined, at complex's entry along Skelton Road and Shallowford Road. The monuments will be illuminated with decorative lighting for wayfinding purposes. Up to three additional blade signs may be located on the retail building.

Entry monuments, supporting decorative landscape and infrastructure (such as landscape lighting & irrigation) shall occur outside of the public Rights-of-Way and therefore will be exempt from City & State encroachment requirements.

### **G. LANDSCAPE**

Decorative and supplemental landscaping may be provided throughout the development, adjacent to the Public Right-of-Way, and internal to the complex. Decorative landscape and infrastructure (such as landscape lighting & irrigation) shall occur at key focal points within the property.

### **H. LIGHTING**

The Developer will prepare a lighting plan for street lights (in conjunction with Georgia Power) and may also provide decorative building, landscape, site & tree lighting throughout the development and adjacent to the public streets surrounding the property. Buildings and entry

signage may be illuminated for the purposes of safety and wayfinding.

**I. STREETS & SIDEWALKS**

The Developer will construct interior driveways to serve access to the complex. The minimum driveway width will be twenty-four (24'), with fire lanes being a minimum of twenty-six (26'). Access to and from the complex will occur over public Rights-of-Way from existing streets.

Concrete sidewalks will be constructed throughout the complex with interconnectivity to the amenities and other public sidewalks systems along Shallowford Road.

**J. TREES**

Street trees and other shade and decorative trees will be planted throughout the complex with the intent of creating a well landscaped environment that is both functional and aesthetically pleasing.

**K. CITY BENEFIT**

AVA Shallowford Station will provide The City of Gainesville with an innovative urban Planned Unit Development incorporating multiple housing options and lifestyle amenities for an active residential living opportunity in the rapidly redeveloping Browns Bridge Corridor.

The development will bring additional residents to the Browns Bridge Corridor to support existing and future businesses. Residents will be within walking distance to many of these businesses, which will allow them to not use their car to access local businesses and in turn reduce traffic congestion.

**L. COMMUNITY AMENITIES**

- Located in Browns Bridge Corridor where residents will be able to walk to a variety of retail opportunities including big box stores and fast casual restaurants.
- Direct connection to the public sidewalk system along Shallowford Road.
- On-site community retail
- Expansive park area along Shallowford Road with popup retail pods for community gathering and sense of arrival.
- Expansive community amenities located both in the Multi-Family building as well as along the common greenway in the Single-Family district.
- Large 2,000 sf Co-Working Facility
- High-speed Wi-Fi for resident use in all amenity spaces.
- 2,000 sf+ Fitness Center with high-end Fitness Equipment and Yoga Room with Fitness on Demand classes overlooking the resort-style pool.
- Multiple Resort-style saltwater pool with sundeck and outdoor pavilion with gas grilling station (one at the MF bldg. and one at the SF District).
- Pet Spa with washing and drying stations, and outdoor dog park.
- Bike Storage with repair stations.
- Indoor Mail and Package Storage Room, plus Package Concierge provider Fetch that allows residents to schedule package delivery to their apartment.
- Dry Cleaning Lockers.
- Access control to the conditioned corridor buildings.

**M. Residential Unit Features**

- Multiple product types and Floorplans with 9 Foot Ceilings Throughout.
- SF & TH include one and two car garages with private backyards.
- Gourmet kitchens with stainless steel appliances, and large eat in islands.
- Granite and quartz countertops (depending on unit type) and luxury cabinets with tile backsplash plus under cabinet lighting.
- Energy efficient LED light fixtures throughout the home.
- Wood-style flooring throughout Kitchen, Living Room, Bathroom, and Bedroom (depending on unit type).
- Ceiling Fans in Bedrooms.
- Oversized Closets with Ample Storage.
- Full Size Washer and Dryer in unit.
- Private Balcony or Patio in Unit.
- In unit Bluetooth speaker system
- Select ground floor units will have direct access stoops, allowing residents to enter their unit from the street.
- Smarthome thermostats and integrated USB ports in Kitchens.
- High-speed Fiber Internet Service to each unit.

# **SURVEY NOTES**

1. THE FIELD DATA DATED 7/22/21 UPON WHICH THIS PLAT IS BASED HAS A CLOSURE PRECISION OF ONE FOOT IN 423,869 FEET AND AN ANGULAR ERROR OF 8" SECONDS PER ANGLE AND WAS ADJUSTED USING THE COMPASS RULE. A TRIMBLE S-SERIES ROBOTIC TOTAL STATION WAS USED FOR ANGULAR AND LINEAR MEASUREMENTS.
2. THIS PLAT HAS BEEN CALCULATED FOR CLOSURE AND IS FOUND TO BE ACCURATE WITHIN ONE FOOT IN 423,869 FEET.
3. THE HORIZONTAL DATUM FOR THIS SURVEY IS THE NORTH AMERICAN DATUM OF 1983 (NAD 83 GEORGIA WEST ZONE) AND THE VERTICAL DATUM USED IS THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD83) AS DETERMINED BY UTILIZING GPS. THE EQUIPMENT USED TO OBTAIN THIS DATA WAS A DUAL FREQUENCY TRIMBLE R10 GPS RECEIVER WITH A TRIMBLE TSC3 DATA COLLECTOR RECEIVING RTK CORRECTIONS VIA A WIRELESS NETWORK FROM BASE STATIONS OPERATED BY TRIMBLE NAVIGATION. THE AVERAGE RELATIVE POSITIONAL ACCURACY OBTAINED ON THE POSITIONS UTILIZED IN THIS SURVEY WAS 0.04 FT. HORIZONTAL AND 0.07 FT. VERTICAL. THESE VALUES WERE DERIVED FROM GPS PROCESSING SOFTWARE. THE REMAINDER OF THE FIELD WORK WAS PERFORMED WITH CONVENTIONAL EQUIPMENT AS DESCRIBED ABOVE.
4. THE UNDERGROUND UTILITIES SHOWN HEREIN HAVE BEEN MARKED BY UTILITY MARKING, INC. (678-327-1948) DATED 7/10/21 AND FIELD LOCATED BY ROCHESTER & ASSOC., INC. PERSONNEL. THE SURVEYOR MAKES NO GUARANTEE THAT THE UNDERGROUND UTILITIES SHOWN COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. THE SURVEYOR FURTHER DOES NOT WARRANT THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED ALTHOUGH HE DOES CERTIFY THAT THEY ARE LOCATED AS ACCURATELY AS POSSIBLE FROM THE INFORMATION AVAILABLE. THE SURVEYOR HAS NOT PHYSICALLY LOCATED THE UNDERGROUND UTILITIES.
5. NO IDENTIFIED AND DELINEATED WETLANDS WERE OBSERVED DURING THE COURSE OF THE FIELD SURVEY. HOWEVER THIS SURVEYOR DID NOT DO A THOROUGH INSPECTION OF THE INTERIOR OF THIS SITE. THEREFORE EXCEPTION IS MADE HEREIN TO ANY WETLANDS THAT MAY EXIST WITHIN THE BOUNDARIES OF THIS SITE.
6. NO PORTION OF THIS SURVEY IS LOCATED IN A FLOOD HAZARD ZONE PER F.E.M.A. INSURANCE RATE MAP OF HALL COUNTY, GEORGIA. MAP NO. 1313C0188G & 1313C0187G, REVISED DATE APRIL 4, 2018.
7. DURING THE FIELD SURVEY PERFORMED ON THIS SITE THERE WERE NO VISIBLE ABOVE GROUND EVIDENCE OF A HUMAN BURIAL AREA OR CEMETERY OBSERVED. HOWEVER, THIS SURVEYOR DID NOT PERFORM A THOROUGH INSPECTION OF THE INTERIOR OF THIS SITE. THEREFORE EXCEPTION IS MADE HEREIN TO ANY HUMAN ANCHORS OR CEMETERIES THAT MAY EXIST WITHIN THE BOUNDARIES OF THIS SITE.
8. THIS PROPERTY MAY BE SUBJECT TO EASEMENTS, RESERVATIONS, RIGHT-OF-WAY, OR RESTRICTIONS WHICH ARE NOT RECORDED OR NOT DISCLOSED BY THE TITLE COMMITMENT OR OTHERWISE UNKNOWN TO THE SURVEYOR; THEREFORE EXCEPTION IS TAKEN TO ANY SUCH ITEMS.
9. ALL PROPERTY CORNERS REFERENCED AS "PS" INDICATES A 1/2" REBAR PLACED WITH A YELLOW PLASTIC CAP STAMPED "ROCHESTER-LSF000484", UNLESS OTHERWISE NOTED.
10. THIS PLAT IS FOR THE EXCLUSIVE USE OF THE ENTITIES SHOWN HEREIN; ANY USE BY THIRD PARTIES IS AT THEIR OWN RISK.
11. ALL DISTANCES AS SHOWN ARE HORIZONTAL GROUND DISTANCES IN U.S. FEET (39.37 INCHES = 1 METER).
12. NO ZONING REPORT OR LETTER WAS PROVIDED AT THE TIME OF THE SURVEY. (TABLE A, ITEM (c)).
13. THERE WAS NO EVIDENCE OF RECENT EARTH MOVING WORK, BUILDING CONSTRUCTION, OR BUILDING ADDITIONS OBSERVED IN THE PROCESS OF CONDUCTING THE FIELD WORK. (TABLE A, ITEM 1B).

THIS BLOCK RESERVED FOR THE CLERK OF THE SUPERIOR COURT

# Conceptual Site Plan

Shallowford Rd | Gainesville, GA

DEVELOPER & APPLICANT:  
TWO CAPITAL PARTNERS  
3060 PEACHTREE ROAD NW,  
SUITE 960  
ATLANTA, GA 30305

EXISTING ZONINGS:  
G-B & N-B

PROPOSED ZONING:  
PUD

TOTAL SITE AREA:  
24.86± ACRES

| Dimensional Standards for Townhomes        |                           |
|--------------------------------------------|---------------------------|
| Existing Zoning                            | N-B & G-B                 |
| Maximum # of Units                         | 100                       |
| Maximum # Units per Building               | 8                         |
| Exterior Setback to G-B Zoning             | 10'                       |
| Exterior Setback to R-3 Zoning             | 10'                       |
| Exterior Setback to Hudgins Street         | 10'                       |
| Streets                                    | Private                   |
| Water & Sewer Provider                     | City of Gainesville       |
| Sidewalks                                  | as shown on Concept Plan  |
| Amenities                                  | shared with Single Family |
| Minimum lot width @ building line          | 18'                       |
| Minimum lot depth                          | 100'                      |
| Minimum lot area                           | 1800 sf                   |
| Maximum height                             | 35'                       |
| Front setback                              | 0'                        |

# 1. INTRODUCTION

---

## 1.1. Study Area

The study area for this proposed project is located between Shallowford Road and Hudgins Street, and east of Skelton Road. Figure 1 presents the location of the project site and identifies the existing and proposed study intersections. There are currently six study intersections included within the scope of this study, and four of those intersections are expected to become driveways for the proposed development. The study intersections are listed below, with asterisks to represent intersections that are expected to become driveways for the proposed development.

1. **Skelton Road at U-Haul Driveway/Future Site Driveway #1\*\*\***
2. **Shallowford Road at Skelton Road**
3. **Shallowford Road at Albert Street/Commercial Driveway #1/Future Site Driveway #2\*\*\***
4. **Shallowford Road at Regions Bank Driveway/Commercial Driveway #2/Future Site Driveway #3\*\*\***
5. **Shallowford Road at Commercial Driveway #3/Future Site Driveway #4\*\*\***
6. **Pearl Nix Parkway at Shallowford Road**

## 1.2. Proposed Development

The proposed development will be positioned on approximately 25 total acres in Hall County. The development is proposed to consist of a 9,000 square foot of retail development, a 3,500 square foot fast-casual restaurant, 184 apartment units, 67 single-family rental units, and 85 townhome units. The proposed development will consist of four access points onto the surrounding roadways. In the northwestern quadrant, there is a full access driveway providing access to Skelton Road. Along Shallowford Road, there are three additional full access points. The proposed development is expected to be built in one stage and is expected to be built out in 2024. Currently, the proposed project site is occupied by a commercial development. The proposed site layout is provided in **Appendix A**.

## 1.3. Planned Transportation Improvements

A search for planned Georgia Department of Transportation (GDOT) projects in or near the study area was performed using the GDOT GeoPI web application (<http://www.dot.ga.gov/DS/Maps/geopi#>). Based on the results of that search, there were no projects found in the immediate vicinity of the study area.

FIGURE 1 - OVERVIEW OF STUDY AREA

FIGURE 2 - AERIAL VIEW OF STUDY AREA

## 2. EXISTING CONDITIONS

---

### 2.1. Roadways

**Pearl Nix Parkway** is a four-lane divided roadway running north-south that serves primarily commercial developments in the vicinity of the site. Pearl Nix Parkway begins at its intersection with SR 60/Queen City Parkway and continues through SR 53/Dawsonville Highway where it later drops to two-lanes and becomes Chestatee Road. It is classified as an urban minor arterial with a 35-mph speed limit in the vicinity of the site. Near the study area, there are pedestrian facilities to cross Pearl Nix Parkway along Shallowford Road; however, there are no bicycle or pedestrian facilities along the roadway.

**Shallowford Road** is a four-lane roadway, divided by a two-way left-turn lane, running east-west that serves primarily commercial developments in the vicinity of the site. Shallowford Road begins at its intersection with SR 53/Dawsonville Highway and continues east where it aligns with West End Avenue at its intersection with Pearl Nix Parkway. It is classified as an urban minor arterial with a 35-mph speed limit in the vicinity of the site. Near the study area, there are sidewalks along both sides of Shallowford Road. There are no bicycle facilities present along the roadway, however.

**Skelton Road** is a two-lane undivided roadway running north-south that serves a mixture of commercial and residential developments in the vicinity of the site. Skelton Road begins in the south at SR 369/Browns Bridge Road and continues north where it terminates at its intersection with Shallowford Road. The roadway segment is classified as an urban minor collector with a posted speed limit of 30 mph in the vicinity of the site. There are no bicycle or pedestrian facilities present within the study area.

### 2.2. Intersections

The following six intersections were identified to be studied (future site driveways marked with asterisks):

1. **Skelton Road at U-Haul Driveway/Future Site Driveway #1\*\*\***
2. **Shallowford Road at Skelton Road**
3. **Shallowford Road at Albert Street/Commercial Driveway #1/Future Site Driveway #2\*\*\***
4. **Shallowford Road at Regions Bank Driveway/Commercial Driveway #2/Future Site Driveway #3\*\*\***
5. **Shallowford Road at Commercial Driveway #3/Future Site Driveway #4\*\*\***
6. **Pearl Nix Parkway at Shallowford Road**

The existing lane geometries and intersection control types are presented in Figure 3.

FIGURE 3 - EXISTING AND PROPOSED INTERSECTION GEOMETRIES

### 3. TRAFFIC PROJECTIONS

---

#### 3.1. Existing Traffic Counts

The traffic data utilized for this project was collected on Wednesday, August 25, 2021. The count data includes weekday AM (7-9 AM) and PM (4-6 PM) peak period turning movement counts for each of the existing intersections. The following traffic counts were utilized:

- 4-Hour Turning Movement Count (TMC)
  - Skelton Road at U-Haul Driveway
  - Shallowford Road at Skelton Road
  - Shallowford Road at Albert Street/Commercial Driveway #1
  - Shallowford Road at Regions Bank Driveway/Commercial Driveway #2
  - Shallowford Road at Commercial Driveway #3
  - Pearl Nix Parkway at Shallowford Road

24-hour volume counts were also obtained for the following locations:

- Pearl Nix Parkway south of Shallowford Road
- Shallowford Road east of Skelton Road
- Skelton Road south of Shallowford Road

The Existing 2021 peak hour traffic information can be found in Figure 4. All traffic count data collected as part of this project can be found in **Appendix B**.

#### 3.2. COVID Traffic Check

Per the guidance of GDOT, any traffic counts obtained after March 2020 should have a COVID check performed. This COVID check compares pre-COVID volumes with post-COVID volumes to see if a correction factor needs to be applied to the traffic counts. The correction factor will try to align the post-COVID counts to be more in line with pre-COVID traffic volumes. The assumption is that traffic volumes have dropped post-COVID, however, it is anticipated that traffic volumes will eventually reach the same level they would have reached following a pre-COVID growth pattern.

The goal of this check is to make sure transportation projects are being planned for and built to the assumption that traffic volumes will recover to the level of pre-COVID volumes.

Our team performed this COVID check and determined that no COVID adjustment factor was needed. Please refer to **Appendix C** for these calculations.

#### 3.3. Future Background Traffic

A build-out year of 2024 was established for the project. To account for the growth over the next 3 years, an average annual growth rate was determined based on historical Average Annual Daily Traffic (AADT) counts recorded by nearby GDOT Count Stations. AADTs from the following stations were obtained from the Traffic Analysis and Data Application (TADA) website ([gdottrafficdata.drakewell.com](http://gdottrafficdata.drakewell.com)) to establish the growth rate:

- 0000139-0647; Shallowford Road, east of Skelton Road
- 0000139\_0709; Pearl Nix Parkway, north of Shallowford Road
- 0000139\_0707; Pearl Nix Parkway, south of Shallowford Road
- 0000139\_0188; Skelton Road, south of the proposed development

Both the 5-year and 15-year growth rates were calculated at each of the historical traffic count locations. The 5-year growth rate of the three locations averaged 1.3% while the 15-year growth rate averaged 2.5%. Overall, a 1.3% annual growth rate was used in this project. The growth rate calculations can be found in **Appendix D**. The 1.3% growth rate was applied to the Existing 2021 peak hour traffic for a period of three years to establish the Opening Year 2024 – Background traffic volumes. The Opening Year 2024 – Background peak hour traffic is shown in Figure 5.

### 3.4. Trip Generation

The traffic that would be generated by the proposed development was estimated using the Institute of Transportation Engineers (ITE) Trip Generation Manual (TGM) 10<sup>th</sup> Edition. The trips expected to be generated by this development were determined using ITE Land Use Code 820 – Shopping Center for the proposed retail, ITE Land Use Code 930 – Fast Casual Restaurant, ITE Land Use 221 – Multifamily Housing (Mid-Rise) for the apartment units, ITE Land Use Code 210 – Single-Family Detached Housing for the rental units, and ITE Land Use Code 220 – Multifamily Housing (Low-Rise) for the townhome units. The total number of project-generated trips was estimated for the typical weekday and the morning (AM) and evening (PM) peak hours.

### 3.5. Pass-by Trip Adjustment

Not all of the trips entering and exiting the development result in new traffic being added to the road system. A portion of the trips will be attracted into the site from the traffic streams that were already passing by on the adjacent streets. Pass-by trips can represent a significant portion of the trips entering and exiting a commercial site. There are data that can be used to quantify the magnitude of pass-by trips provided in ITE's Trip Generation Handbook.

The Trip Generation Handbook shows a weekday PM peak period pass-by rate for ITE Code 820 – Shopping Center of 34%. For ITE Code 930 – Fast Casual Restaurant, there is not currently a pass-by rate established in the Trip Generation Handbook. Therefore, a PM peak period pass-by rate of 43% was used to match ITE Code 932 – High Turnover Sit-Down Restaurant. The pass-by rates were checked to assure that the pass-by trips did not exceed 15% of the adjacent street volume.

Pass-by trips are always included in the driveway movements. Pass-by trips are subtracted from the through volumes passing a given site driveway.

Table 1 shows the application of the trip generation and the trip adjustment strategies for the Opening Year 2024 – With Project scenarios. The resulting trip projections are provided in terms of daily traffic and also for each of the peak periods.

TABLE 1 - TRIP GENERATION

| Category                       | Code | Size   | Unit  | Total | In    | Out   | Total | In  | Out | Total | In  | Out |
|--------------------------------|------|--------|-------|-------|-------|-------|-------|-----|-----|-------|-----|-----|
| Shopping Center                | 820  | 9.00   | ksf   | 340   | 170   | 170   | 27    | 15  | 12  | 38    | 19  | 19  |
| Internal Trips                 |      |        |       | 134   | 85    | 49    | 3     | 1   | 2   | 30    | 14  | 16  |

| Total Pass-by Trips            |      |        |       | 469   | 233   | 236   |       |     |     | 54    | 28  | 26  |
| Total New Trips                |      |        |       | 2,597 | 1,297 | 1,300 | 269   | 115 | 154 | 234   | 135 | 99  |

FIGURE 4 - EXISTING 2021 - PEAK HOUR TRAFFIC

FIGURE 5 - OPENING YEAR 2024 - BACKGROUND - PEAK HOUR TRAFFIC

### 3.6. Distribution of Project-Generated Trips

The project-generated trips were distributed across the surrounding roadway network based on the distribution of existing traffic in each peak hour. New trips were distributed to all four cardinal directions via Shallowford Road, Pearl Nix Parkway, Skelton Road, and West End Avenue. The proposed trip distribution is shown in Figure 6.

### 3.7. Assignment of Project-Generated Trips

The number of new and pass-by trips at the study intersections were determined using the trip generation and distribution already discussed.

Figure 7 shows the new Peak Hour Trip Adjustments, and Figure 8 shows the Opening Year 2024 – With Project peak hour traffic volumes.

FIGURE 6 - NEW TRIP DISTRIBUTION

FIGURE 7 - PEAK HOUR TRIP ADJUSTMENTS

FIGURE 8 - OPENING YEAR 2024 - WITH PROJECT - PEAK HOUR TRAFFIC

## 4. DATA ANALYSIS

### 4.1. Level of Service Criteria

In order to quantify the impacts of additional traffic and to determine any needed roadway and/or operational improvements, a capacity analysis was performed for the Existing 2021, Opening Year 2024 – Background, and Opening Year 2024 – With Project peak hour conditions based on the methodology outlined in the *Highway Capacity Manual (HCM)*. There are various computer programs available that implement the *HCM* methodology. For this project, Synchro 11 was used to analyze the signalized intersections and HCS7 was used to analyze the unsignalized intersections.

HCM defines level of service (LOS) in terms of the amount of control delay, including initial deceleration delay, queue move-up time, stopped delay, and final acceleration delay. The LOS categories range from A to F, with different thresholds specified according to the type of stop control at the intersection. The LOS criteria for unsignalized, signalized, and roundabout intersections are listed in Table 2.

TABLE 2 - LEVEL OF SERVICE CRITERIA

| Level of Service (LOS) | Unsignalized Control Delay per Vehicle (sec) | Signalized or Roundabout Control Delay per Vehicle (sec) |
|------------------------|----------------------------------------------|----------------------------------------------------------|
| A                      | $\leq 10$                                    | $\leq 10$                                                |
| B                      | $> 10$ and $\leq 15$                         | $> 10$ and $\leq 20$                                     |
| C                      | $> 15$ and $\leq 25$                         | $> 20$ and $\leq 35$                                     |
| D                      | $> 25$ and $\leq 35$                         | $> 35$ and $\leq 55$                                     |
| E                      | $> 35$ and $\leq 50$                         | $> 55$ and $\leq 80$                                     |
| F                      | $> 50$                                       | $> 80$                                                   |

Rural, sparsely developed areas have a minimum LOS requirement of C based on rural residents' expectation for relatively uncongested conditions in combination with design flexibility associated with lower right of way costs. The minimum LOS for urban areas is D, reflecting the greater acceptance of delay and congestion by urban residents. Additionally, the increased density of developments makes right of way costs much higher in urban areas. The study area is located in an urban setting; therefore, the minimum requirement is LOS D.

## 4.2. Existing Intersection Capacity Analysis

A capacity analysis was performed to evaluate the AM and PM peak hour periods for the Existing 2021 conditions. The results of the analysis are listed in Table 3. Synchro and HCS reports are included in **Appendix E**.

**TABLE 3 - EXISTING 2021 - CAPACITY ANALYSIS RESULTS**

| No. | Intersection                                      | Intersection Control | Movement | Existing 2021 |         |         |         |
|-----|---------------------------------------------------|----------------------|----------|---------------|---------|---------|---------|
|     |                                                   |                      |          | AM Peak       |         | PM Peak |         |
|     |                                                   |                      |          | LOS           | sec/veh | LOS     | sec/veh |

| 6   | Pearl Nix Parkway at Shallowford Road             | Signalized           | Overall  | B             | 19.6    | C       | 26.7    |

The following inadequate operations were observed for the Existing 2021 conditions:

- Shallowford Road at Commercial Driveway #3 (unsignalized)
  - The northbound left-turn movement is currently exhibiting LOS E in the PM Peak period.

## 4.3. Opening Year Intersection Capacity Analysis

A capacity analysis was performed to evaluate the AM and PM Peak periods in Opening Year 2024. For the purposes of this study, the following assumptions were made:

- Opening Year 2024 – Background
  - This scenario assumes that the existing roadway and lane assignments are expected to be the same in year 2024.
- Opening Year 2024 – With Project
  - This scenario assumes the same roadway network and lane assignments as in the Opening Year 2024 Background scenario. The proposed driveways are detailed below:
    - Skelton Road at Site Driveway #1 is proposed as full access and will utilize the existing lane assignments along Skelton Road. The site driveway will be a shared left+through+right lane exiting the site with a single lane entering.

- Shallowford Road at Albert Street/Site Driveway #2 is proposed as full access and will utilize the existing lane assignments along Shallowford Road. The site driveway will be a shared left+through+right lane exiting the site with a single lane entering.
- Shallowford Road at Regions Bank Driveway/Site Driveway #3 is proposed as full access and will utilize the existing lane assignments along Shallowford Road. The site driveway will be a shared left+through+right lane exiting the site with a single lane entering.
- Shallowford Road at Site Driveway #4 is proposed as full access and will utilize the existing lane assignments along Shallowford Road. The site driveway will be a shared left+right lane exiting the site with a single lane entering.

The results of the Opening Year 2024 analysis are shown in Table 4. Synchro and HCS reports for the Opening Year 2024 analysis are included in **Appendix F**.

**TABLE 4 - OPENING YEAR 2024 - CAPACITY ANALYSIS RESULTS**

| 6   | Pearl Nix Parkway at Shallowford Road                                  | Signalized           | Overall  | B                  | 19.8    | C                    | 21.0    | C                  | 27.5    | C                    | 29.8    |

The following inadequate operations were observed for the Opening Year 2024 conditions:

- Shallowford Road at Commercial Driveway #3 (unsignalized)
  - The northbound left-turn movement is expected to exhibit unsatisfactory LOS in the Background scenario for the PM peak period. However, it should be noted that the overall northbound approach is expected to operate with adequate LOS during this scenario. For the With Project scenario, Future Site Driveway #4 becomes a single lane approach and is expected to operate adequately with LOS D.

#### 4.4. Back of Queue Analysis

A Back of Queue (BOQ) analysis was used to determine the storage needs for Opening Year 2024. The 95<sup>th</sup> percentile BOQ length was calculated for specific movements at each intersection. The queue is expected to be the reported length or shorter 95 percent of the time. The BOQ results were taken from the capacity analysis reports output by Synchro and HCS for each study intersection (refer to **Appendix F** for those printouts). Table 5 lists the BOQ lengths for each peak hour of the Opening Year 2024 – Background and With Project scenarios.

**TABLE 5 - OPENING YEAR 2024 - BACK OF QUEUE RESULTS**

| No. | Intersection                                                        | Intersection Control | Movement | Existing Full Length Storage (feet) | 95th Percentile Back of Queue (feet) |              |            |              |

|     |                                                                     |                      | SBT      | N/A                                 | 69                                   | 73           | 138        | 141          |
|     |                                                                     |                      | SBR      | 250'                                | 0                                    | 0            | 0          | 25           |

The BOQ results indicate the following:

- Pearl Nix Parkway at Shallowford Road (signalized)
  - The eastbound left-turn queue off of Shallowford Road is expected to be 144' for the Background PM scenario and 204' for the With Project scenario. Currently, the striped left-turn lane is only 80'; however, the left-turn lane could be extended by utilizing the existing TWLTL along Shallowford Road. Additionally, the eastbound left-turn movement is not currently receiving a lot of green time in the existing timing parameters. It is expected that small increments of green time for the eastbound left-turn movement will reduce the queue lengths currently shown in the table above.

## 5. CONCLUSIONS

---

The proposed development will be positioned on approximately 25 total acres in Hall County. The development is proposed to consist of a 9,000 square foot of retail development, a 3,500 square foot fast-casual restaurant, 184 apartment units, 67 single-family rental units, and 85 townhome units. The proposed development will consist of four access points onto the surrounding roadways. In the northwestern quadrant, there is a full access driveway providing access to Skelton Road while the remaining three driveways provide access to Shallowford Road. The proposed development is expected to be built in one stage and is expected to be built out in 2024.

The proposed project is expected to generate a total of 2,597 new trips on a typical weekday. A total of 269 new trips would be generated during the AM Peak hour, and 234 new trips would be generated during the PM peak hour. A portion of the total trips for the proposed development are expected to be comprised of internal trips between land uses. Based on the land uses within the development, a total of 612 trips are expected on a typical weekday. A total of 44 internal trips would be generated during the AM peak hour, and 103 internal trips would be generated during the PM peak hour. The proposed project is expected to generate a total of 469 pass-by trips on a typical weekday. A total of 54 pass-by trips are expected to be generated during the PM peak hour. Based on the expected land uses within the development, there are currently no pass-by trips expected for the AM peak hour.

In the Existing Year 2021 capacity analysis, the stop-controlled intersection at Shallowford Road and Commercial Driveway #3 exhibited unsatisfactory delay for the northbound left-turn movement during the PM peak period.

In the Opening Year 2024 – Background capacity analysis, the stop-controlled intersection at Shallowford Road and Commercial Driveway #3 continues to experience unsatisfactory delay during the PM peak period. The northbound left-turn movement is expected to operate with LOS E during this period.

In the Opening Year 2024 – Background back of queue analysis, one intersection is expected to have queues that extend beyond the existing storage bay. At the intersection of Pearl Nix Parkway and Shallowford Road, the eastbound left-turn queue is expected to extend beyond the existing storage bay during the PM peak period.

In the Opening Year 2024 – With Project capacity analysis, all intersections are expected to operate adequately during both peak hours.

In the Opening Year 2024 – With Project back of queue analysis, one intersection is expected to have queues that extend beyond the existing storage bay. At the intersection of Pearl Nix Parkway and Shallowford Road, the eastbound left-turn queue is expected to extend beyond the existing storage bay during the PM peak period. Currently, the striped left-turn lane is only 80'; however, the left-turn lane could be extended by utilizing the existing TWLTL along Shallowford Road. If queues in excess of 80' are experienced, it is expected that the existing TWLTL will accommodate the additional vehicles without affecting the operation at this intersection, or those in the immediate vicinity. Additionally, the eastbound left-turn movement is not currently receiving a lot of green time in the existing timing parameters. It is expected that small increments of green time for the eastbound left-turn movement will reduce the queue lengths currently shown in the table above.

Based on the above summary of capacity and queueing impacts, the proposed Shallowford Mixed-Use development is not expected to significantly impact the roadway network surrounding the development.

## APPENDIX C – COVID-19 ADJUSTMENT FACTORS

### COVID-19 Adjustment Factors

| ADT Location                                 | 2018/2019 Count Data<br>(pre-COVID) <sup>1</sup> | Estimated 2021<br>Count Data <sup>2</sup> | 2021 Count Data<br>(post-COVID) <sup>3</sup> | COVID<br>Adj. Factor |
|----------------------------------------------|--------------------------------------------------|-------------------------------------------|----------------------------------------------|----------------------|
| Pearl Nix Parkway, south of Shallowford Road | 15928                                            | 16562                                     | 15331                                        | 1.08                 |
| Shallowford Road, east of Skelton Road       | 15496                                            | 16113                                     | 14307                                        | 1.13                 |
| Skelton Road, south of Shalloword Road       | 6186                                             | 6229                                      | 6870                                         | 0.91                 |

<sup>1</sup>Pre-COVID count data was obtained from the GDOT Traffic Analysis and Data Application (TADA) and is based on ADT data from 2018.

<sup>2</sup>Estimated 2021 count data is based on a 1.3% growth rate as determined from historical count data obtained from TADA.

<sup>3</sup>Post-COVID count data consists of the 24-Hour Bi-Directional tube counts collected as part of this project.

# APPENDIX F – OPENING YEAR 2024 OPERATIONAL ANALYSIS REPORTS

# HCS7 Two-Way Stop-Control Report

## General Information

|                          |                        |
|--------------------------|------------------------|
| Analyst                  | A. Simmons             |
| Agency/Co.               | Keck & Wood            |
| Date Performed           | 8/31/2021              |
| Analysis Year            | 2024                   |
| Time Analyzed            | AM Peak                |
| Intersection Orientation | North-South            |
| Project Description      | Future Background 2024 |

## Site Information

|                            |                         |
|----------------------------|-------------------------|
| Intersection               | Skelton Rd @ U-Haul Dwy |
| Jurisdiction               | City of Gainesville     |
| East/West Street           | U-Haul Dwy              |
| North/South Street         | Skelton Rd              |
| Peak Hour Factor           | 0.87                    |
| Analysis Time Period (hrs) | 0.25                    |

## Lanes

**Presenter:** Matt Tate

**Item of Business:** Request from **Mark D. Thebaut, D.D.S.** to amend an existing Planned Unit Development (P-U-D) zoning totaling 0.67± acre located on the southeast side of the intersection of Thompson Bridge Road and Lanier Avenue (a/k/a **1398 Thompson Bridge Road, NE**).  
Ward Number: Two  
Tax Parcel Number(s): 01-087-003-001  
Request: Medical/Dental office / restaurant with drive-thru

**Meeting Date:** 12/14/2021

**Purpose of Request:**

The applicant is proposing to amend an existing Planned Unit Development (P-U-D) for a medical/dental office. The property is the current site of a Pizza Hut restaurant which was originally established in 1988. The applicant intends to convert the existing building to a medical/dental office but would like the ability to retain the existing use of a restaurant with a drive-thru. The existing building is 2,841 square feet which will be expanded to 3,335 square feet while utilizing the existing 42 parking spaces. The existing driveway off of Thompson Bridge Road and Lanier Avenue will remain. Adjacent uses include Coleman, Chambers & Rogers Law office, Lanier Federal Credit Union, Martin Properties Construction office, and Westminster Presbyterian Church.

▪ **Applicant's Proposal and Background Information**

The applicant is proposing to amend an existing Planned Unit Development (P-U-D) for a medical/dental office. The property is the current site of the Pizza Hut restaurant which was originally established in 1988. The applicant currently owns the existing TEBO Dentistry located further north in the County at the intersection of Thompson Bridge Road and Garden Boulevard. The applicant intends to relocate and to convert the existing building to a medical/dental office with the ability to retain the existing use of a restaurant with a drive-thru.

The existing restaurant building is 2,841 square feet in size and contains 42 parking spaces with a drive-thru. The proposal includes expanding the rear of the building an additional 500± square feet for a total of 3,335± square feet. The proposed plan will remove the drive-thru window/lane which will increase the building setback from 16-feet to 18-feet from Lanier Avenue. The existing 42 space parking lot and the driveway on Thompson Bridge Road and Lanier Avenue will remain.

The property is located within the Gateway Corridor Overlay Zone which ensures improved development quality for new development along the corridor. The proposed architectural changes to the building will meet the Gateway standards.

▪ **Adjacent Land Use and Zoning**

| Location | Use                                                 | Zoning                           |
|----------|-----------------------------------------------------|----------------------------------|
| North    | Lanier Federal Credit Union                         | Neighborhood Business (N-B)      |
| South    | Coleman, Chambers & Rogers, LLP<br>Law Office       | Neighborhood Business (N-B)      |
| East     | Martin Properties Construction<br>Management Office | Planned Unit Development (P-U-D) |
| West     | Westminster Presbyterian Church                     | Neighborhood Business (N-B)      |

▪ **Other Departmental Comments**

The applicant will be required to coordinate with the Georgia Department of Transportation (GDOT) based on the change of use.

▪ **Zoning History**

*The following zoning actions have taken place in the immediate area during the last ten years:*

**2020** - A request by Walker-Lanier, LLC to rezone a 0.50<sup>±</sup> acre tract located at 989 Lanier Avenue and 1437 Walker Street from Residential-I (R-I) to Residential-II (R-II) was approved with conditions for duplex homes.

**2017** - A request by the 5 MCS, LLC to rezone a 5.24<sup>±</sup> acres tract located at 1012 Enota Avenue from Residential-I (R-I) and Planned Unit Development (P-U-D) to Planned Unit Development (P-U-D) was approved with conditions for an assisted living facility, townhome cottages and a single-family home.

**2017** - A request by Adams & Copeland, LLC for a special use for a hair salon and office within the Office and Institutional (O-I) zoning district located at 1665 Thompson Bridge Road was approved with conditions.

**2017** - A request by Montecito Development for a special use for a convenience store with fuel pumps within the Neighborhood Business (N-B) zoning district located at 1281 Thompson Bridge Road was denied.

**2017** - A request by Montecito Development to rezone a 0.48<sup>±</sup> acres tract located at 149 Enota Avenue from Office and Institutional (O-I) to Neighborhood Business (N-B) zoning district with a special use was denied.

**2016** - A request by Jack Bailey to rezone a 0.61<sup>±</sup> acre tract located at 1665 Thompson Bridge Road NW from Residential-I (R-I) to Office and Institutional (O-I) was approved with conditions for an insurance office.

**2016** - A request by Teresa Vickers for a special use for a hair salon within the Office and Institutional (O-I) zoning district located at 977 and 983 Enota Avenue was approved with conditions.

**2015** - A request by David P. Johnson to rezone a 1.458<sup>±</sup> acres tract located at 1537 and 1551 Thompson Bridge Road; and 135 Virginia Circle from Residential-I (R-I) to Neighborhood Business (N-B) with a special use for a restaurant with drive-thru and retail was denied.

**2014** – A request by Polestar Development, LLC to rezone a 1.741<sup>±</sup> acres tract located at 1435 Thompson Bridge Road from Residential-II (R-II) to Regional Business (R-B) for a grocery store and fuel service station was approved with conditions.

**2013** - A request by Michael Slate to rezone a 0.67<sup>±</sup> acre tract located at 971 Lanier Avenue NE from Residential-I (R-I) to Residential and Office (R-O) for a professional office was approved with conditions.

**2011** - A request by Greg Loyd for a special use for a Dunkin Donut restaurant with a drive thru within the Neighborhood Business (N-B) zoning district located at 1151 Thompson Bridge Road was approved with conditions.

▪ **Staff Analysis**

**(1) Is the proposed use suitable in view of the zoning and development of adjacent and nearby property?**

The adjacent and nearby uses consist of professional offices, banks, restaurants, grocery and a church with zonings of Office and Institutional (O-I), Neighborhood Business (N-B), Regional Business (R-B) and General Business (G-B). Residential uses can be found on both the east and west sides of Thompson Bridge Road behind the commercial properties. It appears the proposed zoning amendment to convert the subject property to a medical/dental office is suitable given the surrounding uses.

**(2) Will the proposed use adversely affect the existing use or usability of adjacent or nearby property?**

The subject property has functioned as a commercial use for approximately 34 years. Given the nature of the request, the proposed dentist office would appear to have less of an impact to the adjacent properties given that the business will have shorter hours of operation and no drive-thru traffic. Existing access and parking are sufficient to handle the change in use.

**(3) Is the proposed use compatible with the purpose and intent of the Comprehensive Plan?**

The proposed development is located within the *Retail/Commercial* land use category. The *Retail/Commercial* land use category includes commercial service activities such as grocery stores, banks, offices, restaurants, theatres, hotels, and automotive related businesses. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

According to the Character Area map for the City of Gainesville, the property is located within the *City Park Neighborhood Center* Character Area.

The vision for the *City Park Neighborhood Center* Character Area states that Thompson Bridge Road should be transformed into a "Complete Street" with sidewalks, landscaping, bike lanes and transit stops. Preservation of local small businesses should be a priority, and key early commercial buildings targeted for preservation. New commercial development should be compatible with the small scale of the older structures, and parking should be located to the rear with inter-parcel connectivity where possible. The area is not anticipated to see major economic growth, but remain oriented toward addressing existing neighborhood needs. Businesses providing basic goods and services that neighborhood residents depend on in daily life (for example food, household supplies, medicine etc.) should be encouraged. Locally-owned / family-owned businesses should be promoted to encourage small business investment / entrepreneurship. Land uses allowed include mixed-use, commercial and public/institutional.

**(4) Are there substantial reasons why the property cannot or should not be used as currently zoned?**

The property is zoned Planned Unit Development (P-U-D) which is a site-specific zoning. Modifications to the proposed plan require the zoning to be amended. The proposed zoning was originally approved in 1988. The existing Pizza Hut restaurant location is closing but does not currently permit a medical/dental office. As part of the P-U-D amendment request, the applicant has asked that a restaurant use still be allowed in case the use ever changes at some point in the future.

**(5) Will the proposed use cause an excessive or burdensome use of public facilities or services, including but not limited to streets, schools, water or sewer utilities, and police or fire protection?**

City water, sewer and public safety services are currently provided to the property. Gainesville Fire Station #2 is located off of Cleveland Highway and is approximately 2.2± miles from the subject property.

According to the “9<sup>th</sup> Edition Trip Generation Manual” as published by the Institute of Transportation Engineers, the estimated trips for a medical-dental office are 121± trips per weekday, 12 A.M. and 14 P.M. peak hour trips.

The proposal may increase ingress and egress traffic movements along Thompson Bridge Road between 8:00 A.M. and 5:00 P.M. given that the current Pizza Hut restaurant is experiencing low traffic volumes. Thompson Bridge Road typically experiences high southbound traffic volumes in the morning and high northbound traffic volumes in the evening. According to the Transportation Master Plan for this area, there are planned turn lane improvements at the intersection of Thompson Bridge Road and Enota Avenue which could help with traffic flow.

The proposal should have no impact on the school system given that it is a non-residential use.

**(6) Is the proposed use supported by new or changing conditions not anticipated by the Comprehensive Plan or reflected in the existing zoning on the property or surrounding properties?**

Thompson Bridge Road has experienced steady commercial growth over the past 40 years but at a slower rate than other corridors such as Jesse Jewell Parkway, Dawsonville Highway and Browns Bridge Road. Much of the growth has included redevelopment of existing commercial properties and the conversion of residential parcels fronting Thompson Bridge Road into office or neighborhood scale retail and restaurant uses. The proposal intends to convert and upgrade the existing Pizza Hut restaurant building to a dental office. The proposal is a positive reuse of the property that will improve the aesthetics of the property and enhance the gateway corridor.

**(7) Does the proposed use reflect a reasonable balance between the promotion of the public health, safety, morality, or general welfare and the right to unrestricted use of property?**

Based on the Comprehensive Plan, adjacent non-residential uses and the existing use of the property, the proposed P-U-D amendment appears to reflect a reasonable balance between the promotion of the public health, safety, morality, or general welfare and the right to unrestricted use of property.

---

▪ **Staff Recommendation**

The Planning Division staff is recommending **conditional approval** of this request based on the Comprehensive Plan and the adjacent nonresidential uses.

**Conditions**

- 1. The proposed development shall be generally consistent with the standards depicted on the concept plan and architectural renderings provided with this application.**

2. The existing pole sign shall be removed. The subject property shall be limited to one (1) monument sign fronting Thompson Bridge Road, not to exceed 10-feet in height, 64 square feet in size, with internal or indirect lighting. Building signage shall be permitted as regulated within the Gainesville Unified Land Development Code. An electronic message board / changeable copy sign shall not be permitted for the subject property.
3. The developer/property owner shall be required to repair or replace the existing privacy fence located to the rear of the building.
4. All access point design for the subject property shall require approval by the Georgia Department of Transportation in conjunction with the Gainesville Public Works Director. All required access / traffic / sidewalk improvements associated with the proposed development or any additional improvements identified within the Traffic Impact Study shall be at the full expense of the developer/property owner.

## **I. INTRODUCTION**

This Application for a Zoning Amendment is submitted for a .687-acre parcel of land located in Land Lot 146 of the 9<sup>th</sup> District of Hall County, Georgia, identified as Tax Parcel 010870003001 (hereinafter the “Property”). The Property is shown on the survey prepared by Georgia Premier Land Services, Inc., dated September 22, 2021, and filed with this Application. The Property that is the subject of this zoning amendment is owned by Theodore C. Borromeo and identified as shown below in the Hall County GIS:

The Property is currently zoned PUD (Planned Unit Development) pursuant to the Unified Land Development Code (the “ULDC”). The proposal to allow for the continued use as restaurant with drive thru while expand the permitted uses to include a medical or dental office is consistent with the policies and intent of the PUD. The Applicant, Mark D. Thebaut, D.D.S. (the “Applicant”) now seeks approval of the requested zoning amendment to extend the permitted uses on the Property to include a medical/dental office while maintaining the right to continue use as a restaurant with drive thru.

This document is submitted as the Written Narrative, Justification Letter, and other materials required by the ULDC.

## **II. DESCRIPTION OF THE PROPERTY AND SURROUNDING AREA**

The Property is a primarily square tract fronting Thompson Bridge Rd. It is currently in operation as a Pizza Hut and is surrounded by other commercial, retail, and professional service businesses. The Property is surrounded by other commercial and office zoning districts including N-B, R-B, G-B, and O-I. The Property’s location at the intersection of Thompson

Bridge Rd and Lanier Ave provides convenient access from all directions of Thompson Bridge Rd while also serving the nearby residential.

The Property lies within the City Park Neighborhood Activity Center and the Gateway Corridor Overlay of the 2030 Comprehensive Plan ("Plan"). As outlined in the Plan, the Overlay seeks to shape the development forms and aesthetics along the major corridor through the City. The Applicant's request seeks to utilize the existing building with cosmetic changes that are in line with the policies and intent of the Overlay and the Plan.

### **III. PROJECT SUMMARY**

As shown on the site plan prepared by Reed Planning & Design on October 18, 2021 and filed with this Application (hereinafter the "Site Plan"), the Applicant proposes to expand the footprint of the existing building from 2,841sf to 3,335sf. The Property will utilize the existing detention pond and maintain the current 42 parking spaces. Applicant plans to make cosmetic improvements to the building in keeping with the ULDC as the building transitions to use as a medical or dental office per the Zoning Amendment request.

As indicated, the surrounding area is characterized by existing mix of commercial and offices uses in accordance with the Plan. Accordingly, the Applicant's request is consistent with surrounding uses and the stated goals of the Plan.

### **IV. JUSTIFICATION FOR REZONING**

The Applicant respectfully submits that "Uniform Land Development Code" (the "ULDC") as amended from time to time, to the extent that it classifies the Property in any zoning district that would preclude the continued and future use as a planned unit development (PUD) is unconstitutional as a taking of property, a denial of equal protection, an arbitrary and capricious act, and an unlawful delegation of authority under the specific constitutional provisions later set forth herein. Any existing inconsistent zoning of the Property pursuant to the ULDC deprives the Applicant and Property owner of any alternative reasonable use and development of the Property. Additionally, all other zoning classifications, including ones intervening between the existing classification and that requested herein, would deprive the Applicant and Property owner of any reasonable use and development of the Property. Further, any attempt by the Mayor and Council of the City of Gainesville to impose greater restrictions upon the manner in which the Property will be used than presently exist would be equally unlawful.

Accordingly, Applicant submits that the current zoning classification with a use limitation as a restaurant with drive thru, and any other zoning of the Property save for what has been requested as established in the ULDC constitute an arbitrary and unreasonable use of the zoning and police powers because they bear no substantial relationship to the public health, safety, morality or general welfare of the public and substantially harm the Applicant and Property owner. All inconsistent zoning classifications between the existing zoning and the zoning requested hereunder would constitute an arbitrary and unreasonable use of the zoning and police powers because they bear or would bear no substantial relationship to the public health, safety, morality,

or general welfare of the public and would substantially harm the Applicant and Property owner. Further, the existing inconsistent zoning classification constitutes, and all zoning and plan classifications intervening between the existing inconsistent zoning classification and that required to develop this Project would constitute, a taking of the owner's private property without just compensation and without due process in violation of the Fifth Amendment and Fourteenth Amendment of the Constitution of the United States, and Article I, Section I, Paragraph I and Article I, Section III, Paragraph I of the Constitution of the State of Georgia and the Due Process and Equal Protection Clauses of the Fourteenth Amendment to the Constitution of the United States.

Further, the Applicant respectfully submits that failure to approve the requested zoning amendment would be unconstitutional and would discriminate in an arbitrary, capricious and unreasonable manner between the Applicant and Property owner and owners of similarly situated property in violation of Article I, Section III, Paragraph I of the Constitution of the State of Georgia and the Equal Protection Clause of the Fourteenth Amendment of the Constitution of the United States.

Finally, the Applicant respectfully submits that the Mayor and Council of the City of Gainesville cannot lawfully impose more restrictive standards upon the use of the Property than presently exists, as to do so not only would constitute a taking of the Property as set forth above, but also would amount to an unlawful delegation of their authority, in response to neighborhood opposition, in violation of Article IX, Section IV, Paragraph II of the Georgia Constitution.

This Application meets favorably with the prescribed test set out by the Georgia Supreme Court to be used in establishing the constitutional balance between private property rights and zoning and planning as an expression of the government's police power. See *Guhl v. Holcomb Bridge Road Corp.*, 238 Ga. 322 (1977).

## **V. CONCLUSION**

For the foregoing reasons, the Applicant respectfully requests that this Zoning Amendment application to allow for the continued use as a restaurant with drive through and including the allowable use of a medical or dental office be approved. The Applicant welcomes the opportunity to meet with the City of Gainesville Planning Department staff to answer any questions or to address any concerns relating to this Letter of Intent or supporting materials.

Respectfully submitted this 25<sup>th</sup> day of October, 2021.

**ANDERSEN, TATE & CARR, P.C.**
